Banking Services for Everyone? Thorsten Beck, Asl? Demirgüç-Kunt, Maria Soledad Martinez Peria, 2006 Using information from 193 banks in 58 countries, the authors develop and analyze indicators of physical access, affordability, and eligibility barriers to deposit, loan, and payment services. They find substantial cross-country variation in barriers to banking and show that in many countries these barriers can potentially exclude a significant share of the population from using banking services. Correlations with bank- and country-level variables show that bank size and the availability of physical infrastructure are the most robust predictors of barriers. Further, the authors find evidence that in more competitive, open, and transparent economies, and in countries with better contractual and informational frameworks, banks impose lower barriers. Finally, though foreign banks seem to charge higher fees than other banks, in foreign dominated banking systems fees are lower and it is easier to open bank accounts and to apply for loans. On the other hand, in systems that are predominantly government-owned, customers pay lower fees but also face greater restrictions in terms of where to apply for loans and how long it takes to have applications processed. These findings have important implications for policy reforms to broaden access.

Economy Identity through Information Technology and its Safety Rachel John Robinson, This empirical research is to study Information Technology (IT) operations and security controls regarding its perception and handling mechanism. The sector chosen was relevant to a common man's daily business so that the IT controls, and organizational implications are both covered and are well aligned for protected and guarded cyber boundaries from the economic perspective in the country. With the government being well supportive in cracking a balance between the citizens' rights and the organizational sectors' responsibilities, the study is directed considering its patterns. It is arrived to find whether a particular sector in terms of Information and Communication Technology (ICT) operations has well-laid out controls and is in line with the statutes brought out by the country for compliance. The sector chosen was the Banking industry in the Finance Sector for its back-end operations. This sectoral concentration is narrowed down to commercial e-banking services and its security concerns to support customers and business operations. The future looks promising as the IT industry is gearing itself well for the next phase of development along with challenges. Through this research, internet banking and its enablers are studied to find how they protect you and me in our finance to ensure cybercafe operations

Dart: Scalable Application Development Davy Mitchell, Sergey Akopkokhyants, Ivo Balbaert, 2017-06-09 Master the art of designing web client and server with Google's bold and productive language – Dart About This Book Create robust applications with unit tests, documentation, and diagnostic logging Master the core Dart language, type system, and key development tools Connect to existing web services, process JSON, and create your own framework for the data display Use mixins, reflections, annotations, and other metadata programming techniques to create powerful app Who This Book Is For If you are familiar with web development and are looking to learn, or even just evaluate, Dart as a multipurpose language, this learning path is for you. No familiarity with the Dart language is assumed. For beginners, it will serve as a guide to rapidly accelerate from a novice level to the master level; for intermediate to advanced developers it will quickly fill in the gaps on Dart and can explore a range of application types and powerful packages that are demonstrated in a practical manner. What You Will Learn Handle form data and encryption Set up your Dart environment to achieve the highest productivity Run and debug the Dart server and web applications and compile them in JavaScript Work with PostgreSQL—an industry standard relational database system Create robust applications with unit tests, documentation, and diagnostic logging Develop command-line applications, and explore the key data structures and libraries Detect and use HTML5 features that will help you deliver rich, cross-platform content Demonstrate the power of Polymer web components for binding data and structuring your web pages In Detail Designed to create next generation apps, Google's Dart offers a much more robust framework and also supersedes JavaScript in several aspects. Familiar yet innovative, compact yet scalable, it blows away the accumulated JavaScript legacy limitations. Dart was designed for great tool-ability and developer productivity, allowing you to create better application faster than before. Google chose it for their billion dollar advertising business and you have its power for your projects too. The first module will introduce you the Dart language starting from its conception to its current form, and where it headed is through engaging substantial practical projects. You will be taken through building typical applications and exploring the exciting new technologies of HTML5. The second module will show you how to add internalization support to your web applications and how i18n and i10n access can be embedded into your code to design applications that can be localized easily. You will be shown how to organize client-to-server communication and how different HTML5 features can be used in Dart. Finally, this module will show you how you can store data locally, break the storage limit, and prevent security issues in your web application. The third module is a pragmatic guide that will increase your expertise in writing all kinds of applications, including web apps, scripts, and server-side apps. It provides rich insights on how to extend your Dart programming skills. Altogether, this course provides you the power to create powerful applications with Dart, without worrying about your knowledge leading to you having to make compromises to the end product! This Learning Path has been curated from three Packt products: Dart By Example By Davy Mitchell Mastering Dart By Sergey Akopkokhyants Dart Cookbook By Ivo Balbaert Style and approach This is an enticing learning path that starts from the very basics to gradually pick up pace as the story unfolds. The End of Negotiable Instruments James Steven Rogers,2012-01-12 In The End of Negotiable Instruments: Bringing Payments Systems Law Out of the Past, author James Rogers challenges the basic assumptions of the law of checks and notes and its history, and provides a well-reasoned account of how the law could be changed to better suit the evolution of new payment technologies. The modern American law of payment systems is in disarray. Efforts to create a unified body of law for payment systems have so far been unsuccessful. Part of the reason for that failure is the assumption that the existing law works well for the traditional paper-based check system, and that problems have been created only by the evolution of new technologies. The End of Negotiable Instruments argues that this assumption is unfounded. The basic law of checks is itself anachronistic. There are no other books that undertake a similar analysis—there are legal treatises on the law of checks and notes, but all of them take for granted the basic assumptions challenged in this book. Several articles were published in the late twentieth century concerning the dispute over the application of certain doctrines of traditional negotiable instruments law to modern consumer finance transactions, but none of this literature went on to consider the broader question of whether there is anything worthwhile left in negotiable instruments law.

