**The Literary Atlas of Cairo** Samia Mehrez,2010 Unlike The Literary Atlas of Cairo, which focuses on the literary geopolitics of the cityscape, this companion volume immerses the reader in the complex network of socioeconomic and cultural lives in the city. The seven chapters first introduce the reader to representations of some of Cairo's prominent profiles, both political and cultural, and their impact on the city's literary geography, before presenting a spectrum of readings of the city by its multiethnic, multinational, and multilingual writers across class, gender, and generation. Daunting images of colonial school experiences and startling contrasts of postcolonial educational realities are revealed, while Cairo's moments of political participation and oppression are illustrated, as well as the space accorded to women within the city across history and class. The city's marginals are placed on its literary map, alongside representations of the relationship between writing and drugs, and the places, paraphernalia, and products of the drug world across class and time.

*Cairo Since 1900* Mohamed Elshahed,2020-02-11 The city of a thousand minarets is also the city of eclectic modern constructions, turn-of-the-century revivalism and romanticism, concrete expressionism, and modernist design. Yet while much has been published on Cairo's ancient, medieval, and early-modern architectural heritage, the city's modern architecture has to date not received the attention it deserves. *Cairo since 1900: An Architectural Guide* is the first comprehensive architectural guide to the constructions that have shaped and continue to shape the Egyptian capital since the early twentieth century. From the sleek apartment tower for Inji Zada in Ghamra designed by Antoine Selim Nahas in 1937, to the city's many examples of experimental church architecture, and visible landmarks such as the Mugamma and Arab League buildings, Cairo is home to a rich store of modernist building styles. Arranged by geographical area, the guide includes entries for more than 220 buildings and sites of note, each entry consisting of concise, explanatory text describing the building and its significance accompanied by photographs, drawings, and maps. This pocket-sized volume is an ideal companion for the city's visitors and residents as well as an invaluable resource for scholars and students of Cairo's architecture and urban history.

**A History of Arab Graphic Design** Bahia Shehab,Haytham Nawar,2020-12-15 The first-ever book-length history of Arab graphic design PROSE AWARD WINNER, ART HISTORY & CRITICISM Arab graphic design emerged in the early twentieth century out of a need to influence, and give expression to, the far-reaching economic, social, and political changes that were taking place in the Arab world at the time. But graphic design as a formally recognized genre of visual art only came into its own in the region in the twenty-first century and, to date, there has been no published study on the subject to speak of. *A History of Arab Graphic Design* traces the people and events that were integral to the shaping of a field of graphic design in the Arab world. Examining the work of over eighty key designers from Morocco to Iraq, and covering the period from pre-1900 to the end of the twentieth century, Bahia Shehab and Haytham Nawar chart the development of design in the region, beginning with Islamic art and Arabic calligraphy, and their impact on Arab visual culture, through to the digital revolution and the arrival of the Internet. They look at how cinema, economic prosperity, and political and cultural events gave birth to and shaped the founders of Arab graphic design. Highlighting the work of key designers and stunningly illustrated with over 600 color images, *A History of Arab Graphic Design* is an invaluable resource tool for graphic designers, one which, it is hoped, will place Arab visual culture and design on the map of a thriving international design discourse.

**A Field Guide to the Street Names of Central Cairo** Humphrey Davies,2018-07-14 The map of a city is a palimpsest of its history. In Cairo, people, places, events, and even dates have lent their names to streets, squares, and bridges, only for those names often to be replaced, and then replaced again, and even again, as the city and the country imagine and reimagine their past. The resident, wandering boulevards and cul-de-sacs, finds signs; the reader, perusing novels and histories, finds references. Who were 'Abd el-Khaleq Sarwat Basha or Yusef el-Gindi that they should have streets named after them? Who was Nubar Basha and why did his street move from the north of the city to its center in 1933? Why do older maps show two squares called Bab el-Luq, while modern maps show none? Focusing on the part of the city created in the wake of Khedive Ismail's command, given in 1867, to create a "Paris on the Nile" on the muddy lands between medieval Cairo and the river, *A Field Guide to the Street Names of Cairo* lists more than five hundred current and three hundred former appellations. Current street names are listed in alphabetical order, with an explanation of what each commemorates and when it was first recorded, followed by the same for its predecessors. An index allows the reader to trace streets whose names have disappeared or that have never achieved more than popular status. This is a book that will satisfy the curiosity of all, be they citizens, long-term residents, or visitors, who are fascinated by this most multi-layered of cities and wish to understand it better.

*Scanning the Pharaohs* Zahi A. Hawass,Sahar Saleem,2016 The royal mummies in the Cairo Museum are an important source of information about the lives of the ancient Egyptians. The remains of these pharaohs and queens can inform us about their age at death and medical conditions from which they may have suffered, as well as the mummification process and objects placed within the wrappings. Using the latest technology, including Multi-Detector Computed Tomography and DNA analysis, the authors present the results of the examination of the royal mummies. New imaging techniques not only reveal a wealth of information about each mummy, but render amazingly lifelike and detailed images of the remains.

*The Arabian Horse of Egypt* ,2010 Prized for their stamina and their acclimation to the harsh conditions of the Arabian deserts, the ancestors of the horses that are now recognized as the Egyptian Arabian purebred horse entered Egypt centuries ago, establishing the valuable bloodlines of the breed there. The breeding programs in Egypt therefore became the root source for the finest Arabian horses, attracting passionate enthusiasts from all corners of the world. Artists, poets, and historians have for centuries been inspired by their great beauty and romantic legacy. Nasr Marei is the third-generation owner of a stud farm in Giza, Egypt. His love for and knowledge of the Egyptian Arabian horse, coupled with his sensitive and striking photography, have inspired this

visual tribute. His extraordinary photographs, accompanied by text that traces the history and evolution of the Arabian's journey into Egypt, celebrate the lineage of this living treasure of Egyptian heritage.

