Reimagining Innovation in Education and Social Sciences Wulan Patria Saroinsong, Muhamad Nurul Ashar, Irena Yolanita Maureen, Lina Purwaning Hartanti, Mita Anggaryani, Audrey Gabriella Titaley, 2023-04-13 Certainly, the pandemic has affected several aspects of life. Several modifications have been made and are now continuing. The number of innovations has expanded substantially, particularly in the fields of education and social sciences. Innovations are produced by educators, scientists, and professionals. These innovations must be distributed to aid the development of society in the sphere of education and beyond. After the eradication of the disease, we shall assist one another in conquering it and then develop and prosper together. This volume contains the works of educators, researchers, practitioners, and academics presenting the most recent research results, issues, and practical difficulties and solutions found in the domains of Education, Cultural Studies, Applied Linguistics, and Community Services. Reimagining is a creative method to approach or address challenges associated with innovation in the fields of education, cultural studies, applied linguistics, community services, or social sciences. Due to the topic areas covered in this proceeding, it is appropriate for instructors, researchers, practitioners, and academics who specialize in the aforementioned subjects. Social Media and Elections in Africa, Volume 2 Martin N. Ndelela, Winston Mano, 2020-02-14 This book, the second of two volumes, explores the challenges and opportunities presented by the increased presence of social media within African politics. Electoral processes in Africa have assumed new dimensions due to the influence of social media. As social media permeates different aspects of elections, it is ostensibly creating new challenges and opportunities. Most evident are the challenges of hate speech, misogyny and incivility. This book considers the impact of digital media before, during, and after elections, as well as authorities' attempts to legislate and regulate the internet in response. Contributions to this volume analyse social media posts, transgressive images, newspaper articles, and include case studies of Algeria, Zimbabwe, Kenya, South Africa, Nigeria and Uganda. This results in the delivery of an original depiction of the use of social media in a variety of African contexts. This book will appeal to academics and students of media and communication studies, political studies, journalism, sociology, and African studies.

Built to Sell John Warrillow, 2012-12-24 Run your company. Don't let it run you. Most business owners started their company because they wanted more freedom—to work on their own schedules, make the kind of money they deserve, and eventually retire on the fruits of their labor. Unfortunately, according to John Warrillow, most owners find that stepping out of the picture is extremely difficult because their business relies too heavily on their personal involvement. Without them, their company—no matter how big or profitable—is essentially worthless. But the good news is that entrepreneurs can take specific steps—no matter what stage a business is in—to create a valuable, sellable company. Warrillow shows exactly what it takes to create a solid business that can thrive long into the future.

Young People in Digital Society Amanda Third, Philippa Collin, Lucas Walsh, Rosalyn Black, 2019-12-18 This book adopts a critical youth studies approach and theorizes the digital as a key feature of the everyday to analyse how ideas about youth and cyber-safety, digital inclusion and citizenship are mobilized. Despite a growing interest in the benefits and opportunities for young people online, both 'young people' and 'the digital' continue to be constructed primarily as sites of social and cultural anxiety requiring containment and control. Juxtaposing public policy, popular educational and parental framings of young people's digital practices with the insights from fieldwork conducted with young Australians aged 12-25, the book highlights the generative possibilities of attending to intergenerational tensions. In doing so, the authors show how a shift beyond the paradigm of control opens up towards a deeper understanding of the capacities that are generated in and through digital life for young and old alike. *Young People in Digital Society* will be of interest to scholars and students in youth studies, cultural studies, sociology, education, and media and communications.

How We Change Nathan Agin, 2020-05-19 The Coronavirus pandemic has revealed a very big secret we've been keeping from ourselves and each other: We can be remarkably agile in the face of change. How is it that we are able to so radically and rapidly change our daily behavior in order to follow the social distancing and stay-at-home policies during the pandemic, and yet--pandemic or not--we typically find it difficult, if not impossible, to reach smaller personal goals like dieting, getting organized or changing destructive habits? The pandemic is life-threatening, so it ignites our survival instincts, activating that part of our brains charged with speedily and efficiently getting us to safety. But cholesterol, alcohol, and physical passivity are all life-threatening, and many of us humans have done a lousy job changing in regard to these issues, even when we have reliable information that they are killing us. Why do we struggle to change what would so obviously help ourselves individually? Ross Ellenhorn's book, *How we Change* (and the Ten Reasons Why We Don't) gives a fascinating answer. A clinician and thought leader in the mental health and addiction fields, he suggests that we're often looking in the wrong direction when we try to decipher the factors that support human change. He suggests that it's much more fruitful to look at why we don't change, than figure out why we do. By looking at the reasons we don't change, we give ourselves the best chance of actually changing in meaningful ways. Ellenhorn explains how we are wired to double down on the familiar because of what he calls the Fear of Hope - the act of protecting ourselves from further disappointment—and identifies the “10 Reasons Not to Change” to help us see why we behave the way we do when we are faced with the challenge of hope. Among them are: · To change means raising your expectations and thus risking that you'll disappoint yourself. · Once you change, you are more accountable to make other changes than if you stayed the same · When you change, your future become much less predictable. · Change means destroying psychological monuments you've built to commemorate past injuries · Every time you change, you raise the possibility of losing or disrupting your relationship with certain people By addressing this little known reality of fear of hope, and how it influences the 10 Reasons Not to Change, Ellenhorn actually gives us hope, helping us to work toward the change we seek.

