**Natalie Tan's Book of Luck and Fortune** Roselle Lim,2019-06-11 Lush and visual, chock-full of delicious recipes, Roselle Lim's magical debut novel is about food, heritage, and finding family in the most unexpected places. At the news of her mother's death, Natalie Tan returns home. The two women hadn't spoken since Natalie left in anger seven years ago, when her mother refused to support her chosen career as a chef. Natalie is shocked to discover the vibrant neighborhood of San Francisco's Chinatown that she remembers from her childhood is fading, with businesses failing and families moving out. She's even more surprised to learn she has inherited her grandmother's restaurant. The neighborhood seer reads the restaurant's fortune in the leaves: Natalie must cook three recipes from her grandmother's cookbook to aid her struggling neighbors before the restaurant will succeed. Unfortunately, Natalie has no desire to help them try to turn things around—she resents the local shopkeepers for leaving her alone to take care of her agoraphobic mother when she was growing up. But with the support of a surprising new friend and a budding romance, Natalie starts to realize that maybe her neighbors really have been there for her all along.

**The Computer - My Life** Konrad Zuse,1993-09-28 Konrad Zuse is one of the great pioneers of the computer age. He created the first fully automated, program controlled, freely programmable computer using binary floating-point calculation. It was operational in 1941. He built his first machines in Berlin during the Second World War, with bombs falling all around, and after the war he built up a company that was taken over by Siemens in 1967. Zuse was an inventor in the traditional style, full of phantastic ideas, but also gifted with a powerful analytical mind. Single-handedly, he developed one of the first programming languages, the Plan Calculus, including features copied only decades later in other languages. He wrote numerous books and articles and won many honors and awards. This is his autobiography, written in an engagingly lively and pleasant style, full of anecdotes, reminiscences, and philosophical asides. It traces his life from his childhood in East Prussia, through tense wartime experiences and hard times building up his business after the war, to a ripe old age and well-earned celebrity.

**Devlin's Luck** Patricia Bray,2007-12-18 A desperate man in a dying kingdom is awarded the most coveted—and most deadly—choice of all The once mighty kingdom of Jorsk is in decline, its borders beset by enemies, both worldly and otherworldly. The king has retreated to the capital, abandoning the far-flung provinces. The only hope of the people lies in their Chosen One, blessed by the gods as defender of the realm. But of late every Chosen One has died, targeted by the harshest of the enemy attacks. Only the most desperate of men now seek that post. Devlin Stonehand is a desperate man. Overwhelmed by grief at the death of his family, he has lost the will to live. But he has vowed to provide for his brother’s widow and children, and the post of the Chosen One carries with it a substantial reward. For Devlin, a farmer and metalsmith, it is the answer to his prayers—prayers that include a yearning for the oblivion of death. After he has won the post, though, Devlin discovers that sometimes the hardest goal to achieve is that which had once seemed the simplest. For unlike the other Chosen Ones, he persists in surviving. Are the gods just tormenting him further, or does he have a greater destiny than he imagined? Can a man who courts death ever truly come to embrace life?

*Knock on Wood* Jeffrey S. Rosenthal,2018-10-02 Jeffrey S. Rosenthal, author of the bestseller Struck by Lightning: The Curious World of Probabilities, was born on Friday the thirteenth, a fact that he discovered long after he had become one of the world’s pre-eminent statisticians. Had he been living ignorantly and innocently under an unlucky cloud for all those years? Or is thirteen just another number? As a scientist and a man of reason, Rosenthal has long considered the value of luck, good and bad, seeking to measure chance and hope in formulas scratched out on chalkboards. In Knock on Wood, with great humour and irreverence, Rosenthal divines the world of luck, fate and chance, putting his considerable scientific acumen to the test in deducing whether luck is real or the mere stuff of superstition.

Beginner's Luck Kate Clayborn,2023-11-28 IN PRINT FOR THE FIRST TIME FROM THE BESTSELLING AUTHOR OF GEORGIE, ALL ALONG! This whip-smart, witty, and romantic novel is the first in a trilogy about three friends who impulsively buy a lottery ticket, and never suspect the many ways their lives will change--or that for each of them, love will be the biggest win of all . . . Kit Averin is anything but a gambler. A scientist with a quiet, steady job at a university, Kit's focus has always been maintaining the acceptable status quo. A sudden windfall doesn't change that, with one exception: the fixer-upper she plans to buy, her first and only real home. It's more than enough to keep her busy, until an unsettlingly handsome, charming, and determined corporate recruiter shows up in her lab--and manages to work his way into her heart . . . Ben Tucker is surprised to find that the scientist he wants for his company's engineering division is a young woman--and a beautiful, sharp-witted one at that. Talking her into a big-money corporate position is harder than he expects, but he's willing to put in the time, especially when sticking around for the summer gives him a chance to reconnect with his dad. But the longer he stays, the more questions he has about his own future--and who might be in it. What begins as a chilly rebuff soon heats up into an attraction neither Kit nor Ben can deny--and finding themselves lucky in love might just be priceless . . .
