*Security and Privacy in Communication Networks* Noseong Park, Kun Sun, Sara Foresti, Kevin Butler, Nitesh Saxena, 2020-12-11 This two-volume set LNICST 335 and 336 constitutes the post-conference proceedings of the 16th International Conference on Security and Privacy in Communication Networks, SecureComm 2020, held in Washington, DC, USA, in October 2020. The conference was held virtually due to COVID-19 pandemic. The 60 full papers were carefully reviewed and selected from 120 submissions. The papers focus on the latest scientific research results in security and privacy in wired, mobile, hybrid and ad hoc networks, in IoT technologies, in cyber-physical systems, in next-generation communication systems in web and systems security and in pervasive and ubiquitous computing.

**Nanostructured Materials for Next-Generation Energy Storage and Conversion** Fan Li, Sajid Bashir, Jingbo Louise Liu, 2019-02-01 The energy crisis and pollution have posed significant risks to the environment, transportation, and economy over the last century. Thus, green energy becomes one of the critical global technologies and the use of nanomaterials in these technologies is an important and active research area. This book series presents the progress and opportunities in green energy sustainability. Developments in nanoscaled electrocatalysts, solid oxide and proton exchange membrane fuel cells, lithium ion batteries, and photovoltaic techniques comprise the area of energy storage and conversion. Developments in carbon dioxide (CO<sub>2</sub>) capture and hydrogen (H<sub>2</sub>) storage using tunable structured materials are discussed. Design and characterization of new nanoscaled materials with controllable particle size, structure, shape, porosity and band gap to enhance next generation energy systems are also included. The technical topics covered in this series are metal organic frameworks, nanoparticles, nanocomposites, proton exchange membrane fuel cell catalysts, solid oxide fuel cell electrode design, trapping of carbon dioxide, and hydrogen gas storage.

A Frequency Dictionary of Japanese Yukio Tono, Makoto Yamazaki, Kikuo Maekawa, 2013-12-19 A Frequency Dictionary of Japanese is an invaluable tool for all learners of Japanese, providing a list of the 5,000 most commonly used words in the language. Based on a 100 million word corpus, composed of spoken, fiction, non-fiction and news texts in current use, the dictionary provides the user with a detailed frequency-based list, as well as alphabetical and part-of-speech indices. All entries in the frequency list feature the English equivalent and a sample sentence with English translation. The dictionary also contains 25 thematically organised lists of frequently used words on a variety of topics

such as food, weather, occupations and leisure. Numerous bar charts are also included to highlight the phonetic and spelling variants across register. A Frequency Dictionary of Japanese enables students of all levels to maximise their study of Japanese vocabulary in an efficient and engaging way. It is also an excellent resource for teachers of the language.

**Business, Economics, Financial Sciences, and Management** Min Zhu, 2012-02-11 A series of papers on business, economics, and financial sciences, management selected from International Conference on Business, Economics, and Financial Sciences, Management are included in this volume. Management in all business and organizational activities is the act of getting people together to accomplish desired goals and objectives using available resources efficiently and effectively. Management comprises planning, organizing, staffing, leading or directing, and controlling an organization (a group of one or more people or entities) or effort for the purpose of accomplishing a goal. Resourcing encompasses the deployment and manipulation of human resources, financial resources, technological resources and natural resources. The proceedings of BEFM2011 focuses on the various aspects of advances in Business, Economics, and Financial Sciences, Management and provides a chance for academic and industry professionals to discuss recent progress in the area of Business, Economics, and Financial Sciences, Management. It is hoped that the present book will be useful to experts and professors, both specialists and graduate students in the related fields.

Management of Nuclear Power Plant Projects IAEA, 2020-11-25 Member States intending to introduce a nuclear power programme will need to pass through several phases during the implementation. Experience shows that careful planning of the objectives, roles, responsibilities, interfaces and tasks to be carried out in different phases of a nuclear project is important for success. This publication presents a harmonized approach that may be used to structure the owner/operator management system and establish and manage nuclear projects and their development activities irrespective of the adopted approach. It has been developed from shared management practices and consolidated experiences provided by nuclear project management specialists through a series of workshops and working groups organized by the IAEA. The resultant publication presents a useful framework for the management of nuclear projects from initiation to closeout and captures international best practices.

