Artificial Islands Owen Hatherley,2022-08-09 Should Britain form a new union with its old 'Dominions' in Canada, Australia and New Zealand? Are they really our closest allies and relations? And is there any reason why they should want to unite again with us? Great Britain has just left one Union, after years of bitter argument and divisive posturing. But what if the island's future lies in another Union altogether, with some of its former colonial "kith and kin" across the seas? Why be in a Union with your immediate neighbours, when you could instead be in a trans-oceanic super-state with our old friends in Canada, Australia and New Zealand? Welcome to the strange world of the 'CANZUK Union', the name for a quixotic but apparently serious plan to reunify the white-majority 'Dominions' of the British Empire under the flag of low taxes, strong borders and climate change denialism. *Artificial Islands* tests the idea that Britain's natural allies and closest relations are in these three countries in North America and the Antipodes, through a good look at the histories, townscapes and spaces of several cities across the settler zones of the British Empire. These are some of the most purely artificial and modern landscapes in the world, British-designed cities that were built with extreme rapidity in forcibly seized territories on the other side of the world from Britain. Were these places really no more than just a reproduction of British Values planted in unlikely corners of the globe? How are people in Auckland, Melbourne, Montreal, Ottawa and Wellington re-imagining their own history, or their countries' role in the British Empire and their complicity in its crimes? And do they have any interest in a union with us?

**Elsewhere** Alastair Bonnett,2020-11-02 Explorer and geographer Alastair Bonnett takes us on a thought-provoking tour of the world's most fascinating islands, featuring hand-drawn maps, color photos, and stories from his travels. There are millions of islands on our planet. New islands are being built at an unprecedented rate, for tourism and territorial ambition. Many are also disappearing, besieged by rising sea levels. The story of our world's islands is one of the great dramas of our time, and it is playing out around the planet—lands are sprouting or being submerged everywhere from the South China Sea to the Atlantic. *Elsewhere* is the story of this strange and mesmerizing planetary spectacle. In this book, explorer and geographer Alastair Bonnett takes us on a thought-provoking tour of the world's most fascinating islands. He traveled the globe to provide a firsthand look at numerous islands, sketching a vivid likeness of each one he visited. From a "crannog," an ancient artificial island in a Scottish loch, to the militarized artificial islands China is building; from the disappearing islands that remain the home of native Central Americans to the ritzy new islands of Dubai; from Hong Kong to the Isles of Scilly—all have compelling stories to tell. As we journey around the world with Bonnett, he addresses urgent contemporary issues such as climate change, economic inequality, and the changing balance of world power as reflected in the fates of islands. Along the way, we also learn about the many ways islands rise and fall, the long and little-known history of human island-building and the prospect that the inland hills and valleys will one day be archipelagos. Featuring

Bonnett's charming hand-drawn maps and 33 full-color photos, Elsewhere is a captivating travel book for any armchair adventurer.

**Spoil Island** Charlie Hailey, 2013-08-01 Spoil islands are overlooked places combining dirt with paradise, waste-land with "brave new world," and wildness with human intervention. Mundane products of dredging, these islands form an uninvestigated archipelago that demonstrates the potential value and contested re-valuation of landscapes of waste. Research navigates the U.S. east coast from New York City to Key West, examines these marginalized topographies to understand emergent concerns of 21st-century placemaking, public space, and infrastructure, and discovers that spoil islands constitute an unprecedented public commons, where human agency and nature are inextricably linked.
