Bull Market The rise and eclipse of Australian stock exchanges John Tilston,2016-02-22 Stock exchanges were crucial in developing Australia by greasing the often-creaking wheels of investment. Their spluttering into life in the 1880s was fractious and disorganized, but fledgling stockbrokers couldn't ignore the need for marketplaces to trade stocks and shares in the burgeoning mining industry. They struggled through the great economic distress of the Federation Drought in the 1890s and emerged as coherent, collegiate markets based in state capitals that endured for 80 years. Globalisation and technology disrupted the stock exchanges, forcing them to amalgamate and then become public company itself. Now global banks using technology to dominate the modern era. Dark pools and high frequency trading have the ASX scrambling to stay relevant. Yet it still holds some aces: transparent pricing guides and the scaffolding to support a range of investment products. The book reviews the often turbulent history of what has become the ASX, highlighting the contribution of key individuals and events.

The Rise of New Brokerages and the Restructuring of Real Estate Value Chain Shusong Ba,Xianling Yang,2018-04-26 This book elaborates on the six pillars of a healthy and standardized real-estate brokerage industry: the generation, distribution and matching of information; the transaction system; circulation finance; mobile Internet; the supervision system; and professional brokers. With each of these pillars playing a role, they also mutually interact to constitute an integrated framework that regulates the brokerage industry. Presenting practicable, extensive and cutting-edge research that encompasses various areas of the industry and detailed case studies from around the globe, the book provides a number of suggestions that have already been adopted and have begun to take effect. It also explores the frontiers of the real-estate brokerage industry – the incorporation of the internet, the blurred boundary between online and offline service where brokerages are moving online, client acquisition is via the internet, and benchmark companies are focusing more on their trading service capacity, each

building their own controllable trading environment.
