Facilitated Advocacy for Sustainable Development Graham Haylor, William Savage, 2018-11-15 Facilitated advocacy is an approach to development initiatives that enables people situated across diverse cultural, economic, educational, professional, societal and linguistic spheres to engage more equitably. By doing so, potential changes in policy and practice can improve people's livelihoods and life circumstances. This book provides context and definition for facilitated advocacy. It suggests a role for the approach, as the world once again embarks on a set of UN-coordinated development goals. The book outlines the skills and experience required to facilitate groups of people in order to identify and advocate for changes that they consider necessary. This is illustrated through a series of co-authored case studies from Cambodia, Ghana, India, Kenya, Pakistan, Sri Lanka and Vietnam. These range from standing up for the rights of tribal communities in eastern India and improving service delivery to villages in Vietnam, to developing an inclusive fisheries policy in Pakistan and building social enterprises in Odisha State of India. This book offers a critically reflective description of what has been tried, adapted and replicated, furthering action research in the field of development studies. It offers theorists and practitioners an opportunity to examine their own work in contrast and in recognition of the realities of living with paradoxes.

Technology Development Assistance for Agriculture Norman Clark, Andy Frost, Ian Maudlin, Andrew Ward, 2013-05-02 Stemming from an 11-year DFID funded programme under its Renewable Natural Resources Research Strategy (RNRRS), Technology Development Assistance for Agriculture: Putting Research into Low Income Countries reviews part of this programme as a case study of a broader issue of technology development for Africa. Controversially, it critiques current international technology development assistance and focuses on the potential role of the private sector in agricultural technology development as well as providing insights for future cognate science policy and practice. The book focuses on the RIU Best Bets Africa sub-programme. This identified promising proposals to take existing agriculture research products and put these into use in ways that would benefit the poor in developing countries. The sum set aside for this was £5 million. The empirical sections of the book cover project selection, progress and programme management over a 2009-2012 period with special attention paid to lessons learned that may have implications for future cognate technology development assistance. This topical book gives direct evidence of meeting objectives and delivering real changes in technology development for Africa to postgraduate students, researchers, international bodies, NGOs, policy makers and government organisations working on natural resource management, technology development assistance, and low income country agriculture.

Changing the Face of the Waters World Bank, 2007-06-27 Aquaculture the farming of fish and aquatic plants has become the world's fastest-growing food production sector, even as the amount of wild fish caught in our seas and freshwaters declines. From fish foods and pharmaceuticals to management of entire aquatic ecosystems, aquaculture is truly changing the face of the waters. Increased growth, however, brings increased risk, and aquaculture now lies at a crossroads. One direction points toward the giant strides in productivity, industry concentration, and product diversification. Another direction points toward the dangers of environmental degradation and the marginalization of small fish farmers. Yet another direction invites aquaculture to champion the poor and provide vital environmental services to stressed aquatic environments. 'Changing the Face of the Waters' offers a cutting-edge analysis of the critical challenges facing aquaculture, balancing aquaculture's role in economic growth with the need for sound management of natural resources. The book also provides guidance on sustainable aquaculture by evaluating alternative development pathways, placing particular emphasis on the application of lessons from Asia to Sub-Saharan Africa and Latin America. Aimed at policy makers, planners, and scientists, this book provides a comprehensive frame of reference for orienting ideas and initiatives in this dynamic industry.