*Egypt's Housing Crisis* Yahia Shawkat, 2020-09-08 A provocative analysis of the roots of Egypt's housing crisis and the ways in which it can be tackled Along with football and religion, housing is a fundamental cornerstone of Egyptian life: it can make or break marriage proposals, invigorate or slow down the economy, and popularize or embarrass a ruler. Housing is political. Almost every Egyptian ruler over the last eighty years has directly associated himself with at least one large-scale housing project. It is also big business, with Egypt currently the world leader in per capita housing production, building at almost double China's rate, and creating a housing surplus that counts in the millions of units. Despite this, Egypt has been in the grip of a housing crisis for almost eight decades. From the 1940s onward, officials deployed a number of policies to create adequate housing for the country's growing population. By the 1970s, housing production had outstripped population growth, but today half of Egypt's one hundred million people cannot afford a decent home. Egypt's Housing Crisis takes presidential speeches, parliamentary reports, legislation, and official statistics as the basis with which to investigate the tools that officials have used to 'solve' the housing crisis—rent control, social housing, and amnesties for informal self-building—as well as the inescapable reality of these policies' outcomes. Yahia Shawkat argues that wars, mass displacement, and rural-urban migration played a part in creating the problem early on, but that neoliberal deregulation, crony capitalism and corruption, and neglectful planning have made things steadily worse ever since. In the final analysis he asks, is affordable housing for all really that hard to achieve?

**The History and Religious Heritage of Old Cairo** Gawdat Gabra, Gertrud J. M. van Loon, Stefan C. Reif, Tarek Swelim, 2013 Recipient of the 2013 PROSE Awards Architecture & Urban Planning honorable mention Just to the south of modern Cairo stands the historic enclave known as Old Cairo, which grew up in and around the Roman fortress of Babylon, and which today hosts a unique collection of monuments that attest to the shared cultural heritage of ancient Egyptians, Christians, Jews, and Muslims. In this lavishly illustrated celebration of a very special place, renowned photographer Sherif Sonbol's remarkable images of the fortress, churches, synagogue, and mosque illuminate the living fabric of the ancient and medieval stones, while Gawdat Gabra describes the history of Old Cairo from the time of the ancient Egyptians and the Romans to the founding of the first Muslim city of al-Fustat. Stefan Reif focuses on the Jewish history of the area, exploring the famous Genizah documents found in the Ben Ezra Synagogue that tell so much about everyday life in medieval Egypt. Gertrud van Loon looks at the early Coptic Christian churches, some of the oldest in the world, and Tarek Swelim describes the arrival of the Muslims in the seventh century, their establishment of al-Fustat on the edge of Old Cairo, and the building of the Mosque of 'Amr ibn al-'As, the oldest mosque in Africa.

Life Histories of Theban Tombs Andrea Loprieno-Gnirs, 2021-08-31 A thorough transdisciplinary archaeological study of the ancient Egyptian Theban rock-cut tombs at Sheikh 'Abd al-Qurna In recent years, archeological research has undergone major changes. The material turn in archaeology and related disciplines prompted the adoption of sophisticated scientific, digital, and technical approaches and methods often conducted on a micro level, enhancing our understanding of depositional processes and of the creation and life of an archeological object. This volume reflects seven seasons of transdisciplinary archaeological research at a cluster of rock-cut tombs in Sheikh 'Abd al-Qurna, an ancient Egyptian hillside cemetery and part of the much larger Theban Necropolis. Organized in twelve main chapters, Life Histories of Theban Tombs presents current investigations in landscape archaeology (including recent excavations at a large debris hill previously covering a tomb), geo- and bioarcheology, the archaeology of tomb construction, burial practices, and domestic uses as well as various epigraphical, visual, and material studies. The last two sections provide additional insight into the applied recording, surveying, and visualization methods and techniques and the database system used for data recording and organization. Rooted in the Body Lisa J White, 2021-02-09 A unique comic-illustrated exploration of the rich vocabulary derived from body parts in Arabic We are all married to our bodies, for better, for worse, for richer, for poorer, in sickness and in health. As a result, the body is a hard-wired, powerful presence in thought and speech. Rooted in the Body: Arabic Metaphor and Morphology considers this basic premise of linguistic embodiment and shows how it is especially true of Arabic. Consciously and unconsciously, speakers of Arabic use reams of vocabulary derived from the body, making it an ideal springboard for a deeper and more nuanced understanding of Arabic morphology. Structurally speaking, Arabic is a language built on abstract roots, short sequences of single consonants that are systematically modified to produce actual vocabulary. Learning to recognize and manipulate those roots is an invaluable skill, especially for non-native adult learners, because it lightens their memorization load significantly. Rooted in the Body uses delightful side-by-side essays and comic illustrations to invite readers to explore Arabic's signature morphology as they reflect on some 120 metaphorically charged body parts. On the long road to proficiency, lexical precision is important, but so, too, is cultural fluency. As it demystifies the links between morphology and semantics, Rooted in the Body also uses citations from Arabic's rich cultural history to highlight the body's vital role in language. This book will be a fascinating and invaluable resource, not only for advanced learners of Arabic but for linguists, rhetoricians, and philosophers of language.
