Movie Love in the Fifties James Harvey, 2001 From the author of *Romantic Comedy* (brilliant, meticulous, a monumental work of scholarship --Margo Jefferson, New York Times), a fresh, illuminating look at the films of the 1950s. Harvey begins by mapping the progression from 1940s film noir to the living-room melodramas of the 1950s. He shows us the femme fatale of the 1940s (Barbara Stanwyck, Joan Bennett) becoming blander and blonder (Doris Day, Debbie Reynolds) and younger and more traditionally sexy (Marilyn Monroe, Grace Kelly) in the 1950s. And he shows us how women were finally replaced as objects of desire by the new boy-men--Clift, Brando, Dean, and other rebels without causes. Harvey discusses the films of Hitchcock (Vertigo), Ophuls (The Reckless Moment), Siodmak (Christmas Holiday), and Welles (Touch of Evil, perhaps the single greatest influence on the post-classical movies). He writes about the quintessential 1950s directors: Nicholas Ray, who made movies in the old Hollywood tradition (In a Lonely Place, Johnny Guitar), and Douglas Sirk, who portrayed suburbia as an emotional deathtrap (Imitation of Life, Magnificent Obsession). And he discusses the serious directors, such as Stanley Kramer and Elia Kazan, whose films exhibited powerful new realism. Comprehensive, insightful, written with intelligence, humor, and affection, *Movie Love in the Fifties* is a masterful work of American film, and cultural, history.

Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa’s talking drums to the invention of written alphabets; from the electronic transmission of code to the origins of information theory, into the new information age and the current deluge of news, tweets, images, and blogs. The Democratization of Artificial Intelligence Andreas Sudmann, 2019-10-31 After a long time of neglect, Artificial Intelligence is once again at the center of most of our political, economic, and socio-cultural debates. Recent advances in the field of Artificial Neural Networks have led to a renaissance of dystopian and utopian speculations on an AI-rendered future. Algorithmic technologies are deployed for identifying potential terrorists through vast surveillance networks, for producing sentencing guidelines and recidivism risk profiles in criminal justice systems, for demographic and psychographic targeting of bodies for advertising or propaganda, and more generally for automating the analysis of language, text, and images. Against this background, the aim of this book is to discuss the heterogeneous conditions, implications, and effects of modern AI and Internet technologies in terms of their political dimension: What does it mean to critically investigate efforts of net politics in the age of machine learning algorithms?

Buster Keaton Imogen Sara Smith, 2008-09-01 Smith tells of the most dazzling and enigmatic of the silent clowns, a man who began his career in vaudeville as one-third of the Three Keatons at age four only to fall from grace with shattering swiftness in the early 1930s before eventually making a comeback on television in the 1950s.

Post Memes Daniel Bristow, Alfie Bown, 2019 Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, trololololol, mode of critique, mode of production, means of politicisation, even of subjectivation - memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticals alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. *POST MEMES: SEIZING THE MEMES OF PRODUCTION* takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. With contributions from Scott and McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon. *ABOUT THE EDITORS* ALFIE BOWN is the author of several books including *The Playstation Dreamworld* (Polity, 2017) and *In the Event of Laughter: Psychoanalysis, Literature and Comedy* (Bloomsbury, 2018). He is also a journalist for the Guardian, the Paris Review, and other outlets. DAN BRISTOW is a recovering academic, a bookseller, and author of *Joyce and Lacan: Reading, Writing, and Psychoanalysis* (Routledge, 2016)

and 2001: A Space Odyssey and Lacanian Psychoanalytic Theory (Palgrave, 2017). He is also the co-creator with Alfie Bown of Everyday Analysis, now based at New Socialist magazine.

The Postnormal Times Reader Ziauddin Sardar, 2019-01-01 <p>We live in a period of accelerating change. New trends, technologies and crisis emerge rapidly and transform familiar social and political landscapes. Established and cherished ideals, with deep historical roots, can be overturned overnight. Unconventional and uncommon notions and events can appear as though from nowhere, proliferate, and become dominant. The last few years alone have witnessed the emergence of populism and the far right in Europe and the US, Brexit, cracks in the European Union, cyber wars accompanied by the re-emergence of a cold war. China as an increasingly dominant new superpower. Pandemics like the Ebola and Zika viruses. Climate change leading to extreme weather events. Driverless cars. AI. 'Fake News'. 'Alternative Facts'. 'Post-Truth'. 'Disruptive technologies' that disrupt and often corrupt everything. Everything seems to be in a state of flux, nothing can be trusted. All that we regard as normal is melting away right before us.</p><p>
</p><p>The postnormal times theory attempts to make sense of a rapidly changing world, where uncertainty is the dominant theme and ignorance has become a valuable commodity. The Postnormal Times Reader is a pioneering anthology of writings on the contradictory, complex and chaotic nature of our era. It covers the origins, theory and methods of postnormal times; and examines a host of issues, ranging from climate change, governance, Middle East to religion and science, from the perspective of postnormal times. By mapping some of the key local and global issues of our transitional age, the Reader suggests a way of navigating our turbulent futures.</p>
