Photosynthesis Bibliography volume 13 1982 Zdenek Sesták,J. Catský,2013-11-11 The bibliography includes papers in all fields of photosynthesis research - from studies of model biochemical and biophysical systems of the photosynthetic mechanism to primary production studied by the so-called growth analysis. In addition to papers devoted entirely to photosynthesis, papers on other topics are included if they contain data on photosynthetic activity, photorespiration, chloroplast structure, chlorophyll and carotenoid synthesis and destruction, etc., or if they contain valuable methodological information (measurement of selected environmental factors, leaf area, etc.). In many branches it has been difficult to define the limits of interest for photosynthesis researchers. This problem has arisen e. g. in topics dealing with the transfer of gases, where - in addition to the papers on carbon dioxide transfer - some papers on water vapour transfer are included, these being of general application or bringing new approaches. On the other hand, many papers dealing with the anatomy and physiology of stomata have been omitted, if the aspect of carbon dioxide or water vapour exchange has not been discussed. This volume contains references to papers published in the year 1982, and similarly to preceding volumes also addenda including references published in the preceding period (i. e. 1966 to 1981). The numbers of the additional references are labelled with an asterisk (*) in the list of references.

Teaching to Complexity Mary Ann Cappiello,Erika Thulin Dawes,2014-11-01 As an important tool for instruction and text selection, Teaching to Text Complexity helps teachers learn to evaluate children's and young adult literature and informational text for quality and complexity to support rigorous literacy and content learning. In addition, this timely resource explores how instructional purpose shapes not only the kinds of curricular texts used, but also considers their complexity relative to readers. By offering a framework for text selection, this book helps teachers more deeply understand text complexity in today's standards as well as its importance when building and using text sets in the classroom and reading for different purposes.
