The Burning Bride Manoj Kerai, 2015-03-08 In India, one woman is murdered every hour by her husband's family for a dowry. The Burning Bride follows the story of Uma, a newlywed woman. She starts her new life with many dreams. However, her dreams turn into nightmares when her parents are unable to

fulfil the dowry demands made by Madhu, her mother-in-law. The heaven she had imagined transforms into a hell, and the worst part is; there appears to be no escape. Violence against women is high in India but the irony is that Indian people worship women in the forms of many goddesses. The most commonly worshipped goddess is Durga who has nine forms. Therefore The Burning Bride is told through nine women's perspectives. The multiple perspectives highlights social, psychological and cultural factors which allow the dowry system to claim so many lives every year. At least 10% of the profits made from the sales of The Burning Bride will support the Asian Circle to fund Oxfam projects to end domestic violence in India.

Adaptive Mesh Refinement - Theory and Applications Tomasz Plewa, Timur Linde, V. Gregory Weirs, 2005-12-20 Advanced numerical simulations that use adaptive mesh refinement (AMR) methods have now become routine in engineering and science. Originally developed for computational fluid dynamics applications these methods have propagated to fields as diverse as

astrophysics, climate modeling, combustion, biophysics and many others. The underlying physical models and equations used in these disciplines are rather different, yet algorithmic and implementation issues facing practitioners are often remarkably similar. Unfortunately, there has been little effort to review the advances and outstanding issues of adaptive mesh refinement methods across such a variety of fields. This book attempts to bridge this gap. The book presents a collection of papers by experts in the field of AMR who analyze past advances in the field and evaluate the current state of adaptive mesh refinement methods in scientific computing.
