Regulated Chemicals Directory 1994 ChemADVISOR Inc. Staff, 2012-12-06 The  
Regulated Chemicals Directory<sup>TM</sup> is meant to be a convenient source of  
information for everyone who needs to keep up-to-date regarding the  
regulations and recommendations that pertain to chemical substances. The  
RCDTM is designed to be the first reference book to consult when beginning  
compliance efforts. Every regulatory or advisory list used in the RCDTM is  
keyed to its source, to help readers who need more detailed information on  
regulations, recommendations, or guidelines readily locate source documents.  
Some organizations now center their compliance efforts on computerized  
information stored in cross-referenced databases. A unique feature of the  
RCDTM is the availability of an electronic version suitable for use on IBM-  
compatible personal computers, download onto mainframes and CD-ROM players.  
Both the print and electronic versions are updated with the same timeliness.  
For more information on the electronic versions of the Regulated Chemicals

DirectoryTM, contact Chapman & Hall directly (One Penn Plaza, New York, NY 10119, fax-212-564-1505). Many companies working on product development need information on what may be regulated in the future. The RCDTM provides selected information on pending regulations and in-progress testing lists, which can provide a starting place for tracking future regulatory considerations. Information for the RCDTM is continually gathered and updated. Suggestions from readers for information that should be added to the RCDTM or for other ways to improve the book are welcomed by Chapman & Hall. - Patricia L. Dsida, Pres. **Word-Formation in the World's Languages** Pavol Štekauer, Salvador Valera, Lívia Kőrtvélyessy, 2012-04-23 A pioneering book establishing the foundations for research into word-formation typology and tendencies. It fills a gap in cross-linguistic research by being the first systematic survey of the word-formation of the world's languages. Drawing on over 1500 examples from fifty-five languages, it provides a wider global representation than any other volume. This data, from twenty-eight language families and forty-five language genera, reveals associations between word-formation processes in genetically and geographically distinct languages. Data presentation from two complementary perspectives, semasiological and onomasiological, shows both the basic functions of individual word-formation processes and the ways of expressing selected cognitive categories. Language data was gathered by way

of detailed questionnaires completed by over eighty leading experts on the languages discussed. The book is aimed at academic researchers and graduate students in language typology, linguistic fieldwork and morphology.
