INSPIRE Handbook World Health Organization,2019-02-26 INSPIRE is a resource to help governments, international agencies, and non-government organisations prevent and respond to violence against children. It was developed by 10 international and U.S.-based agencies and includes strategy documents and implementation tools. This handbook provides guidance on how to choose and implement interventions based on specific needs and context, and is organised around the 7 key INSPIRE strategies: implementation and enforcement of laws; norms and values; safe environments; parent and caregiver support; income and economic strengthening; response and support services; and education and life skills. The handbook also provides an overview of implementation and impact indicators, drawn from the companion document 'INSPIRE indicator guidance and results framework'.

OECD SME and Entrepreneurship Outlook 2019 OECD,2019-05-20 The new OECD SME and Entrepreneurship Outlook presents the latest trends in performance of small and medium-sized enterprises (SMEs) and provides a comprehensive overview of business conditions and policy frameworks for SMEs and entrepreneurs. This year's edition provides comparative evidence on business dynamism, productivity growth, wage gaps and export trends by firm size across OECD countries and emerging economies.

Applied Pedagogies for Higher Education Dawn A. Morley,Md Golam Jamil,2020-11-05 This open access book critiques real world learning across both the curriculum and extracurricular activities. Drawing on disciplines as diverse as business, health, fashion, sociology and geography, the editors and authors employ a cross-disciplinary approach to examine how this concept is being applied in higher education. Divided into three parts, the authors and contributors analyse broader applications of real world learning, student experience of practicing in a real world setting, and how learning strategies can be employed to engage students in real world learning. The editors and contributors provide up-to-date, cross-disciplinary and international insights into how real world learning could be integrated into the higher education curriculum to support effective, relevant and life-long learning for 21st century students.

Implementation of modern science and practice ,2021-05-10 Abstracts of XXV International Scientific and Practical Conference

The European Armed Forces in Transition Franz Kernic,Paul Klein,Karl W. Haltiner,2005 This book focuses on the current reform processes of the armed forces and the recent development of civil-military relations in Europe. Major trends in the development of modern military organizations are examined in detail. The spectrum of the analysis ranges from the abolition of the draft in most European countries to aspects of the organizational design of today's military organizations, the multicultural and multinational framework of future military missions, and the so-called process of «feminization» of military units. The analysis is based on a number of case studies (e.g., Belgium, France, Germany, Slovenia, Spain, the Netherlands, etc.) and is primarily descriptive and comparative.

Higher Education in Turmoil Jane Knight,2008-01-01 Internationalization is a pervasive force shaping and challenging higher education as it faces the new realities and turbulence of globalization. In a thoughtful and provocative way, this book provides a critical perspective on the rationales, benefits, risks, strategies, and outcomes of internationalization.

Innovations in Industrial Engineering José Machado,Filomena Soares,Justyna Trojanowska,Vitalii Ivanov,2021-06-23 This book covers a variety of topics in the field of industrial engineering, with a special focus on research and industrial applications aimed at both improving quality of processes and products and contributing to a sustainable economy. Based on a set of papers presented at the 1st International Conference “Innovation in Engineering”, ICIE, held in Guimarães, Portugal, on June 28-30, 2021, it focuses on innovative technologies associated with and strategies for the development of Industry 4.0. The chapters discuss new ways to improve industrial production and supply chain management by applying mathematical and computational methods. They also cover important issues relating to sustainability, education, and collaborations between industry and universities, and national developments. This book, which belongs to a three-volume set, provides engineering researchers and professionals with a timely overview and extensive information on trends and technologies behind the current and future developments of Industry 4.0.

Standards for K-12 Engineering Education? National Research Council,Committee on Standards for K-12 Engineering Education,2010-10-28 The goal of this study was to assess the value and feasibility of developing and implementing content standards for engineering education at the K-12 level. Content standards have been developed for three disciplines in STEM education-science, technology, and mathematics-but not for engineering. To date, a small but growing number of K-12 students are being exposed to engineering-related materials, and limited but intriguing evidence suggests that engineering education can stimulate interest and improve learning in mathematics and science as well as improve understanding of engineering and technology. Given this background, a reasonable question is whether standards would improve the quality and increase the amount of teaching and learning of engineering in K-12 education. The book concludes that, although it is theoretically possible to develop standards for K-12 engineering education, it would be extremely difficult to ensure their usefulness and effective implementation. This conclusion is supported by the following findings: (1) there is relatively limited experience with K-12 engineering education in U.S. elementary and secondary schools, (2) there is not at present a critical mass of teachers qualified to deliver engineering instruction, (3) evidence regarding the impact of standards-based educational reforms on student learning in other subjects, such as mathematics and science, is inconclusive, and (4) there are significant barriers to introducing stand-alone standards for an entirely new content area in a curriculum already burdened with learning goals in more established domains of study.

