*Understanding Babies* Ania Witkowska,2021-02-25 The first three months of your baby's life, sometimes called the 'fourth trimester', is a transitional phase, in which each of you is processing the birth experience you shared and acclimatising to a new way of being. It can be hard to interpret your new baby's behaviour: is she arching her back because she has tummy ache, or does she simply enjoy a stretch? Does sucking his hands indicate hunger or something else? As you navigate these early days your emotions might be all over the place and it can be hard to find and trust your instinctive need to connect with your baby. In *Understanding Babies*, experienced movement specialist Ania Witkowska looks at what your baby needs to thrive, and how they show you they need it, revealing how you can tune in to your baby so that both of you can relax and enjoy your new life together. By explaining how your baby's development is supported through movement and interaction, and guiding you through simple exercises and activities, she helps demystify the early days of parenting so that you can feel more joy and less anxiety as you and your baby flourish.

*Your Self-Motivated Baby* Beverly Stokes,2015-10-06 A hands-on guide for communicating with babies in their first six months and nurturing their physical, social, and cognitive development, *Your Self-Motivated Baby* shows parents and other caregivers how to interact with very young infants and understand what they are expressing in their movements. Color photographs throughout the book show babies' motivation in play and how subtle interactions build bonding and encourage development. Following advice from author Beverly Stokes, a seasoned developmental movement educator, adults learn how to relate to babies and communicate effectively with them. Beverly Stokes makes it clear that preverbal babies are giving cues for caregiver participation very early on; it's up to us to try to understand them better. By communicating with babies sensitively in the first six months of their lives, we help them to establish the foundation for a healthy, confident, and joyful life. Beverly Stokes is a leader in developmental movement education whose book *Amazing Babies Moving* has been translated into five languages and is used together with its companion video series in university graduate and undergraduate programs in early childhood education, somatic psychology, and parenting programs internationally. She lives in the San Francisco Bay Area with her partner, Dr. Louis Stokes.

It is an unprecedented, eye-opening investigation into our evolutionary instinct to rock a baby in our arms. An inspiring and easily accessible guide exploring the expressive heartbeat of human nature. Doherty provides a convincing synthesis of current scientific evidence to promote a deeply immersive and stimulating physical engagement. Fully illustrated, she introduces the reader to various carriages to dance freely with a baby, and with the use of a baby carrier. There are chapters on bonding and the importance of touch, stress reduction in baby and caregiver, specific recommendations for babies with special needs, tips on necessary back-care, and tai chi and yoga for warm-up and cool-down. Doherty offers parents and caregivers fascinating science that spans infant development, child psychology, neuroscience, cultural anthropology, music and movement therapy and much more.
