China's Export Miracle Noel Tracy,Thomas Chan,Zhu Wenhui,1999-06-30 An analysis of the causes and consequences of China's transformation from a minor player to the world's tenth largest trader in less than two decades. It locates the transformation in the synergy created by new forces unleashed in China and their interaction with entrepreneurs in Hong Kong, Taiwan and Southeast Asia, who invested capital, transferred production facilities and provided the marketing channels by which Chinese goods reached world markets. The book also examines the dynamics behind Japan's increasing role in China's foreign trade in the late 1990s and the growing trade friction between China and the United States, which it argues is produced by the failure of the latter to recognise the dynamics of China's export growth.

Flora Reipublicae Popularis Sinicae Zhengyi Wu,Peter H. Raven,Missouri Botanical Garden,1994 Includes all the vascular plants of China with brief descriptions, identification keys, essential synonymy, phenology, provincial distribution in China, brief statements on extra-Chinese distribution, and remarks regarding the circumscription of problematical taxa.

Suspended Music Lothar von Falkenhausen,1994-03-16 The Chinese made the world's first bronze chime-bells, which they used to perform ritual music, particularly during the Shang and Zhou dynasties (ca. 1700-221 B.C.). Lothar von Falkenhausen's rich and detailed study reconstructs how the music of these bells—the only Bronze Age instruments that can still be played—may have sounded and how it was conceptualized in theoretical terms. His analysis and discussion of the ritual, political, and technical aspects of this music provide a unique window into ancient Chinese culture. This is the first interdisciplinary perspective on recent archaeological finds that have transformed our understanding of ancient Chinese music. Of great significance to the understanding of Chinese culture in its crucial formative stage, it provides a fresh point of departure for exploring later Asian musical history and offers great possibilities for comparisons with music worldwide.

Encyclopedia of Traditional Chinese Medicines - Molecular Structures, Pharmacological Activities, Natural Sources and Applications Jiaju Zhou,Guirong Xie,Xinjian Yan,2011-02-21 This set of six volumes provides a systematic and standardized description of 23,033 chemical components isolated from 6,926 medicinal plants, collected from 5,535 books/articles published in Chinese and international journals. A chemical structure with stereo-chemistry bonds is provided for each chemical component, in addition to conventional information, such as Chinese and English names, physical and chemical properties. It includes a name list of medicinal plants from which the chemical component was isolated. Furthermore, abundant pharmacological data for nearly 8,000 chemical components are presented, including experimental method, experimental animal, cell type, quantitative data, as well as control compound data. The seven indexes allow for complete cross-indexing. Regardless whether one searches for the molecular formula of a compound, the pharmacological activity of a compound, or the English name of a plant, the information in the book can be retrieved in multiple ways.

Rhetoric in Ancient China, Fifth to Third Century B.C.E Xing Lu, 2022-03-10

Xing Lu examines language, art, persuasion, and argumentation in ancient China and offers a detailed and authentic account of ancient Chinese rhetorical theories and practices within the society's philosophical, political, cultural, and linguistic contexts. She focuses on the works of five schools of thought and ten well-known Chinese thinkers from Confucius to Han Feizi to the the Later Mohists. Lu identifies seven key Chinese terms pertaining to speech, language, persuasion, and argumentation as they appeared in these original texts, selecting *ming bian* as the linchpin for the Chinese conceptual term of rhetorical studies. Lu compares Chinese rhetorical perspectives with those of the ancient Greeks, illustrating that the Greeks and the Chinese shared a view of rhetoric as an ethical enterprise and of speech as a rational and psychological activity. The two traditions differed, however, in their rhetorical education, sense of rationality, perceptions of the role of language, approach to the treatment and study of rhetoric, and expression of emotions. Lu also links ancient Chinese rhetorical perspectives with contemporary Chinese interpersonal and political communication behavior and offers suggestions for a multicultural rhetoric that recognizes both culturally specific and transcultural elements of human communication.
