The Blue Compendium Jane Lubchenco,Peter M. Haugan,2023-05-24 Home to over 80 percent of all life on Earth, the ocean is the world's largest carbon sink and a key source of food and economic security for billions of people. The relevance of the ocean for humanity's future is undisputed. However, the ocean's great potential to drive economic growth and equitable job creation, sustain healthy ecosystems, and mitigate climate change is not yet fully recognised. Lack of awareness of this potential as well as management and governance challenges pose impediments. Until these impediments are removed, ocean ecosystems will continue to be degraded and opportunities for people lost. A transition and a clear path to a thriving and vibrant relationship between humans and the ocean are urgently needed. This open access collection of papers and reports identifies a path that is inspired by science, energised by engaged people, and emboldened by visionary leaders. These assessments of knowledge are commissioned by the High Level Panel for a Sustainable Ocean Economy (Ocean Panel), which was established in September 2018 as a unique initiative led by heads of state and government from around the world, to showcase the latest leading-edge science, knowledge and state-of-the-art thinking on key ocean issues. Altogether, The Blue Compendium offers innovative ocean solutions in technology, policy, governance, and finance realms, that could help accelerate a transition to a more sustainable and prosperous relationship with the ocean. The comprehensive assessments have already informed policy making at the highest levels of government and motivated an impressive array of responsive and ambitious action across a growing network of leaders in business, finance and civil society.

As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. How I Became a Quant reveals the faces behind the quant revolution, offering you?the?chance to learn firsthand what it's like to be a?quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.

Regulating Open Banking Chang-Hsien Tsai,Kuan-Jung Peng,2022-11-29 FinTech transformations have brought changes to the global financial markets and merit the attention of financial regulators across jurisdictions. This book is one of the first ones of its kind to look at open banking (OB). It examines regulatory approaches to OB by taking a broad view of comparative legal systems and through perspectives of transaction costs, public choice, and institutional design. The book looks at the legal implications by engaging in a two-tiered comparative analysis: comparing between compulsory and voluntary approaches to OB policies and comparing the legal systems between the West (i.e., the EU and the UK) and an Asian economy (i.e., Taiwan).

Revisiting Risk-Weighted Assets Vanessa Le Leslé,Ms.Sofiya Avramova,2012-03-01 In this paper, we provide an overview of the concerns surrounding the variations in the calculation of risk-weighted assets (RWAs) across banks and jurisdictions and how this might undermine the Basel III capital adequacy framework. We discuss the key drivers behind the differences in these calculations, drawing upon a sample of systemically important banks from Europe, North America, and Asia Pacific. We then discuss a range of policy options that could be explored to fix the actual and perceived problems with RWAs, and improve the use of risk-sensitive capital ratios.

The Alchemists Neil Irwin,2013-04-04 When the first fissures became visible to the naked eye in August 2007, suddenly the most powerful men in the world were three men who were never elected to public office. They were the leaders of the world's three most important central banks: Ben Bernanke of the U.S. Federal Reserve, Mervyn King of the Bank of England, and Jean-Claude Trichet of the European Central Bank. Over the next five years, they and their fellow central bankers deployed trillions of dollars, pounds and euros to contain the waves of panic that threatened to bring down the global financial system, moving on a scale and with a speed that had no precedent. Neil Irwin's The Alchemists is a gripping account of the most intense exercise in economic crisis management we've ever seen, a poker game in which the stakes have run into the trillions of dollars. The book begins in, of all places, Stockholm, Sweden, in the seventeenth century, where central banking had its rocky birth, and then progresses through a brisk but dazzling tutorial on how the central banker came to exert such vast influence over our world, from its troubled beginnings to the Age of Greenspan, bringing the reader into the present with a marvelous handle on how these figures and institutions became what they are – the possessors of extraordinary power over our collective fate. What they chose to do with those powers is the heart of the story Irwin tells. Irwin covered the Fed and other central banks from the earliest days of the crisis for the Washington Post, enjoying privileged access to leading central bankers and people close to them. His account, based on reporting that took place in 27 cities in 11 countries, is the holistic, truly global story of the central bankers' role in the world economy we have been missing. It is a landmark reckoning with central bankers and their power, with the great financial crisis of our time, and with the history of the relationship between capitalism and the state. Definitive, revelatory, and riveting, The Alchemists shows us where money comes from—and where it may well be going.

The Withdrawal of Correspondent Banking Relationships Mrs.Michaela Erbenova,Ms.Yan Liu,Mr.Nadim Kyriakos-Saad,Aledjandro Lopez Mejia,Jose Giancarlo Gasha,Mr.Emmanuel Mathias,Mr.Mohamed Norat,Ms.Francisca Fernando,Ms.Yasmin Almeida,2016-06-30 This paper focuses on the withdrawal of correspondent banking relationships (CBRs) in some jurisdictions post-global financial crisis. It describes existing evidence and consequences of the withdrawal of CBRs and explores drivers of this phenomenon drawing on recent surveys and select country information. While the withdrawal of CBRs has reached a critical level in some affected countries, which can have a systemic impact if unaddressed, macroeconomic consequences have not been identified so far at a global level. The paper presents responses from the international community to address this phenomenon, and explains the role that the IMF has been playing in this global effort, especially with regards to supporting member countries in the context of surveillance and technical assistance, facilitating dialogue

among stakeholders, and encouraging data gathering efforts. The paper concludes by suggesting policy responses by public and private sector stakeholders needed to further mitigate potential negative impacts that could undermine financial stability, inclusion, growth and development goals.

Women, Business and the Law 2021 World Bank,2021-04-05 Women, Business and the Law 2021 is the seventh in a series of annual studies measuring the laws and regulations that affect women’s economic opportunity in 190 economies. The project presents eight indicators structured around women’s interactions with the law as they move through their lives and careers: Mobility, Workplace, Pay, Marriage, Parenthood, Entrepreneurship, Assets, and Pension. This year’s report updates all indicators as of October 1, 2020 and builds evidence of the links between legal gender equality and women’s economic inclusion. By examining the economic decisions women make throughout their working lives, as well as the pace of reform over the past 50 years, Women, Business and the Law 2021 makes an important contribution to research and policy discussions about the state of women’s economic empowerment. Prepared during a global pandemic that threatens progress toward gender equality, this edition also includes important findings on government responses to COVID-19 and pilot research related to childcare and women’s access to justice.

World Development Report 2020 World Bank,2019-11-19 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.
