The Business of Opera Anastasia Belina-Johnson,Derek B. Scott,2016-03-23 The study of the business of opera has taken on new importance in the present harsh economic climate for the arts. This book presents research that sheds new light on a range of aspects concerning marketing, audience development, promotion, arts administration and economic issues that beset professionals working in the opera world. The editors' aim has been to assemble a coherent collection of essays that engage with a single theme (business), but differ in topic and critical perspective. The collection is distinguished by its concern with the business of opera here and now in a globalized market. This includes newly commissioned operas, sponsorship, state funding, and production and marketing of historic operas in the twenty-first century.

Research Reporting Series ,1978

The Cambridge Companion to Shakespeare on Stage Stanley Wells,Sarah Stanton,2002-05-30 This

Companion is designed for readers interested in past and present productions of Shakespeare's plays, both in and beyond Britain. The first six chapters describe aspects of the British performing tradition in chronological sequence, from the early staging of Shakespeare's own time, through to the present day. Each relates Shakespearean developments to broader cultural concerns and adopts an individual approach and focus, on textual adaptation, acting, stages, scenery or theatre management. These are followed by three explorations of acting: tragic and comic actors and women performers of Shakespeare roles. A section on international performance includes chapters on interculturalism, on touring companies and on political theatre, with separate accounts of the performing traditions of North America, Asia and Africa. Over forty pictures illustrate performers and productions of Shakespeare from around the world. An amalgamated list of items for further reading completes the book.

River. Space. Design Martin Prominski, Antje Stokman, Daniel Stimberg, Hinnerk Voermanek, Susanne Zeller, Katarina Bajc, Nengshi Zheng, 2023-03-20
Urban riverbanks are attractive locations and highly prized recreational environments. However, they must meet the requirements of flood control, open space design and ecology at the same time, often a challenging task for the designer. This book is the product of extensive research that identified some 60 best-practice examples and subjected them to a comparative analysis. The result is a systematic catalog of effective strategies and innovative design tools that

provides readers with an inspiring overview of the broad spectrum of design possibilities for river spaces. Each project is illustrated with photographs taken especially for the book and each design strategy and tool is explained by diagrams. This revised edition introduces ten new case studies chiefly from North America.

Soil Survey ,1979

Greek and Latin Literature of the Roman Empire
Albrecht Dihle,2013-02-01 Professor Dihle sees the Greek and Latin literature between the 1st century B.C. and the 6th century A.D. as an organic progression. He builds on Schlegel's observation that art, customs and political life in classical antiquity are inextricably entwined and therefore should not be examined separately. Dihle does not simply consider narrowly defined 'literature', but all works of cultural socio-historical significance, including Jewish and Christian literature, philosophy and science. Despite this, major authors like Seneca, Tacitus and Plotinus are considered individually. This work is an authoritative yet personal presentation of seven hundred years of literature.