The Captain of the Juniper Wayne Beyea, 2008-05-15 Brooklyn-born Frank F. Pabst, inspired by a strong desire for independence, excitement, and prosperity, began working as a crewman on a river ship at age eleven, converted a sunken ship's pilothouse into a teenage clubhouse, and plunged into the hold of a sunken tea schooner at the age of thirteen. As part of his love affair with Lake Champlain, Pabst then captained the tour boat Juniper for twenty-five years. During the course of those twenty-five years, thousands of visitors boarded a vessel more resembling a stout and sturdy tugboat than a pleasure cruise to be greeted by the words, Ladies and gentlemen, welcome aboard the Juniper. Pabst conveyed a great love for the lake and shared his vast knowledge of the lake's

history, including tales of the unsolved mystery of whether a dinosaur-like creature referred to as Champ, or Champy, dwells within the lake's depths. Many of them fondly remember their scenic, breathtakingly beautiful cruises with Pabst. So embark with The Captain of the Juniper on a cruise through the life of a simple man who, through his devotion to the lake, became one of the most beloved and legendary characters in the history of Lake Champlain.

Into the Sweet Hereafter Kaye George,2021-03-09 Spring has sprung in the charming tourist town of Fredericksburg, Texas, and one of the tastiest attractions is a trip to Tally's Old Tyme Sweets—until a bizarre burglary leaves a bitter aftertaste . . . Tally Holt is thrilled to see her new replicas of vintage sweets displayed in the window of Bella's Baskets, a gift basket shop owned by her friend, Yolanda Bella. There's just one problem—the creations appear to be melting. The ladies assume the culprit is the broiling heat of the Texas sun—until that night, the store window is smashed, and there's only one thing missing: the replicas. Tally is positively stumped. Clearly, the useless fake candies are more special than she bargained for—but why? When a rash of seemingly unrelated burglaries sweeps through the area, Tally is determined to sleuth out the answer—and stop a thief from killing more than the town's appetite . . .

Principles of Sustainable Aquaculture Stuart W. Bunting,2013-01-25 Aquaculture is the farming of aquatic organisms, principally fish, molluscs, crustaceans and marine algae. It has seen phenomenal worldwide growth in the past fifty years and many people view it as the best solution for the provision of high quality protein to feed the world's growing population, particularly with the rapid decline in wild marine fish populations. Aquaculture now contributes approximately one third of the world's fish production, and has increased by about eight per cent annually over the last thirty years, while wild capture fishery production has remained static. Focused on developing more sustainable aquaculture practices, this book provides an ideal advanced-level textbook. It is based on extensive evidence and knowledge of best practices, with guidance on appropriate adaptation and uptake in a variety of environmental, geographic, socio-economic and political settings. The author concentrates on low-impact aquaculture systems and approaches, which have minimal adverse effects on the environment. He also emphasizes socially responsible and equitable aquaculture development; to enhance the natural resource base and livelihoods. Drawing on a range of case-studies from around the world, the objective is to show where progress in terms of developing ecologically sound and socially responsible forms of aquaculture has been made. A tool-box of approaches to support widespread adoption and appropriate adaptation of regenerating aquaculture strategies is provided, ensuring the book will have practical relevance for both students and professionals.

Treasures of the Spanish Main John Christopher Fine,2006-09-01 This is a story about the lust for gold and treasure, Fine writes. In the 1600s and 1700s, Spain dominated the oceans with its fleet of galleons. Coming to the New World, these ships filled their holds with gold and silver and treasures beyond imagining. The seaway between Spain and the New World was dubbed The Golden Highway. On their journeys back across the seas, many were

wrecked on reefs or destroyed by hurricanes. The watery depths now hold their treasures. Today, treasure divers seek their fortunes by attempting--sometimes successfully, sometimes fatally--to retrieve these hordes of riches. In Treasures of the Spanish Main, readers relive each voyage of long ago as well as witness the modern wreck diver's efforts to extract their secrets. Included are: The 1622 fleet * The Concepcion * The Maravillas * The Shipwreck off Jupiter Beach * The San Jose * the 1715 Fleet * and the 1733 Fleet The voyages of centuries ago come alive with Fine's excellent historical detail. Readers will experience the wild storms and the results of unfortunate choices made by long-ago sailors. The eccentric treasure hunters of today, along with those of the past, create a mosaic of suspense and drama on the high seas. A must for everyone interested in pirates, treasure, sailing, history, or just plain fun.
