United States. Naval History Division

Fighting Ships of World War II J. N. Westwood, 1975 Battleships, aircraft carriers, cruisers, destroyers, submarines, and escorts.

In the Shadow of the Battleship Richard Worth, 2008-08 Participating in almost every major sea battle in World War II, cruisers found themselves pressed into a myriad of roles. They escorted battle lines, guarded convoys, patrolled oceans--even acted as mini-battleships, going toe-to-toe with dreadnoughts three times their size. Their duties ranged from the tedious but necessary to the desperate and deadly, yet history has given them little attention. *In the Shadow of the Battleship* gives these ships their due, with essays to explain the lineage and quirks that made cruisers what they were--the cornerstone of maritime supremacy.

Battleships - 200 Battleships Puzzles 12x12 Sergii Tolmachov, 2017-01-04 Battleships is a solitaire version of the classic strategy game in which you must locate and sink a hidden fleet. The numbers indicate the number of squares in each row/column that contain a ship or ship segment. Clues may indicate water, specific ships, or parts of ships. Circles indicate submarines (one-square ships). Semicircles indicate ends of larger ships. Large squares indicate ship middles. Diamonds are unspecified ship pieces. The complete list of ships is shown on the right side of the puzzle. No ship may touch another ship, even diagonally. Occasionally some squares may contain given ship or water segments as hints to help start the puzzle. The object is to discover where all ships are located.

The Battle for Leyte Gulf C. Vann Woodward, 2007-11-17 Pulitzer-Prize-winner and bestselling author C. Vann Woodward recreates the gripping account of the battle for Leyte Gulf—the greatest naval battle of World War II and the largest engagement ever fought on the high seas. For the Japanese, it represented their supreme effort; they committed to action virtually every operational fighting ship on the lists of the Imperial Navy, including two powerful new battleships of the Yamato class. It also ended in their greatest defeat—and a tremendous victory for the United States Navy. Features a new introduction by Evan Thomas, author of *Sea of Thunder*.

The Battleship Book Robert M. Farley, 2015-12-17 From the moment when the launching of HMS Dreadnought made every capital ship in the world obsolete overnight, we have been fascinated with these powerful surface combatants. Here Robert M. Farley looks at the history and folklore that makes these ships enduring symbols of national power—and sometimes national futility. From Arizona to Yamato, here are more than sixty lavishly illustrated accounts of battleships from the most well-known to the most unusual, including at least one ship from every nation that ever owned a modern battleship. Separate essays and sidebars look at events and lore that greatly affected battleships.

Russian Battleships and Cruisers of the Russo-Japanese War Mark Lardas, 2019-10-31 This book examines the major warships of the Imperial Russian Navy which participated in the Russo-Japanese War. The focus is on the battleships, coastal defence warships, and cruisers of the Pacific Squadron and Baltic Squadron that fought during the war. It discusses in detail their design and development between the years of 1885 and 1905, concentrating particularly on battleships and cruisers. The book explores, in depth, the mutually influential relationship between Russian and foreign warship design, as Russia progressed from a reliance on foreign designs and shipyards towards an ability to produce its own influential ships, such as the Novik. The title also outlines the gripping operational history of the Russian warships which participated in the Russo-Japanese war, tracing their activity before and during the combat, as well as the post-war fate of those ships which were bombarded, scuttled, captured, or salvaged. Packed with contemporary photography and full-colour illustrations, this title offers a detailed and definitive guide to the design, development, and destiny of the Russian warships which battled the Japanese in the Eastern seas.

US Fast Battleships 1936–47 Lawrence Burr, 2011-12-20 This volume details the design, construction, and operation of the first six of the ten US fast battleships, two of the North Carolina class and four of the South Dakota class. These six battleships were all authorized in 1936 and were the first vessels built in the US since 1923. Consequently, these ships benefitted from enormous technological leaps, with improvements in ship design, power, armor, armament and the single most important improvement the use of radar guided fire control helping to change the course of the war in the Pacific. Packed with first-hand accounts, battle reports, and specially created artwork this book tells the story of these war-winning vessels.
