Ultramarathon Man Dean Karnazes, 2006-03-02 In one of his most ambitious physical efforts to date, Dean Karnazes attempted to run 50 marathons, in 50 states, in 50 days to raise awareness of youth obesity and urge Americans of all fitness levels to take that next step. *UltraMarathon Man: 50 Marathons - 50 States - 50 Days*, a Journeyfilm documentary, follows Dean's incredible step-by-step journey across the country. Ultrarunning legend Dean Karnazes has run 262 miles—the equivalent of ten marathons—without rest. He has run over mountains, across Death Valley, and to the South Pole—and is probably the first person to eat an entire pizza while running. With an insight, candor, and humor rarely seen in sports memoirs (and written without the aid of a ghostwriter or cowriter), *Ultramarathon Man* has inspired tens of thousands of people—nonrunners and runners alike—to push themselves beyond their comfort zones and be reminded of what it feels like to be truly alive, says Sam Fussell, author of *Muscle*. *Ultramarathon Man* answers the questions Karnazes is continually asked: - Why do you do it? - How do you do it? - Are you insane? And in the new paperback edition, Karnazes answers the two questions he was most asked on his book tour: - What, exactly, do you eat? - How do you train to stay in such good shape?

Cheating Death Sanjay Gupta, 2009-10-12 An unborn baby with a fatal heart defect . . . a skier submerged for an hour in a frozen Norwegian lake . . . a comatose brain surgery patient whom doctors have declared a vegetable. Twenty years ago all of them would have been given up for dead, with no realistic hope for survival. But today, thanks to incredible new medical advances, each of these individuals is alive and well . . . *Cheating Death*. In this riveting book, Dr. Sanjay Gupta—neurosurgeon, chief medical correspondent for CNN, and bestselling author—chronicles the almost unbelievable science that has made these seemingly miraculous recoveries possible. A bold new breed of doctors has achieved amazing rescues by refusing to accept that any life is irretrievably lost. Extended cardiac arrest, brain death, not breathing for over an hour—all these conditions used to be considered inevitably fatal, but they no longer are. Today, revolutionary advances are blurring the traditional line between life and death in fascinating ways. Drawing on real-life stories and using his unprecedented access to the latest medical research, Dr. Gupta dramatically presents exciting accounts of how pioneering physicians and researchers are altering our understanding of how the human body functions when it comes to survival—and why more and more patients who once would have died are now alive. From experiments with therapeutic hypothermia to save comatose

stroke or heart attack victims to lifesaving operations in utero to the study of animal hibernation to help wounded soldiers on far-off battlefields, these remarkable case histories transform and enrich all our assumptions about the true nature of death and life.

North: Finding My Way While Running the Appalachian Trail Scott Jurek, 2018-04-12 2,200 miles. 47 days. One remarkable journey. In July 2015, ultramarathon legend Scott Jurek smashed the world record for running the Appalachian Trail, the sprawling mountain path that runs nearly the entire length of the United States. For nearly seven weeks straight, Jurek battled the elements to run, hike and stumble 50 miles every single day. A tale of mind-boggling physical exertion, pressure and endurance, *North* reveals the extraordinary lengths to which we can push our bodies and our minds. Instant New York Times Bestseller _____ 'Pure suspense, adventure, and inspiration . . . His story of plunging into the wilderness in pursuit of a dream is both heartwrenching and spellbinding.' Christopher McDougall, author of *Born to Run* 'Probably America's greatest ever ultrarunner.' Guardian 'Scott Jurek's record-setting journey on the Appalachian Trail was the most punishing, most demanding, most gruelling feat I've ever personally witnessed . . . An immersive and engaging book.' Aron Ralston, author of *127 Hours* 'I'm a huge fan . . . *North* is tremendous.' Vassos Alexander, BBC Radio 2 'Undoubtedly the greatest ultrarunner of his generation.' Independent

The Perfection Point John Brenkus, 2010-08-31 What's the fastest a human can run the 100-meter sprint? What's the longest a human can hold his breath? What are the limits of human performance? Welcome to *The Perfection Point*. Until 1954, common wisdom and scientific knowledge considered a sub-four-minute mile an impossible feat for a human. But then Roger Bannister broke that mark, followed quickly by a host of other athletes. Today the world record stands at 3 minutes, 43 seconds, yet even that number doesn't tell the full story of how fast humans can run a mile—records are a mark of how well people have done, not how well they can do. What's the actual limit? The answer lies in *The Perfection Point*. In this fascinating and thought-provoking book, John Brenkus, the host, co-creator, and executive producer of ESPN's *Sport Science*, ventures across the sports world to provide an in-depth look at the absolute limits of human performance. Beginning with the current world records for a variety of sports, Brenkus finds the “perfection point” for each, zeroing in on the speeds, heights, distances, and times that humans will get closer to but never exceed. Combining cutting-edge science with the fundamentals of each sport, Brenkus answers questions as old as competition itself, exploring the outer realm of what's possible in athletics. Using engrossing and accessible language, he applies statistics, physics, and physiology to uncover perfection points such as: the highest dunk the longest home run the fastest mile the longest golf drive the heaviest bench press Intriguing, detailed, and controversial, the answers that Brenkus provides are essential reading for every sports fan. For years, coaches, pundits, and experts have speculated about the extremes of human ability. *The Perfection Point* finally provides the answers.

Chasing Life Sanjay Gupta, 2007-04-09 For centuries, adventurers and scientists have believed that not only could we delay death but that practical immortality was within our reach. Today, many well-respected researchers would be inclined to agree. In a book that is not about anti-aging, but about functional aging--extending your healthy, active life--Dr. Sanjay Gupta blends together compelling stories of the most up-to-date scientific breakthroughs from around the world, with cutting-edge research and advice on achieving practical immortality in this lifetime. Gupta's advice is often counterintuitive: longevity is not about eating well, but about eating less; nutritional supplements are a waste of your money; eating chocolate and drinking coffee can make you healthier. *Chasing Life* tells the stories behind the breakthroughs while also revealing the practical steps readers can take to help extend youth and life far longer than ever thought possible.
