WORLD AIRPORTS SPOTTING GUIDES. MATT. FALCUS,2020

The Passenger Experience ,2004 This book presents the firm's design for 13 major airports throughout the world.

Denver Airports Jeffrey C. Price,Jeffrey S. Forrest,Shahn G. Sederberg,2019-04-29 On the cusp of the Great Depression, Denver mayor Benjamin Stapleton pushed for the development of the first city-operated airport. Denver Municipal Airport opened in 1929 with three hub airlines. While

Stapleton would be honored to later have the airport named after him, by the mid-1980s, the name Stapleton had become synonymous with congestion, flight delays, and frequent closures when the snow moved in. To solve the problem, Denver mayor Federico Peña envisioned a massive new airport, but when Denver International Airport (DIA) opened in 1995, its three hub airlines had whittled away to just one, and critics warned of dire consequences. Yet the airport persevered, and today, with its iconic tent roof, six runways, and 53 square miles of land, it stands amongst the most beautiful and busiest airports in the world. This is the story of three airports and how they brought the city from cow town to boomtown.

Airport Economics in Latin America and the Caribbean Tomás Serebrisky, 2011-12-20
Traditionally, air transport infrastructure in Latin America and the Caribbean (LAC) was exclusively under government ownership and management. Starting in the late 1990s, several Latin American countries implemented innovative public-private partnerships (PPP) that transferred the financing and management of air transport sector infrastructure to the private sector. This book presents the findings of a first-ever, comprehensive study of how LAC region airports have evolved during this notable period of transition in airport ownership. It is an unbiased, positive analysis of what happened, rather than a normative analysis of what should be done to reform the airport sector or to attract private participation. It takes the first step in response to the need for more conclusive information about the influence of airport ownership on economic performance. The book is centered around the study of three dimensions of performance: productive efficiency, institutional set up for the governance of the sector, and financing of airport PPPs. Using rigorous analytical tools, this book answer a series of key questions to evaluate the introduction of private sector participation in the Latin American airport sector: Are LAC airports technically efficient? How has

efficiency evolved in the last decade? Are privately-run airports more efficient than state-operated airports? How do independent regulators compare with government agencies in accountability, transparency, and autonomy? How has the level and structure of aeronautical tariffs changed in recent years? The main audience of this book are air transport practitioners, transport regulators, decisionmakers in transport ministries, and PPP units and academics.

Airports, Cities and Regions Sven Conventz, Alain Thierstein, 2014-08-27 Since the emergence of urban systems, cities have developed in a mutually inter-dependent process of socio-economic dynamics and transportation linkages. In recent years, Airports worldwide have stepped beyond the stage of being pure infrastructure facilities while the complex dynamics that are taking place at and around international airports represent a crucial element in the post-industrial reorganisation of urban and regional systems. Airports are increasingly recognized as general urban activity centres; that is, key assets for cities and regions as economic generators and catalysts of investment in addition to being critical components of efficient city infrastructure. This book brings together contributions from renowned academic scholars and world leading practitioners to discuss insights gained from theory and practice. The first collection of papers reflects upon the general role and future of airports as well as their specific contribution to competitive advantages within a fast changing business and economic landscape. The second group of contributions ask about the role airports play within the innovation process that is inherently centred on generating and sharing knowledge. The third section of papers investigates the drivers of real estate developments on airport land and in the close vicinity of airports.