MODERN APPROACHES TO THE INTRODUCTION OF SCIENCE INTO PRACTICE ,2020-03-30 Abstracts of X International Scientific and Practical Conference

Intercultural Competence in Higher Education Darla K. Deardorff,Lily A. Arasaratnam-Smith,2017-07-20 Intercultural Competence in Higher Education features the work of scholars and international education practitioners in understanding the learning outcomes of internationalization, moving beyond rhetoric to concrete practice around the world. Devoted exclusively to exploring the central learning outcomes of internationalization efforts, this edited volume contains a refreshing combination of chapters and case studies from interdisciplinary and cross-cultural contributors, including: cutting-edge issues within intercultural competence development, such as intersectionality, mapping intercultural competence, and assessment; the role of higher education in developing intercultural competence for peacebuilding in the aftermath of violent conflict; facilitating intercultural competence through international student internships; interdisciplinary and cross-cultural contributions from over 19 countries including Japan, Russia, Serbia, South Africa, and Vietnam; the latest research and thinking on global, intercultural, and international learning outcomes, with a unique emphasis on newer voices. Intercultural competence has become an essential element in international as well as domestic education. This text provides the latest thinking and research within the context of internationalization, presents practical case studies on how to integrate this into the preparation of global-ready students and will be of interest to postgraduate students, international education

administrators, and practitioners, as well as scholars and researchers in a variety of disciplines who have an interest in intercultural and global competence.

Out-thinking Organizational Communications Joachim Klewes,Dirk Popp,Manuela Rost-Hein,2016-09-02 This book demonstrates the challenges for Corporate Communications in the era of the Industrial Internet and the Internet of things, and how companies can adapt their communication strategies to meet them. The Industrial Internet and the Internet of Things herald a transformation in our economy, industry and society. As such, it is high time that companies adjust both their communication strategies and the structure of their communications to reflect these changes. In this book, experts from the corporate world, academia, professional associations, government organizations and NGOs discuss various challenges – from Corporate and Leadership Communication and Employer Branding to Change/Personnel Management and changes in the supply chain – that can be confronted in everyday working environment. Revealing contributions from an interdisciplinary mix of perspectives help offer a more detailed picture of what future programs and standards might look like. The book also features best practice cases that offer practical insights into addressing the Corporate Communications challenges that are to come.

Key Concepts in Adult Education and Training Malcolm Tight,2012-11-12 As adults, we are all continually involved in learning, with increasing numbers of us engaged in more formalized forms of learning; that is, in education or training. All those involved in the broad field of adult education and training will come into contact with many specialist ideas or concepts. It is often assumed of students that they already have a general understanding of these concepts, their meanings, applicability and inter-relationships. This is not always the case. This book examines in detail over forty of these key concepts, ranging from community education and experiential learning to competence and access. It presents a clear, analytical discussion in jargon-free language. It is, therefore, indispensable to all students and practitioners of adult education and training.

Immigrants Philippe Legrain,2014-09-28 Immigration divides our globalizing world like no other issue. We are swamped by illegal immigrants and infiltrated by terrorists, our jobs stolen, our welfare system abused, our way of life destroyed--or so we are told. At a time when National Guard units are deployed alongside vigilante Minutemen on the U.S.-Mexico border, where the death toll in the past decade now exceeds 9/11's, Philippe Legrain has written the first book about immigration that looks beyond the headlines. Why are ever-rising numbers of people from poor countries arriving in the United States, Europe, and Australia? Can we keep them out? Should we even be trying? Combining compelling firsthand reporting from around the world, incisive socioeconomic analysis, and a broad understanding of what's at stake politically and culturally, *Immigrants* is a passionate but lucid book. In our open world, more people will inevitably move across borders, Legrain says--and we should generally welcome them. They do the jobs we can't or won't do--and their diversity enriches us all. Left and Right, free marketeers and campaigners for global justice, enlightened patriots--all should rally behind the cause of freer migration, because They need Us and We need Them.

Rethinking Multiculturalism Bhikhu Parekh,2017-09-16 This important and much acclaimed book rapidly became a classic on first publication. In it, Bhikhu Parekh shows that the Western tradition of political philosophy has very limited theoretical resources to cope with cultural diversity. He then discusses how it can be revised and what new conceptual tools are needed. The core of the book addresses the important theoretical questions raised by contemporary multicultural society, especially the nature and limits of intercultural equality and fairness, national identity, citizenship, and cross-cultural political discourse. The new second edition includes a substantial additional chapter addressing key issues.

The Famine of 1932-1933 in Ukraine Stanislav Kulchytsky,2018-09-15 A distilled account of famine incorporating new sources during the past three decades.
