Advanced Intelligent Computing Technology and Applications

De-Shuang Huang, Prashan

Premaratne, Baohua Jin, Boyang Qu, Kang-Hyun Jo, Abir Hussain, 2023-07-30 This three-volume set of LNCS 14086, LNCS 14087 and LNCS 14088 constitutes - in conjunction with the double-volume set LNAI 14089-14090- the refereed proceedings of the 19th International Conference on Intelligent Computing, ICIC 2023, held in Zhengzhou, China, in August 2023. The 337 full papers of the three proceedings volumes were carefully reviewed and selected from 828 submissions. This year, the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing. Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications. Therefore, the theme for this conference was Advanced Intelligent Computing Technology and Applications. Papers that focused on this theme were solicited, addressing theories, methodologies, and applications in science and technology.

Jinyue Yan, 2015-06-22 The Handbook of Clean Energy Systems brings together an international team of experts to present a comprehensive overview of the latest research, developments and practical applications throughout all areas of clean energy systems. Consolidating information which is currently scattered across a wide variety of literature sources, the handbook covers a broad range of topics in this interdisciplinary research field including both fossil and renewable energy systems. The development of intelligent energy systems for efficient energy processes and mitigation technologies for the reduction of environmental pollutants is explored in depth, and environmental, social and economic impacts are also addressed. Topics covered include: Volume 1 - Renewable Energy: Biomass resources and biofuel production; Bioenergy Utilization; Solar Energy; Wind Energy; Geothermal Energy; Tidal Energy. Volume 2 - Clean Energy Conversion Technologies: Steam/Vapor Power Generation; Gas Turbines Power Generation; Reciprocating Engines; Fuel Cells; Cogeneration and Polygeneration. Volume 3 - Mitigation Technologies: Carbon Capture; Negative Emissions System; Carbon Transportation; Carbon Storage; Emission Mitigation Technologies;

Efficiency Improvements and Waste Management; Waste to Energy. Volume 4 - Intelligent Energy Systems: Future Electricity Markets; Diagnostic and Control of Energy Systems; New Electric Transmission Systems; Smart Grid and Modern Electrical Systems; Energy Efficiency of Municipal Energy Systems; Energy Efficiency of Industrial Energy Systems; Consumer Behaviors; Load Control and Management; Electric Car and Hybrid Car; Energy Efficiency Improvement. Volume 5 - Energy Storage: Thermal Energy Storage; Chemical Storage; Mechanical Storage; Electrochemical Storage; Integrated Storage Systems. Volume 6 - Sustainability of Energy Systems: Sustainability Indicators, Evaluation Criteria, and Reporting; Regulation and Policy; Finance and Investment; Emission Trading; Modeling and Analysis of Energy Systems; Energy vs. Development; Low Carbon Economy; Energy Efficiencies and Emission Reduction. Key features: Comprising over 3,500 pages in 6 volumes, HCES presents a comprehensive overview of the latest research, developments and practical applications throughout all areas of clean energy systems, consolidating a wealth of information which is currently scattered across a wide variety of literature sources. In addition to renewable energy systems, HCES also covers processes for the efficient and clean conversion of traditional fuels such as coal, oil and gas, energy storage systems, mitigation technologies for the reduction of environmental pollutants, and the development of intelligent energy systems. Environmental, social and economic impacts of energy systems are also addressed in depth.

Published in full colour throughout. Fully indexed with cross referencing within and between all six volumes. Edited by leading researchers from academia and industry who are internationally renowned and active in their respective fields. Published in print and online. The online version is a single publication (i.e. no updates), available for one-time purchase or through annual subscription.

Economics of Means-Tested Transfer Programs in the United States, Volume II Robert A.

Moffitt, 2016-11-18 Few government programs in the United States are as controversial as those designed to help the poor. From tax credits to medical assistance, the size and structure of the American safety net is an issue of constant debate. These two volumes update the earlier Means-Tested Transfer Programs in the United States with a discussion of the many changes in means-tested government programs and the results of new research over the past decade. While some programs that experienced falling outlays in the years prior to the previous volume have remained at low levels of expenditure, many others have grown, including Medicaid, the Earned Income Tax Credit, the Supplemental Nutrition Assistance Program, and subsidized housing programs. For each program, the contributors describe its origins and goals, summarize its history and current rules, and discuss recipients' characteristics and the types of benefits they receive. This is an invaluable reference for researchers and policy makers that features detailed analyses of many of the most important transfer programs in the United

States.

Structural Design for the Stage Alys

Holden, Bronislaw Sammler, Bradley L Powers, Steven A Schmidt, 2015-02-20 The follow-up to the 2000 Golden Pen Award-winning Structural Design for the Stage, this second edition provides the theater technician with a foundation in structural design, allowing an intuitive understanding of why sets stand up. It introduces the basics of statics and the study of the strength of materials as they apply to typical scenery, emphasizing conservative approaches to real world examples. This is an invaluable reference for any serious theatre technician throughout their career, from the initial study of the fundamental concepts, to the day-to-day use of the techniques and reference materials. Now in hardcover, with nearly 200 new pages of content, it has been completely revised and updated to reflect the latest recommended practices of the lumber and steel industries, while also including aluminum design for the first time.

