Akira Michelle Le Blanc, Colin Odell, 2019-07-25 Successful in both Japan and the West, Akira had a huge impact on the international growth in popularity of manga and anime. Closely analysing the film and its key themes, Colin O'Dell and Michelle Le Blanc assess its historical importance, its impact on the Western perception of anime, and its influence on science fiction cinema.

Time Regained Delia Ungureanu, 2021-10-07 Awarded the Tudor Vianu Prize for Literary and Cultural Theory by the National Museum of Romanian Literature. Over the past 30 years, the fields of world literature and world cinema have developed on parallel but largely separate tracks, with little recognition of their underlying similarities and the ways that each can learn from the other. Time Regained does not move from literature to cinema, but exists simultaneously in both fields. The 7 filmmakers selected here, Andrei Tarkovsky, Akira Kurosawa, Martin Scorsese, Raúl Ruíz, Wong Kar Wai, Stephen

Daldry, and Paolo Sorrentino, are themselves also writers or people with literary training, and they produce a new type of world cinema thanks to their understanding of the world simultaneously through literature and film. In the process, their films produce new readings of literary texts that world literature studies wouldn't have been able to achieve with its own instruments. *Time Regained* examines how filmmakers build on literature to reconfigure the world as a landscape of dreams and how they use film to reinvent the narrative techniques of the authors on whom they draw. The selected filmmakers draw inspiration from French surrealists, modernists Marcel Proust, Virginia Woolf, and Marguerite Yourcenar, and predecessors such as Dante and Cao Xueqin. In the process, these filmmakers cross the borders between film and literature, nation and world, dream and reality.

The Impact of Akira Rémi Lopez, 2020-09-02 Discover Katsuhiro Otomo's visionary work and post-Akira Japanese comic culture. The catalyst of an era, of a world that was unaware of its downfall, Katsuhiro Otomo's visionary work marked a turning point in the industry. First, in his homeland, Japan, in terms of graphics and plot on an entire generation of post-Akira artists who adopted his attention to detail, his realism and his dizzying views. But above all with his international reach, which threw Japanese comic strips and animations into the limelight in numerous countries, by trampling the rest of the world's notion that cartoons are exclusively for children. This book dives headfirst into the radioactive culture that is the creative power of

Katsuhiro Otomo, from the mangaka's— already explosive—beginnings, up to winning recognition for Akira. Discover the themes and influences of this fundamentally anti-establishment work by exploring its socio-economic or simply literary aspects. The author of the work analyzes the phenomenon, from its tiny seed to the mighty tree, and reveals why Akira is, above all, a purely Japanese series. This book will provide you with an analysis of the socio-historical context of Akira. It aims to help Western readers to better understand the essence of this graphic and narrative treasure. ABOUT THE AUTHOR Rémi Lopez graduated with a degree in Japanese from Bordeaux III University. In 2004, he cut his teeth as an author when he wrote website columns on video game soundtracks. Two years later, he joined the Gameplay RPG magazine in which he carried out the same task. He then followed the then editor-in-chief, Christophe Brondy, and his entire team to a new project: the monthly Role Playing Game magazine. Rémi wrote The Legend of Final Fantasy VIII and the book on the Original Soundtrack for Pix'n Love publications in 2013.

Imitation and Creativity in Japanese Arts Michael Lucken, 2016-03-29 The idea that Japanese art is produced through rote copy and imitation is an eighteenth-century colonial construct, with roots in Romantic ideals of originality. Offering a much-needed corrective to this critique, Michael Lucken demonstrates the distinct character of Japanese mimesis and its dynamic impact on global culture, showing through several twentieth-century

masterpieces the generative and regenerative power of Japanese arts. Choosing a representative work from each of four modern genres—painting, film, photography, and animation—Lucken portrays the range of strategies that Japanese artists use to re-present contemporary influences. He examines Kishida Ryusei's portraits of Reiko (1914–1929), Kurosawa Akira's *Ikiru* (1952), Araki Nobuyoshi's photographic novel *Sentimental Journey*–Winter (1991), and Miyazaki Hayao's popular anime film *Spirited Away* (2001), revealing the sophisticated patterns of mimesis that are unique but not exclusive to modern Japanese art. In doing so, Lucken identifies the tensions that drive the Japanese imagination, which are much richer than a simple opposition between progress and tradition, and their reflection of human culture's universal encounter with change. This global perspective explains why, despite its non-Western origins, Japanese art has earned such a vast following.

The Japanese Period Film S.A. Thornton, 2015-03-26 This study examines the history of the Japanese period film and proposes that a powerful relationship exists between the past and present in Japan's narrative tradition. The first section of the book analyzes the form and function of the Japanese period film, describing the unique iconography and characteristics of films set in the past. The author also examines how the period film has allowed Japanese filmmakers to circumvent government censorship by serving as a rhetorical device with which they can explore contemporary concerns through a criticism

of the past. The final section of the book contains chapters that focus on the narrative in Japanese epic, religion, theater, and modern popular literature. A complete filmography and bibliography are included.

Planetary Modernisms Susan Stanford Friedman, 2015-08-18 Drawing on a vast archive of world history, anthropology, geography, cultural theory, postcolonial studies, gender studies, literature, and art, Susan Stanford Friedman recasts modernity as a networked, circulating, and recurrent phenomenon producing multiple aesthetic innovations across millennia. Considering cosmopolitan as well as nomadic and oceanic worlds, she radically revises the scope of modernist critique and opens the practice to more integrated study. Friedman moves from large-scale instances of pre-1500 modernities, such as Tang Dynasty China and the Mongol Empire, to small-scale instances of modernisms, including the poetry of Du Fu and Kabir and Abbasid ceramic art. She maps the interconnected modernisms of the long twentieth century, pairing Joseph Conrad with Tayeb Salih, E. M. Forster with Arundhati Roy, Virginia Woolf with the Tagores, and Aimé Césaire with Theresa Hak Kyung Cha. She reads postcolonial works from Sudan and India and engages with the idea of Négritude. Rejecting the modernist concepts of marginality, othering, and major/minor, Friedman instead favors rupture, mobility, speed, networks, and divergence, elevating the agencies and creative capacities of all cultures not only in the past and present but also in the century to come.

Memory in World Cinema Nancy J. Membrez, 2019-08-30 Film itself is an artifact of memory. A blend of all the other fine arts, film portrays and preserves human memory, someone's memory, faulty or not, dramatically or comically, in a documentary, feature film or short. Hollywood may dominate 80 percent of cinema production but it is not the only voice. World cinema is about those other voices. Drawn initially from presentations from a series of film conferences held at the University of Texas at San Antonio, this collection of essays covers multiple geographical, linguistic, and cultural areas worldwide, emphasizing the historical and cultural interpretation of films. Appendices list films focusing on memory and invite readers to explore the films and issues raised.

Liquid Metal Sean Redmond,2004 This reader brings together a great number of what are regarded to be the 'seminal' essays that have opened up the study of science fiction to serious critical interrogation. It includes key essays by writers such as J.P. Telotte, Susan Sontag and Peter Biskind.