Ellenhorn speaks to the core of our insecurities and fears about ourselves, with a humor and kindness. By turning our judgments about self-destructive behaviors into curious questions about them, he teaches us to think about our actions to discover what we truly want - even if we're going about getting it in the wrong way. How We Change is a brilliant approach that will forever alter our perspective - and help us achieve the transformation we truly seek.

Children of Blood and Bone Tomi Adeyemi,2018-03-06 Zlie Adebola remembers when the soil of Orřha hummed with magic. Burners ignited flames, Tiders beckoned waves, and Zlie's Reaper mother summoned forth souls.

Rebel Music Hisham Aidi,2014-12-02 In this pioneering study, Hisham Aidi—an expert on globalization and social movements—takes us into the musical subcultures that have emerged among Muslim youth worldwide over the last decade. He shows how music—primarily hip-hop, but also rock, reggae, Gnawa and Andalusian—has come to express a shared Muslim consciousness in face of War on Terror policies. This remarkable phenomenon extends from the banlieues of Paris to the favelas of Rio de Janeiro, from the park jams of the South Bronx to the Sufi rock bands of Pakistan. The United States and other Western governments have even tapped into these trends, using hip hop and Sufi music to de-radicalize Muslim youth abroad. Aidi situates these developments in a broader historical context, tracing longstanding connections between Islam and African-American music. Thoroughly researched, beautifully written, Rebel Music takes the pulse of a revolutionary soundtrack that spans the globe.

Germania Brendan McNally,2009-02-10 In their youth, Manni and Franzi, together with their brothers, Ziggy and Sebastian, captured Germany's collective imagination as the Flying Magical Loerber Brothers -- one of the most popular vaudeville acts of the old Weimar days. The ensuing years have, however, found the Jewish brothers estranged and ensconced in various occupations as the war is drawing near its end and a German surrender is imminent. Manni is traveling through the Ruhr Valley with Albert Speer, who is intent on subverting Hitler's apocalyptic plan to destroy the German industrial heartland before the Allies arrive; Franzi has become inextricably attached to Heinrich Himmler's entourage as astrologer and masseur; and Ziggy and Sebastian have each been employed in pursuits that threaten to compromise irrevocably their own safety and ideologies. Now, with the Russian noose tightening around Berlin and the remnants of the Nazi government fleeing north to Flensburg, the Loerber brothers are unexpectedly reunited. As Himmler and Speer vie to become the next Führer, deluded into believing they can strike a bargain with Eisenhower and escape their criminal fates, the Loerbbers must employ all their talents -- and whatever magic they possess -- to rescue themselves and one another. Deftly written and darkly funny, Germania is an astounding adventure tale -- with subplots involving a hidden cache of Nazi gold, Hitler's miracle U-boats, and Speer's secret plan to live out his days hunting walrus in Greenland -- and a remarkably imaginative novel from a gifted new writing talent.

Wild Thorns Salar Khalifeh,2023-08-01 In this tense modern literary classic, acclaimed Palestinian author Sahar Khalifeh depicts the humiliation, bitter resignation and determined resistance of Palestinians under Israeli military occupation. First published in 1976, Wild Thorns was the first Arab novel to offer a glimpse of everyday life under Israeli occupation. With uncompromising honesty, Khalifeh pleads elegantly for survival in the face of oppression.

Theaters of Anatomy Cynthia Klestinec,2011-08-15 The anatomy theater is where students of the human body learn to isolate structures in decaying remains, scrutinize their parts, and assess their importance. Taking a new look at the history of anatomy, the author places public dissections alongside private ones to show how the anatomical theater was both a space of philosophical learning and a place where students learned to behave in a civil manner towards their teachers, their peers, and the corpse.

Refiguring the Archive Carolyn Hamilton,Verne Harris,Michèle Pickover,Graeme Reid,Razia Saleh,Jane Taylor,2012-12-06 Refiguring the Archive at once expresses cutting-edge debates on `the archive' in South Africa and internationally, and pushes the boundaries of those debates. It brings together prominent thinkers from a range of disciplines, mainly South Africans but a number from other countries. Traditionally archives have been seen as preserving memory and as holding the past. The contributors to this book question this orthodoxy, unfolding the ways in which archives construct, sanctify, and bury pasts. In his contribution, Jacques Derrida (an instantly recognisable name in intellectual discourse worldwide) shows how remembering can never be separated from forgetting, and argues that the archive is about the future rather than the past. Collectively the contributors demonstrate the degree to which thinking about archives is embracing new realities and new possibilities. The book expresses a confidence in claiming for archival discourse previously unentered terrains. It serves as an early manual for a time that has already begun.

Western Plainchant David Hiley,1995 Plainchant is the oldest substantial body of music that has been preserved in any shape or form. It was first written down in Western Europe in the eighth to ninth centuries. Many thousands of chants have been sung at different times or places in a multitude of forms and styles, responding to the differing needs of the church through the ages. This book provides a clear and concise introduction, designed both for those to whom the subject is new and those who require a reference work for advanced study. It begins with an explanation of the liturgies that plainchant was designed to serve. It describes all the chief genres of chant, different types of liturgical book, and plainchant notations. After an exposition of early medieval theoretical writing on plainchant, Hiley provides a historical survey that traces the constantly changing nature of the repertory. He also discusses important musicians and centers of composition. Copiously illustrated with over 200 musical examples, this book highlights the diversity of practice and richness of the chant repertory in the Middle Ages. It will be an indispensable introduction and reference source on this important music for many years to come.
