While trying to obtain the coordinates of a secret, peril-packed, but potentially beneficial trade route, a novice Jedi is killed—and the motive for his murder remains shrouded in mystery. Now his former Master, Jedi archivist Mander Zuma, wants answers, even as he fights to erase doubts about his own abilities as a Jedi. What Mander gets is immersion into the perilous underworld of the Hutts as he struggles to stay one step ahead in a game of smugglers, killers, and crime lords bent on total control.

The Ultimate History of Video Games, Volume 2 Steven L. Kent, 2021-08-24 The definitive behind-the-scenes history of video games' explosion into the twenty-first century and the war for industry power "A zippy read through a truly deep research job. You won't want to put this one down."—Eddie Adlum, publisher, RePlay Magazine As video games evolve, only the fittest companies survive. Making a blockbuster once cost millions of dollars; now it can cost hundreds of millions, but with a \$160 billion market worldwide, the biggest players are willing to bet the bank. Steven L. Kent has been playing video games since Pong and writing about the industry since the Nintendo Entertainment System. In volume 1 of *The Ultimate History of Video Games*, he chronicled the industry's first thirty years. In volume 2, he narrates gaming's entrance into the twenty-first century, as Nintendo, Sega, Sony, and Microsoft battle to capture the global market. The home console boom of the '90s turned hobby companies like Nintendo and Sega into Hollywood-studio-sized business titans. But by the end of the decade, they would face new, more powerful competitors. In boardrooms on both sides of the Pacific, engineers and executives began, with

enormous budgets and total secrecy, to plan the next evolution of home consoles. The PlayStation 2, Nintendo GameCube, and Sega Dreamcast all made radically different bets on what gamers would want. And then, to the shock of the world, Bill Gates announced the development of the one console to beat them all—even if Microsoft had to burn a few billion dollars to do it. In this book, you will learn about • the cutthroat environment at Microsoft as rival teams created console systems • the day the head of Sega of America told the creator of Sonic the Hedgehog to “f**k off” • how “lateral thinking with withered technology” put Nintendo back on top • and much more! Gripping and comprehensive, *The Ultimate History of Video Games: Volume 2* explores the origins of modern consoles and of the franchises—from Grand Theft Auto and Halo to Call of Duty and Guitar Hero—that would define gaming in the new millennium.

Video Game Spaces Michael Nitsche, 2008-12-05 An exploration of how we see, use, and make sense of modern video game worlds. The move to 3D graphics represents a dramatic artistic and technical development in the history of video games that suggests an overall transformation of games as media. The experience of space has become a key element of how we understand games and how we play them. In *Video Game Spaces*, Michael Nitsche investigates what this shift means for video game design and analysis. Navigable 3D spaces allow us to crawl, jump, fly, or even teleport through fictional worlds that come to life in our imagination. We encounter these spaces through a combination of perception and interaction. Drawing on concepts from literary studies, architecture, and cinema, Nitsche argues that game spaces can evoke narratives because the player is interpreting them in order to engage with them. Consequently,

Nitsche approaches game spaces not as pure visual spectacles but as meaningful virtual locations. His argument investigates what structures are at work in these locations, proceeds to an in-depth analysis of the audiovisual presentation of gameworlds, and ultimately explores how we use and comprehend their functionality. Nitsche introduces five analytical layers—rule-based space, mediated space, fictional space, play space, and social space—and uses them in the analyses of games that range from early classics to recent titles. He revisits current topics in game research, including narrative, rules, and play, from this new perspective. *Video Game Spaces* provides a range of necessary arguments and tools for media scholars, designers, and game researchers with an interest in 3D game worlds and the new challenges they pose.

