

 MARKETING RESOURCE MANAGEMENT Romek Jansen,Frans Riemersma,2008

 ECONOMICS AND THE ENVIRONMENT Eban S. Goodstein,Stephen Polasky,2017-09-25 Climate change has morphed from an environmental problem into a challenge to civilization itself. As CO2 levels have continued to rise, the 8th edition of this book is now more relevant than ever. Retaining the approach of the original edition, the newest iteration features global warming as the framing example for a comprehensive look at environmental economics. Pedagogical clarity is ensured by the book’s central focus on four highly-focused questions: How much pollution is too much? Is the government up to the job? How can we do better? How can we resolve global issues? The text also continues with a strong focus on natural resources economics and ecosystem services. Updates to the book are included to address the very latest concerns, standards, and legislation related to environmental issues, providing students with a comprehensive look at this important topic while maintaining an accessible approach that makes the material engaging and highly relevant.

 GAME DESIGN THEORY Keith Burgun,2012-08-13 Despite the proliferation of video games in the twenty-first century, the theory of game design is largely underdeveloped, leaving designers on their own to understand what games really are. Helping you produce better games, Game Design Theory: A New Philosophy for Understanding Games presents a bold new path for analyzing and designing games. The author offers a radical yet reasoned way of thinking about games and provides a holistic solution to understanding the difference between games and other types of interactive systems. He clearly details the definitions, concepts, and methods that form the fundamentals of this philosophy. He also uses the philosophy to analyze the history of games and modern trends as well as to design games. Providing a robust, useful philosophy for game design, this book gives you real answers about what games are and how they work. Through this paradigm, you will be better equipped to create fun games.

 ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING AND MARKETING MANAGEMENT James Seligman,2018-09-20 OBJECTIVES The book objectives provide a full delivery of information on the fields of artificial intelligence (AI) and machine learning (ML) to educators, students and practitioners of marketing. By explaining AI and ML terminology and its applications including marketing, the book is designed to inform and educate. Marketing use of AI and ML has exploded in recent decades as marketers have seen the considerable benefits of these two technologies. It is understood and explained that AI deals with ‘intelligent behaviour’ by machines rather than natural intelligence found in humans and animals, it is the machine mimicking ‘cognitive functions’ that humans associate with the mind in learning, expression and problem solving and much more.

 AUGMENTED REALITY GAMES II Vladimir Geroimenko,2019-05-23 This is the second of two comprehensive volumes that provide a thorough and multi-faceted research into the emerging field of augmented reality games and consider a wide range of its major issues. These first ever research monographs on augmented reality games have been written by a team of 70 leading researchers, practitioners and artists from 20 countries. Volume II explores the most important and challenging issues that have been raised by the use of the augmented reality approach and technology in the gamification of education, healthcare, medicine and art. The volume deals with a systematic analysis of educational augmented reality games, their use for health promotion in old age and for improving people’s well-being, the gamification of augmented reality art and immersive reading experiences, among other topics. Augmented Reality Games II is essential reading not only for researchers, practitioners, game developers and artists, but also for students (graduates and undergraduates) and all those interested in the rapidly developing area of augmented reality games.

 ADVANCES IN DATA ANALYSIS WITH COMPUTATIONAL INTELLIGENCE METHODS Adam E Gaw da,Janusz Kacprzyk,Leszek Rutkowski,Gary G. Yen,2017-09-21 This book is a tribute to Professor Jacek  urada, who is best known for his contributions to computational intelligence and knowledge-based neurocomputing. It is dedicated to Professor Jacek  urada, full professor at the Computational Intelligence Laboratory, Department of Electrical and Computer Engineering, J.B. Speed School of Engineering, University of Louisville, Kentucky, USA, as a token of appreciation for his scientific and scholarly achievements, and for his longstanding service to many communities, notably the computational intelligence community, in particular neural networks, machine learning, data analyses and data mining, but also the fuzzy logic and evolutionary computation communities, to name but a few. At the same time, the book recognizes and honors Professor  urada’s dedication and service to many scientific, scholarly and professional societies, especially the IEEE (Institute of Electrical and Electronics Engineers), the world’s largest professional technical professional organization dedicated to advancing science and technology in a broad spectrum of areas and fields. The volume is divided into five major parts, the first of which addresses theoretic, algorithmic and implementation problems related to the intelligent use of data in the sense of how to derive practically useful information and knowledge from data. In turn, Part 2 is devoted to various aspects of neural networks and connectionist systems. Part 3 deals with essential tools and techniques for intelligent technologies in systems modeling and Part 4 focuses on intelligent technologies in decision-making, optimization and control, while Part 5 explores the applications of intelligent technologies.
