**Overcoming Heterosexism and Homophobia** James Thomas Sears,Walter L. Williams,1997 Few aspects of American military history have been as vigorously debated as Harry Truman's decision to use atomic bombs against Japan. In this carefully crafted volume, Michael Kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons, surveys the major debates related to that decision, and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II. Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945. He then provides a historical overview of thye events in question, beginning with the decision and program to build the atomic bomb. Detailing the sequence of events leading to Japan's surrender, he revisits the decisive battles of the Pacific War and the motivations of American and Japanese leaders. Finally, Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents, scholarly books, and articles.

*Diluvial Soils and Their Amelioration* Mukhtar Abduyev,2012 The late Professor Mukhtar Abduyev's pioneering work was the result of ten years of study, field research, and laboratory experimentation on salinized diluvial soils in the foothill plains and steppe of Azerbaijan. Farmers had almost no experience of managing this type of soil and no work had been done on methods of amelioration. Thus, at a time of increased demand for agricultural land, this work was a most timely contribution to bringing Azerbaijan's foothill plains, a major soil reserve, into play. Important as the work was for Professor Abduyev's native land, however, it had even wider implications. Because there are other forms of salinization in Azerbaijan, the work herein facilitated comparative analysis of their distinctive characteristics - common to the arid regions of many other countries. In Diluvial Soils and Their Amelioration, as in his other works, Abduyev moves from rigorous scientific analysis of the problem and its origins to the development of techniques to return salinized land to productive efficiency - a true demonstration of science in practical action.