Learning Statistics with R Daniel

Navarro, 2013-01-13 Learning Statistics with R covers the contents of an introductory statistics class, as typically taught to undergraduate psychology students, focusing on the use of the R statistical software and adopting a light, conversational style throughout. The book discusses how to get started in R, and gives an introduction to data manipulation and writing scripts. From a statistical perspective, the book discusses descriptive statistics and graphing first, followed by chapters on probability theory, sampling and estimation, and null hypothesis testing. After introducing the theory, the book covers the analysis of contingency tables, t-tests, ANOVAs and regression. Bayesian statistics are covered at the end of the book. The papers deal with topics such as computer vision; machine learning; deep neural networks; reinforcement learning; object recognition; image classification; image processing; object detection; semantic segmentation; human pose estimation; 3d reconstruction; stereo vision; computational photography; neural networks; image coding; image reconstruction; object recognition; motion estimation.

Building Services Engineering David V. Chadderton, 2007-04-11 Updated and expanded, this core textbook introduces the range of building services found within modern buildings. In this fifth edition coverage has been broadened as a response to the trend towards low energy mechanical services systems for the heating and cooling of buildings. New chapters have been included on mechanical transportation and on understanding units. Now accompanied by a new instructor's resource, it is extensively

illustrated with fully worked examples of all numerical problems and student-centred problems, complemented by full answers. Suitable for distance learning and with a broad international applicability, Building Services Engineering provides for the higher education of building industry professionals, whether on higher certificate, higher diploma, undergraduate courses or graduate level conversion courses, across the building technology, architectural, surveying and services engineering disciplines.

The Moral Animal Robert Wright, 1995-08-29 One of the most provocative science books ever published—a feast of great thinking and writing about the most profound issues there are (The New York Times Book Review). Fiercely intelligent, beautifully written and engrossingly original. —The New York Times Book Review Are men literally born to cheat? Does monogamy actually serve women's interests? These are among the questions that have made *The Moral Animal* one of the most provocative science books in recent years. Wright unveils the genetic strategies behind everything from our sexual preferences to our office politics—as well as their implications for our moral codes and public policies. Illustrations.

ECAI 2020 G. De Giacomo, A. Catala, B. Dilkina, 2020-09-11 This book presents the proceedings of the 24th European Conference on Artificial Intelligence (ECAI 2020), held in Santiago de Compostela, Spain, from 29 August to 8

September 2020. The conference was postponed from June, and much of it conducted online due to the COVID-19 restrictions. The conference is one of the principal occasions for researchers and practitioners of AI to meet and discuss the latest trends and challenges in all fields of AI and to demonstrate innovative applications and uses of advanced AI technology. The book also includes the proceedings of the 10th Conference on Prestigious Applications of Artificial Intelligence (PAIS 2020) held at the same time. A record number of more than 1,700 submissions was received for ECAI 2020, of which 1,443 were reviewed. Of these, 361 full-papers and 36 highlight papers were accepted (an acceptance rate of 25% for full-papers and 45% for highlight papers). The book is divided into three sections: ECAI full papers; ECAI highlight papers; and PAIS papers. The topics of these papers cover all aspects of AI, including Agent-based and Multi-agent Systems; Computational Intelligence; Constraints and Satisfiability; Games and Virtual Environments; Heuristic Search; Human Aspects in AI; Information Retrieval and Filtering; Knowledge Representation and Reasoning; Machine Learning; Multidisciplinary Topics and Applications; Natural Language Processing; Planning and Scheduling; Robotics; Safe, Explainable, and Trustworthy AI; Semantic Technologies; Uncertainty in AI; and Vision. The book will be of interest to all those whose work involves the use of AI technology.

Praying with Purpose Stephen Nelson Rummage,
Many Christians crave something more from their prayer time. We pray knowing that God hears and

answers our prayers, but we also know that prayer should be something more than recited phrases and personal wish lists. God wants prayer to become vital to everything we do. Using Scripture passages, applications, and a prayer guide, *Praying with Purpose* is a five-week study designed to teach believers how to pray without ceasing. Perfect for church use, small groups, or individual study.

Age as Disease David-Jack Fletcher, 2021-03-21
Age as Disease explores the foundations of gerontology as a discipline to examine the ways contemporary society constructs old age as a disease-state. Framed throughout as 'gerontological hygiene', this book examines contemporary regimes, strategies and treatment protocols deployed throughout Australia, the United States, and the United Kingdom. The book deploys critical cultural theories such as biopolitics, somatechnics, ethics, and governmentality to examine how anti-aging technologies operate to problematise the aging body as always-already diseased, and how these come to constitute a movement of abolition, named here as 'gerontological hygiene'.

The Clinician's Guide to Alcohol Moderation

Cyndi Turner, 2020-03-16 The Clinician's Guide to Alcohol Moderation examines alcohol use around the world and teaches a range of behavioral health care providers how to help clients practice alcohol moderation. Excavating the current treatments available for alcohol moderation, the book offers step-by-step processes of engaging clients and their families, self-assessments, and alcohol moderation tools. In addition to using it in conjunction with Practicing Alcohol Moderation: A Comprehensive Workbook, readers would benefit from the Alcohol Moderation Assessment which predicts who may be able to successfully drink in moderation as well as developing and monitoring an Alcohol Moderation Plan. The text uses recognized alcohol moderation resources throughout the world as well as real-life case studies to address typical clinician, client, and family member questions. It challenges the traditional recommendation that drinkers experiencing problems are "alcoholics." This guide is a resource for all who overdrink or know people who struggle with their alcohol use. Through its medium, a broad range of health care providers receive a step-by-

step process on how to practice alcohol moderation, how to put tools into practice, case examples, and answers to the most commonly asked questions.
