News Ombudsmen in North America Neil Nemeth, 2003-11-30 This book offers the most comprehensive look to date at the effort of about forty U.S. media organizations to make themselves more accountable. Nemeth provides a critical assessment of the ombudsmen's work from the ombudsmen themselves, their editors, media critics, and scholars.

Computational Linguistics and Intelligent Text Processing Alexander Gelbukh, 2018-03-20 The two-volume set LNCS 9623 + 9624 constitutes revised selected papers from the CICLing 2016 conference which took place in Konya, Turkey, in April 2016. The total of 89 papers presented in the two volumes was carefully reviewed and selected from 298 submissions. The book also contains 4 invited papers and a memorial paper on Adam Kilgarriff's Legacy to Computational Linguistics. The papers are organized in the following topical sections: Part I: In memoriam of Adam Kilgarriff; general formalisms; embeddings, language modeling, and sequence labeling; lexical resources and terminology extraction; morphology and part-of-speech tagging; syntax and chunking; named entity recognition; word sense disambiguation and anaphora resolution; semantics, discourse, and dialog. Part II: machine translation and multilingualism; sentiment analysis, opinion mining, subjectivity, and social media; text classification and categorization; information extraction; and applications.

Cultural Meanings of News Daniel A. Berkowitz, 2010-03-30 What is news? Why does news turn out like it does? What factors influence the creation, production, and dissemination of news? Cultural Meanings of News takes on these deceptively simple questions through an essential collection of seminal and contemporary studies by leaders in the fields of mass communication and media studies. Similar in format and purpose to editor Dan Berkowitz's award-winning Social Meanings of News, this new volume represents a conceptual update, a continuation of the discourse about the nature of news and how it comes to be, moving ideas ahead from the earlier tradition of sociological approaches to the more pervasive cultural perspectives that inform understandings about news. Cultural Meanings of News provides a carefully selected set of readings, organized into thematic areas that each probe a dimension of the literature: from sociological roots to cultural perspectives; news as narrative and cultural text; newswork as cultural ritual; news as cultural myth; news and its interpretive communities; news as a source and reflection of collective memory; toward the future of news research. This text-reader provides students and scholars with first-hand exposure to cultural approaches to the study of news, while also providing an organizing framework for understanding the commonalties and differences between threads in the research. The goals are to engage readers through guided immersion in the material.

About to Die Barbie Zelizer, 2010-12-01 Due to its ability to freeze a moment in time, the photo is a uniquely powerful device for ordering and understanding the world. But when an image depicts complex, ambiguous, or controversial events--terrorist attacks, wars, political assassinations--its ability to influence perception can prove deeply unsettling. Are we really seeing the world as it is or is the image a fabrication or projection? How do a photo's content and form shape a viewer's impressions? What do such images contribute to historical memory? About to Die focuses on one emotionally charged category of news photograph--depictions of individuals who are facing imminent death--as a prism for addressing such vital questions. Tracking events as wide-ranging as the 1906 San Francisco Earthquake, the Holocaust, the Vietnam War, and 9/11, Barbie Zelizer demonstrates that modes of journalistic depiction and the power of the image are immense cultural forces that are still far from understood. Through a survey of a century of photojournalism, including close analysis of over sixty photos, About to Die provides a framework and vocabulary for understanding the news imagery that so profoundly shapes our view of the world.

The American Journalist in the 1990s David H. Weaver, G. Cleveland Wilhoit, 2020-08-13 Who are U.S. journalists? What are their backgrounds and educational experiences? Why did they choose journalism as an occupation? What do they think about their work? What are their professional and ethical values? What kinds of work do they consider their best? Do men differ from women on these questions? Do ethnic and racial minorities differ from the majority? Do journalists working for different print and broadcast news media differ? This book uses findings from the most comprehensive and representative study ever done of the demographic and educational backgrounds, working conditions, and professional and ethical values of 1,410 U.S. print and broadcast journalists working in the 1990s to answer these questions, including separate analyses for women and minority news people. It also compares many of these findings with those from the major studies of the early 1970s and 1980s. As such, it should be the standard reference on U.S. journalists for years to come. In addition, this study goes beyond the previous two in adding more open-ended questions to explain and enrich quantitative findings, in the belief that the numbers by themselves are not enough to provide explanations for the patterns that emerge. This book includes more of the journalists' own words to fill this gap, as well as an analysis of samples of their self-selected best work.

Making News at The New York Times Nikki Usher, 2014-04-24 Making News at The New York Times is the first in-depth portrait of the nation's, if not the world's, premier newspaper in the digital age. It presents a lively chronicle of months spent in the newsroom observing daily conversations, meetings, and journalists at work. We see Page One meetings, articles developed for online and print from start to finish, the creation of ambitious multimedia projects, and the ethical dilemmas posed by social media in the newsroom. Here, the reality of creating news in a 24/7 instant information environment clashes with the storied history of print journalism, and the tensions present a dramatic portrait of news in the online world. This news ethnography brings to bear the overarching value clashes at play in a digital news world. The book argues that emergent news values are reordering the fundamental processes of news production. Immediacy, interactivity, and participation now play a role unlike any time before, creating clashes between old and new. These values emerge from the social practices, pressures, and norms at play inside the newsroom as journalists attempt to negotiate the new demands of their work. Immediacy forces journalists to work in a constant deadline environment, an ASAP world, but one where the vaunted traditions of yesterday's news still appear in the next day's print paper. Interactivity, inspired by the new user-computer directed capacities online and the immersive Web environment, brings new kinds of specialists into the newsroom, but exacts new demands upon the already taxed workflow of traditional journalists. And at time where social media presents the opportunity for new kinds of engagement between the audience and media, business executives hope for branding opportunities while journalists fail to truly interact with their readers.

