SILENCE OR FIGHT? MOXIAN LIU, 2016-10-17 As the first text to focus on the phenomenon of false recruitment running rampant in Mainland China, this book argues the occurrence of this kind of phenomenon is the result of the tacit coordination among frauds, job seekers, media, and even law enforcers. In other words, the obvious deviant group made up of frauds, together with other more hidden deviant groups, co-exists in the phenomenon of false recruitment. The deviant behaviors of these groups all have a collective property, as well as interact and reinforce each other in the process of their direct or indirect interactions, which then continuously construct the more macro collective deviant phenomenon of false recruitment. Finally, with an eye to future governance practice, the author concludes that it should build up the mode of participatory governance for false recruitment in order to weaken or even eliminate its social roots.
