Colour Mania Victionary,2009 Green with envy. Feeling blue. White lies. Grey areas. In every language spoken on earth human beings use colors to express themselves. World renowned author, Vladimir Nabokov\*, claimed he could hear color and actually assigned a color to each letter of the alphabet based on each letter's particular sound. The Eskimos of the polar regions have countless words that uniquely describe the color white. In the world of graphics some designers have devoted their entire body of work to one color, sometimes showing it off in all of its full-bodied glory, sometimes stripping it back to its barest essentials. Colour Mania brings together an eclectic group of talented designers who have one thing in common: they are artists who simply can't get enough of one particular color be that red, orange, yellow, green, blue, purple, black or white. This book offers a depth of understanding of individual colors that is unprecedented.

**Science, Society and Sustainability** Donald Gray,Laura Colucci-Gray,Elena Camino,2010-09-28 Recent work in science and technological studies has provided a clearer understanding of the way in which science functions in society and the interconnectedness among different strands of science, policy, economy and environment. It is well acknowledged that a different way of thinking is required in order to address problems facing the global community, particularly in relation to issues of risk and uncertainty, which affect humanity as a whole. However, approaches to education in science tend to perpetuate an outmoded way of thinking that is incommensurable with preparing individuals for participation and decision-making in an uncertain, complex world. Drawing on experiences of interdisciplinary dialogue and practice in a higher education context, this book illustrates how reformulating the agenda in science and technology can have a revolutionary impact on learning and teaching in the classroom at all levels. This exceptional study will interest scholars in Education, Science, Technology, and Society, and those looking to further deliberative democracy and civic participation in their students.