Exhibiting Atrocity Amy Sodaro, 2018-01-23 Today, nearly any group or nation with violence in its past has constructed or is planning a memorial museum as a mechanism for confronting past trauma, often together with truth commissions, trials, and/or other symbolic or material reparations. *Exhibiting Atrocity* documents the emergence of the memorial museum as a new cultural form of commemoration, and analyzes its use in efforts to come to terms with past political violence and to promote democracy and human rights. Through a global comparative approach, Amy Sodaro uses in-depth case studies of five exemplary memorial museums that commemorate a range of violent pasts and allow for a chronological and global examination of the trend: the U.S. Holocaust Memorial Museum in Washington, DC; the House of Terror in Budapest, Hungary; the Kigali Genocide Memorial Centre in Rwanda; the Museum of Memory and Human Rights in Santiago, Chile; and the National September 11 Memorial Museum in New York. Together, these case studies illustrate the historical emergence and global spread of the memorial museum

and show how this new cultural form of commemoration is intended to be used in contemporary societies around the world.

Game Feel Steve Swink, 2008-10-13 Game Feel exposes feel as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks whe

SlutWalk K. Mendes, 2015-06-30 SlutWalk explores representations of the global anti-rape movement of the same name, in mainstream news and feminist blogs around the world. Affective Justice Kamari Maxine Clarke, 2019-11-15 Since its inception in 2001, the International Criminal Court (ICC) has been met with resistance by various African states and their leaders, who see the court as a new iteration of colonial violence and control. In *Affective Justice* Kamari Maxine Clarke explores the African Union's pushback against the ICC in order to theorize affect's role in shaping forms of justice in the contemporary period. Drawing on fieldwork in The Hague, the African Union in Addis Ababa, sites of postelection violence in Kenya, and Boko Haram's circuits in Northern Nigeria, Clarke formulates the concept of affective justice—an emotional response to competing interpretations of justice—to trace how affect becomes manifest in judicial practices. By detailing the effects of the ICC's all-African

indictments, she outlines how affective responses to these call into question the objectivity of the ICC's mission to protect those victimized by violence and prosecute perpetrators of those crimes. In analyzing the effects of such cases, Clarke provides a fuller theorization of how people articulate what justice is and the mechanisms through which they do so.

Comparative Constitutional Law Tom Ginsburg, Rosalind Dixon, 2011-01-01 This landmark volume of specially commissioned, original contributions by top international scholars organizes the issues and controversies of the rich and rapidly maturing field of comparative constitutional law. Divided into sections on constitutional design and redesign, identity, structure, individual rights and state duties, courts and constitutional interpretation, this comprehensive volume covers over 100 countries as well as a range of approaches to the boundaries of constitutional law. While some chapters reference the text of legal instruments expressly labeled constitutional, others focus on the idea of entrenchment or take a more functional approach. Challenging the current boundaries of the field, the contributors offer diverse perspectives - cultural, historical and institutional - as well as suggestions for future research. A unique and enlightening volume, *Comparative Constitutional Law* is an essential resource for students and scholars of the subject.

Courbet and the Modern Landscape, 2006 With its fittingly dramatic design, *Courbet and the Modern Landscape* accompanies the first major museum exhibition specifically to address Gustave Courbet's extraordinary achievement in landscape painting. Many of these carefully selected works produced from 1855 to 1876--gathered from Asia, Europe, and North America--will be new to readers. The catalogue--