**Frontiers in Computer Education** Sabo Sambath, Egui Zhu, 2012-02-27 This book is the proceedings of the 2011 International Conference on Frontiers in Computer Education (ICFCE 2011) in

Sanya, China, December 1-2, 2011. The contributions can be useful for researchers, software engineers, and programmers, all interested in promoting the computer and education development. Topics covered are computing and communication technology, network management, wireless networks, telecommunication, Signal and Image Processing, Machine Learning, educational management, educational psychology, educational system, education engineering, education technology and training. The emphasis is on methods and calculi for computer science and education technology development, verification and verification tools support, experiences from doing developments, and the associated theoretical problems.

*Instrumentation, Measurement, Circuits and Systems* Tianbiao Zhang, 2012-03-09 The volume includes a set of selected papers extended and revised from the 2011 International Conference on Mechanical Engineering and Technology, held on London, UK, November 24-25, 2011. Mechanical engineering technology is the application of physical principles and current technological developments to the creation of useful machinery and operation design. Technologies such as solid models may be used as the basis for finite element analysis (FEA) and / or computational fluid dynamics (CFD) of the design. Through the application of computer-aided manufacturing (CAM), the models may also be used directly by software to create instructions for the manufacture of objects represented by the models, through computer numerically controlled (CNC) machining or other automated processes, without the need for intermediate drawings. This volume covers the subject areas of mechanical engineering and technology, and also covers interdisciplinary subject areas of computers, communications, control and automation. We hope that researchers, graduate students and other interested readers benefit scientifically from the book and also find it stimulating in the process.

**Advanced Information Technology in Education** Khine Soe Thaung, 2012-02-03 The volume includes a set of selected papers extended and revised from the 2011 International Conference on Computers and Advanced Technology in Education. With the development of computers and advanced technology, the human social activities are changing basically. Education, especially the education reforms in different countries, has been experiencing the great help from the computers and advanced technology. Generally speaking, education is a field which needs more information, while the computers, advanced technology and internet are a good information provider. Also, with the aid of the computer and advanced technology, persons can make the education an effective combination. Therefore, computers and advanced technology should be regarded as an important media in the modern education. Volume Advanced Information Technology in Education is to provide a forum for

**A Vision of Change for America** United States. President (1993-2001 : Clinton), Bill Clinton, United States. Office of Management and Budget, 1993 This report was prepared to accompany President Clinton's first address to a Joint Session of Congress. It describes in detail the comprehensive economic plan being proposed by the new administration for the nation. The plan has three key elements: economic stimulus to create jobs now while laying the foundation for long-term economic growth; long term public investments to increase the productivity of people and businesses; and a balanced deficit-reduction plan to prevent the drain of private investments that generate jobs and increase incomes. The text is organized into four sections: (1) A New Direction (a brief 3-page preamble); (2) A Legacy of Failure (a 16-page statement of the problem, under subheadings such as Skyrocketing Health Care Costs); (3) What We Must Now Do (a 92-page statement of the solution, under subheadings such as Investing in the Future: Reducing the Deficit To Increase Private Investment and Restoring Fairness); and (4) The Task Remaining (a brief 6-page wrap-up). A closing Appendix contains 25 pages of statistical tables outlining various discretionary program savings, proposed changes to mandatory programs, stimulus proposals, investment proposals, and revenue and receipts proposals. Most tables provide figures for each year for the 6-year period 1993-1998. The field of education is touched upon in the report at six locations: (1) Relative Earnings by Education for 25-34 Year Olds (Chart 2-9, p. 18); (2) Chapter 1 Compensatory Education (p.31); (3) Pell Grants (p. 32); (4) Lifelong Learning, covering full funding of Head Start and related child care funding and Medicaid, National Service, Dislocated Workers Program, Job Corps Expansion, Summer Youth Employment and Training Program, Youth Apprenticeship, and various Department of Education reforms and initiatives (p. 57-59); (5) Impact Aid b Projects (p. 87); and (6) Reform of Student Loan Programs (p. 92).
