Salt and Drought Stress Tolerance in Plants Mirza Hasanuzzaman,Mohsin Tanveer,2020-04-10 This book presents various aspects of salt and drought stress signaling in crops, combining physiological, biochemical, and molecular studies. Salt and drought stress are two major constraints on crop production worldwide. Plants possess several mechanisms to cope with the adverse effects of salt and drought. Among these mechanisms, stress signaling is very important, because it integrates and regulates nuclear gene expression and other cellular activities, which can help to restore cellular homeostasis. Accordingly, understanding the signaling cascades will help plant biologists to grasp the tolerance mechanisms that allow breeders to develop tolerant crop varieties. This book is an essential resource for researchers and graduate students working on salt and drought stress physiology and plant breeding.

Stress Responses in Plants Ruth G. Alscher, Jonathan R. Cumming, 1990 In order to survive, plants must respond effectively to severe alterations in environmental factors, such as ambient light, temperature and mineral or water availability. This book focuses on the various physiological, metabolic and molecular processes through which higher plants cope with dramatic changes in their ecosystems. It discusses both the short-term acclimation responses of individual plants and the long-term adaptations that ensure the survival of a species. Individual chapters in the text deal with the various organizational levels on which plants respond to different types of abiotic stress.

Development Gianni Vaggi, 2018-11-24 This book provides a brief history of the notion of development and related policies. Readers will find an overview of the main development notions and debates from 1950 to the 2015 Sustainable Development Goals. The author argues that sustainable development is equal to empowerment within a specific historical setting; development is a dialectic relationship between people's empowerment and the existing social and economic structures. The book examines some well-known growth theories from Harrod in 1939 to contemporary debates views about the role of the state and the market. Some major structural changes are also examined from economic growth in Asia to international finance: the author contends that contemporary issues on development can be better understood with the help of the founding fathers of economics, from the Mercantilist era to Marx. They help to understand the difficult relationship between development and market forces within different models of social and economic reproduction. The author contends that the main development challenge is that of building a global partnership in a system with enormous differences in economic powers and offers some examples of how to re-balance the existing economic powers particularly in trade and finance.

Violence and Mental Health Jutta Lindert, Itzhak Levav, 2015-02-25 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of ‘undoing violence’ by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

Open Innovation 2.0 Martin Curley, Bror Salmelin, 2017-10-05 This book presents the emerging paradigm and methodology, Open Innovation 2.0 (OI2), which aims to help drive significant structural changes and benefits through digital innovation to society and industry. It highlights how new services and markets can be co-created in open ecosystems and how this leads to a transformation from win-lose to win-win situations for all stakeholders. Organized around a number of core patterns of OI2, such as shared purpose, partnering and platforms, this book leverages more than five years of research by the EU Open Innovation Strategy Policy group. Popularized in the early 2000s, open innovation is a systematic process by which ideas can pass among organizations and travel on different exploitation vectors for value creation. With the simultaneous arrival of multiple digital disruptive technologies and rapid evolution of the discipline of innovation, it became apparent that an entirely new approach to innovation was needed that incorporated technological, societal and policy dimensions. Unlike other innovation methodologies, OI2 is an innovation paradigm and methodology with a purpose: to seek and deliver innovations that move us collectively on to a trajectory towards sustainable intelligent living. OI2 is a paradigm advocating for disruptions, seeking the unexpected and providing support for rapid scale-up of successes. As a method, it provides a safety net for both

innovations and innovators, inspiring innovators to have the confidence and courage to innovate. Featuring case studies from domains such as energy, telecommunications, transportation, and finance and from companies including Intel, Lego, Alcatel Lucent and Alstom, this book is useful to industry executives, policy makers, academics, and students of innovation and innovation management.

Kumba Africa Sampson Ejike Odum, 2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.