Review of Some Online Banks and Visa/Master Cards Issuers Dr. Hedaya Mahmood Alasooly,2020-09-22 A digital wallet also known as e-Wallet refers to an electronic device, online service, or software program that allows one party to make electronic transactions with another party bartering digital currency units for goods and services. This can include purchasing items on-line with a computer or using a smartphone to purchase something at a store. Money can be deposited in the digital wallet prior to any transactions or, in other cases; an individual's bank account can be linked to the digital wallet. Users might also have their driver's license, health card, loyalty card(s) and other ID documents stored within the wallet. The credentials can be passed to a merchant's terminal wirelessly via near field communication (NFC). Increasingly, digital wallets are being made not just for basic financial transactions but to also authenticate the holder's credentials. For example, a digital wallet could verify the age of the buyer to the store while purchasing alcohol. The system has already gained popularity in Japan, where digital wallets are known as wallet mobiles". A crypto currency wallet is a digital wallet where private keys are stored for crypto currencies like bitcoin. Online banking, also known as internet banking or web banking, is an electronic payment system that enables customers of a bank or other financial institution to conduct a range of financial transactions through the financial institution's website. The online banking system will typically connect to or be part of the core banking system operated by a bank and is in contrast to branch banking which was the traditional way customers accessed banking services. Some banks operate as a direct bank (or "virtual bank"), where they rely completely on internet banking. Internet banking software provides personal and corporate banking services offering features such as viewing account balances, obtaining statements, checking recent transactions, transferring money between accounts, and making payments. A crypto currency exchange, or a digital currency exchange (DCE), is a business that allows customers to trade crypto currencies or digital currencies for other assets, such as conventional fiat money or other digital currencies. A crypto currency exchange can be a market maker that typically takes the bid-ask spreads as a transaction commission for is service or, as a matching platform, simply charges fees. A debit card is a payment card that deducts money directly from a consumer's checking account to pay for a purchase. Debit cards eliminate the need to carry cash or physical checks to make purchases directly from your savings. It is similar to a credit card, but unlike a credit card, the money is immediately transferred directly from the cardholder's bank account when performing any transaction A credit card is a payment card issued to users (cardholders) to enable the cardholder to pay a merchant for goods and services based on the cardholder's promise to the card issuer to pay them for the amounts plus the other agreed charges. [1] The card issuer (usually a bank) creates a revolving account and grants a line of credit to the cardholder, from which the cardholder can borrow money for payment to a merchant or as a cash advance. As Electronic banks and E-wallets and Crypto currency Exchanges are important in internet shopping and Ecommerce and crypto currency trading. We have nowadays many online payment providers and so it becomes very difficult for the users to compare in between them to choose the best in term of deposit and withdraw fees. I will not go in detail on each payment provider services, rules and fees. I will just list roughly most commonly used online payment providers for sort of comparison in between them. I will specifically compare the withdraw and deposit fees for each one. I will mention also some of the difficulties I met with some of them because lack of their services in my country Palestine. I will also show how to get Visa and Master Debit Cards online.

The Global Findex Database 2017 Asli Demirguc-Kunt, Leora Klapper, Dorothe Singer, Saniya Ansar, 2018-04-19 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.
