Leica Lens Compendium Erwin Puts,2003-11-24 8 1/2 x 10 Since publication this title has proved to be very popular for both the serious lens user wishing to understand more about his lenses, as well as the Leica enthusiast considering which lens would be suitable to add to his outfit. Do you know your Coma from your Aberrations? If Yes, then part 2 of Erwin Puts' new book will be of considerable interest to you. Either way you may find this section easier to understand than you expect; the illustrations and diagrams do help. Part 1 goes into the optical history of E. Leitz, Wetzlar and the Leica Camera of Solms in detail with all the personalities involved. This section is well illustrated with some new pictures. The commercial demands are always battling with the perfectionists at Leica who created some of the world's most famous lenses. Part 2 is an optical digression explaining the lens and glass design features, problems and terms and the continual battle to ensure that Leica users end up with the highest possible standard of lens. Part 3 is the largest part of the book. Puts has tested Leica lenses from 1925 to date; each lens, in most cases with diagram, is detailed with its performances at the critical apertures.

Deep Nutrition Catherine Shanahan, M.D., Luke Shanahan, 2017-01-03 Shanahan examined diets around the world known to help people live longer, healthier lives--diets like the Mediterranean, Okinawa, and 'Blue Zone'--and identified the four common nutritional habits, developed over millennia, that unfailingly produce strong, healthy, intelligent children, and active, vital elders, generation after generation. Dr. Cate shows how all calories are not created equal; food is information that directs our cellular growth. Our family history does not determine our destiny: what you eat and how you live can alter your DNA in ways that affect your health and the

health of your future children. She offers a prescriptive plan for how anyone can begin eating The Human Diet.--

The Fatburn Fix Catherine Shanahan, M.D.,2020-03-24 A proven plan to optimize your health by reclaiming your natural ability to burn body fat for fuel The ability to use body fat for energy is essential to health—but over decades of practice, renowned family physician Catherine Shanahan, M.D., observed that many of her patients could not burn their body fat between meals, trapping them in a downward spiral of hunger, fatigue, and weight gain. In *The Fatburn Fix*, Dr. Shanahan shows us how industrially produced vegetable oils accumulate in our body fat and disrupt our body’s energy-producing systems, driving food addictions that hijack our moods and habits while making it nearly impossible to control our weight. To reclaim our health, we need to detoxify our body fat and help repair our “fatburn” capabilities. Dr. Shanahan shares five important rules to fix your fatburn: 1) Eat natural fats, not vegetable oils. 2) Eat slow-digesting carbs, not starchy carbs or sweets. 3) Seek salt. 4) Drink plenty of water. 5) Supplement with vitamins and minerals. She then provides a revolutionary, step-by-step plan to help reboot your fatburn potential in as little as two weeks. This customizable two-phase plan is widely accessible, easy to follow, and will appeal to the full spectrum of diet ideologies, from plant-based to carnivore to keto and beyond. By making a few changes to what you eat and when, you will lose unwanted weight and restore your body’s ability to store and release energy. With *The Fatburn Fix*, Dr. Shanahan shows how regaining your fatburn is the key to effortless weight loss and a new, elevated life, paving the way to abundant energy and long-term health and happiness.

Every Assistance & Protection Jane Doulman,David Lee,2008 Every Assistance and Protection is the first book presenting an in-depth history of the Australian passport. In charting the development of the passport from its early beginnings to its present form, the book traverses changes in government policy and social history from the early 19th century to the modern era. It shows how the Australian passport evolved from a signifier of British nationality into a badge of membership of one of the most multicultural countries in the world. The book explores the landmark events in this history:the great 19th century diasporas, resulting from relaxation of official controls on the movement of people; the early passport regime regulating the movement of ticket-of-leave convicts; the establishment of the centralised passport system during World War I; the enactment of the first passport legislation for the Commonwealth, The Passports Act 1920, and the reaction of some Australians who felt the new law infringed the liberties of the British subject; changes to the laws in 1938 such that possession of a passport was no longer mandatory for an Australian to travel, though still a practical necessity; the use of the government's discretionary power to cancel or withhold passports to inhibit the movement of individual communists; the establishment of Australian citizenship in 1948 - the basis for possession of an Australian passport; the removal of the word British from the cover in 1967; the effects of globalisation and heightened security in the late 20th and early 21st century. It also touches on the lives of individuals: boxer Les Darcy, journalist Wilfred Burchett, and General Sir Thomas Blamey, are among the many Australians featuring in these pages. The book is based on an exhaustive examination of hitherto unexamined primary sources of many government departments, including the Departments of External Affairs, the Prime Minister's, the Attorney-General's, Defence, Home and Territories, Immigration and Foreign Affairs. Sponsored by Department of Foreign Affairs and Trade

Unposed Craig Semetko,2022-09-20 Follow in the footsteps of Leica Camera Ambassador Craig Semetko’s 10 year trek across the globe to capture the spontaneity, humor, and juxtaposition of the human experience. In the book’s forward, iconic photographer Elliott Erwin writes, “Good photographs are tough enough to shoot. Really funny ones are even harder. Good and funny photographs observed in nature not arranged or manipulated but simply observed in real time with amazing consistency, constitute a minor miracle now presented in Mr. Semetko’s book...In my book, he is the essential photographer. That is, the one who sees what others could not have seen.” Inspired by Cartier-Bresson, Robert Frank, and Elliott Erwitt, Craig Semetko is a collector of the spontaneous moment. With an uncanny knack for using Leica Cameras to capture the beautiful and unexpected that surrounds us all, Semetko offers a striking collection of imagery shot during 10 years of traveling around the world, from Edinburgh to Amsterdam, France to Los Angeles, Hanoi to Bangkok, and beyond. This visual celebration records the first decade of the twenty-first century across all walks of life. Semetko documents the muted beauty of regular people simply living their lives, and captures the humor found in the offbeat and eccentric contrasts all around us. *Unposed* is a memorable exploration of an era shot by a skilled photographer, dubbed by *Esquire* magazine as “a noble torchbearer” of the Leica Camera legacy.

Picture Perfect Posing Roberto Valenzuela,2014-02-26 Photographer, author, and educator Roberto Valenzuela has a proven track record for teaching and explaining difficult concepts to photographers of all skill levels. His remarkable ability to break down complicated ideas into understandable, approachable elements that photographers can truly grasp—and then use their newfound knowledge to improve their photography—made his first book, *Picture Perfect Practice*, a breakout success. In *Picture Perfect Posing*, Roberto takes on the art of posing. For many photographers, after learning to compose an image and even light it properly, a portrait can still easily be a failure if the pose is not natural, elegant, and serving the needs of both the subject and the photographer. Instead of just showing page after page of poses—like most posing books on the market—Roberto actually breaks down the concept of posing by

examining the anatomy, starting with the core foundation: the spinal chord and neck. Building from there, Roberto discusses every component of what makes poses work, as well as fail. How should the model hold her hands? Bend her elbows? Position her fingers? Should the model look toward or away from the camera, and why? It all depends on what the photographer wants for the shot, and Roberto discusses the entire process, from the intent of the photographer through the execution of the pose. For those who have been discouraged by an inability to pose their subjects, or who have simply not known where to start in order to figure it out, Picture Perfect Posing is the essential resource they need to learn how posing truly works, and how they can learn to direct the exact pose they need for the shot they want.