which accompanies an exhibition at the Getty Museum to be held from February 21 to May 14, 2006--highlights the artist's expressive responses to the natural environment. Essays by the curators examine Courbet's distinctly modern practice of landscape painting. Mary Morton's essay situates his landscapes in relation to his work in other genres, his critical reputation, and his role in establishing a new pictorial language for landscape painting. Charlotte Eyerman's essay investigates how later generations of nineteenth- and twentieth-century artists responded to Courbet's example. The catalogue also includes an essay by Dominique de Font-Reaulx, curator of photographs at the Musee d'Orsay, on the relationship between Courbet's work and landscape photography of the 1850s and 1860s. Gender, Judging and the Courts in Africa J. Jarpa Dawuni,2021-11-29 Women judges are playing increasingly prominent roles in many African judiciaries, yet there remains very little comparative research on the subject. Drawing on extensive cross-national data and theoretical and empirical analysis, this book provides a timely and broad-ranging assessment of gender and judging in African judiciaries. Employing different theoretical approaches, the book investigates how women have fared within domestic African judiciaries as both actors and litigants. It explores how women negotiate multiple hierarchies to access the judiciary, and how gender-related issues are handled in courts. The chapters in the book provide policy, theoretical and practical prescriptions to the challenges identified, and offer recommendations for the future directions of gender and judging in the post-COVID-19 era, including the role of technology, artificial intelligence, social media, and institutional transformations that can help promote women's rights. Bringing together specific cases from Kenya, Uganda, Ghana, Nigeria, Zambia, Tanzania, and South Africa and regional bodies such as ECOWAS and the African Commission on Human and Peoples' Rights, and covering a broad range of thematic reflections, this book will be of interest to scholars, students, and

practitioners of African law, judicial politics, judicial training, and gender studies. It will also be useful to bilateral and multilateral donor institutions financing gender-sensitive judicial reform programs, particularly in Africa.

Reconciliation Through Truth Kader Asmal, Louise Asmal, Ronald Suresh Roberts, 1997 The new South Africa has established the Truth and Reconciliation Commission as a mechanism to ensure a collective coming to grips with the apartheid system. The South African transition, while widely billed as a miracle, has not yet received the same systematic treatment as political transitions elsewhere. This book, written by active participants in the new democracy and in the anti-apartheid movement that preceded it, presents for the first time the new country's view of its old self. It supplies a valuable road map of the key issues and debates of the transition.

Transformation and Legitimation in Post-apartheid Universities Dionne van Reenen, J.C. van der Merwe, 2016-07-01 Two decades after the democratic transition, South African universities are in turmoil. Whilst the old is slowly becoming unhinged, reimagining the new is protracted and contested. The challenges ahead, including a funding crunch, are formidable and bear the imprint of South African postcolonial specificities and global transformations in higher education. At this moment, critical and engaged socio-historical scholarship is indispensable. *Transformation and Legitimation in Post-apartheid Universities: Reading discourses from Reitz* is such a work. Revisiting the notorious Reitz incident of 2008, when a satirical video made by students from the University of the Free State (UFS) to register their resistance to the racial integration of black' students into historically white' residences became public, the text offers an analysis of the broader cultural and socio-political context that constituted the conditions of possibility for the incident and its aftermath. Attention is shifted from the principal actors in the original drama a handful of students and workers to a critical interrogation of the broader structures, positions, discourses and practices that fed into the 'Reitz incident', reaching into the present with violent and racially-charged student and worker protests in 2016. Van der Merwe and Van Reenen deliver a theoretically-rich analysis of the anatomy of current contestations about race and transformation in higher education in South Africa, the resultant legitimation crisis facing the UFS and South African universities more generally, as well as ways to restore institutional legitimacy and reputation, focusing on instituting deeper, more durable change that unlocks the promise of democracy. Dr Irma du Plessis University of Pretoria

Confronting Corruption Jeremy Pope, 2000 The first version of this Source Book argued the case for a National Integrity System, an holistic approach to transparency and accountability and embracing a range of accountability pillars, democratic, judicial, media and civil society. The expression has since passed into common usage in development circles, and the argument for an holistic approach to anti-corruption efforts has similarly achieved a widespread consensus. The fight against corruption is not wholly a moral one, in the sense that it is a struggle against the intrinsic evil of corruption. Certainly there is a moral element - and one which cuts across all major religions and societies throughout the world. But the compelling reason for the struggle is the suffering and deprivation corruption brings to whole societies, and to the world's most poor. It is concern for the latter, rather than a distaste for the corrupt and their deeds, that rightly drives the global movement against corruption.