The Computer Culture Reader Joseph R. Chaney, Ken S. McAllister, Judd Ethan Ruggill, 2009-03-26 The Computer Culture Reader brings together a multi-disciplinary group of scholars to probe the underlying structures and overarching implications of the ways in which people and computers collaborate in the production of meaning. The contributors navigate the heady and sometimes terrifying atmosphere surrounding the digital revolution in an attempt to take its measure through examinations of community and modes of communication, representation, information-production, learning, work, and play. The authors address questions of art, reality, literacy, history, heroism, commerce, crime, and death, as well as specific technologies ranging from corporate web portals and computer games to social networking applications and virtual museums. In all, the essayists work around and through the notion that the desire to communicate is at the heart of the

digital age, and that the opportunity for private and public expression has taken a commanding hold on the modern imagination. The contributors argue, ultimately, that the reference field for the technological and cultural changes at the root of the digital revolution extends well beyond any specific locality, nationality, discourse, or discipline. Consequently, this volume advocates for an adaptable perspective that delivers new insights about the robust and fragile relationships between computers and people.

Studying Politics Across Media Leticia Bode,Emily K. Vraga,2020-06-29 This book highlights the diverse methods needed to study a complex media environment, and the nuance and richness of the understanding gained by doing so, by offering examples of political communication research considering multiple platforms simultaneously. Political communication research that considers multiple media platforms is difficult and expensive to perform, and therefore relatively rare. Yet studying media platforms in isolation ignores the realities of the varied and complicated contemporary media experience, where most individuals consume information from multiple media outlets. Media platforms, from traditional outlets such as newspapers and television to newer online platforms such as social media, have proliferated in recent years. This makes the media environment itself more complex, as classic understandings of how the media function give way to a growing recognition of the hybrid media system, where divisions between content and producers are opaque, and where information is gleaned from increasingly diverse and numerous sources. Studying political communication across platforms allows better understanding of which types of experiences and effects are universal, and which are specific to particular platforms. This book was originally published as a special issue of Political Communication.

Satanic Panic Jeffrey S. Victor,1993 Again and again we are told - by journalists, police, and fundamentalists - that there exists a secret network

of criminal fanatics, worshippers of Satan, who are responsible for kidnapping, human sacrifice, sexual abuse and torture of children, drug-dealing, mutilation of animals, desecration of churches and cemeteries, pornography, heavy metal lyrics, and cannibalism. This popular tale is almost entirely without foundation, but the legend continues to gather momentum, in the teeth of evidence and good sense. Networks of 'child advocates', credulous or self-serving social workers, instant-expert police officers, and unscrupulous ministers of religion help to spread the panic, along with fabricated survivors' memoirs passed off as true accounts, and irresponsible broadcast 'investigations'. A classic witch-hunt, comparable to those of medieval Europe, is under way. Innocent victims are smeared and railroaded. Satanic Panic uncovers the truth behind the satanic cult hysteria, and exposes the roots of this malignant mythology, showing in detail how unsubstantiated rumor becomes transformed into publicly-accepted 'fact'.

Broadcast Announcing Worktext Alan R. Stephenson, David E. Reese, Mary E. Beadle, 2005 *Broadcast Announcing Worktext*, Second Edition provides the aspiring broadcast performer with the skills, techniques, and procedures necessary to enter this highly competitive field. In addition to the principles of good performance, this text addresses the importance of audience and how messages change to communicate effectively to various groups. Television and radio studio environments, announcer specializations and responsibilities, and developing a broadcast delivery style are just a few of the many topics covered. Factual information is presented in brief, easy-to-digest modules and is enhanced with self-study questions and projects that encourage active reader participation. The self-study provides an immediate check on the comprehension of what was presented, and the projects allow for a practical application of key concepts in the material. The worktext format, with many real-life examples, combines both traditional textbook learning and practical experience. A companion DVD illustrates techniques and concepts in each chapter with audio and visual examples. *Additional practical material in this edition *First time instructor's manual available *Expanded coverage on announcing techniques *Companion DVD with audio and video examples

The Last American Newspaper Ken Tingley, 2022-04-19 This book reveals what is happening in small communities across the United States as their newspapers struggle to survive. It is a celebration not just of journalism, but of the inspirational people who do it and the news and events of small towns. Importantly, it asks the question: who will be the community watchdog of the future? This book memorializes the American newspaper through the story of the Post-Star of Glens Falls, NY. The author, a devoted veteran of the Post-Star, compiles a series of vignettes that depict the newspaper's coverage over the years. They provide a glimpse behind the newsroom curtain through the stories of the investigative journalism done in small towns.

News Howard Tumber, 1999 News: A Reader sets out to provide students with an introduction to some of the key theoretical debates within the field of the sociology of news and journalism. It includes many of the accepted classics together with more recent pieces that address contemporary debates. The Reader brings out the diversity of work on the analysis of news and indicates the points at which arguments have led to new directions and paradigms. All the pieces in the book have been carefully edited. The essence of each work is has been captured in extracts that maintain their integrity to readers unfamiliar with the evolution of this field of research.
