Reference and Information Services Melissa A. Wong, Laura Saunders, 2020-05-04 This revised and updated sixth edition of *Reference and Information Services* continues the book's rich tradition, covering all phases of reference and information services with less emphasis on print and more emphasis on strategies and scenarios. *Reference and Information Services* is the go-to textbook for MSLIS and i-School courses on reference services and related topics. It is also a helpful handbook for practitioners. Authors include LIS faculty and professionals who have relevant degrees in their areas and who have published extensively on their topics. The first half of the book provides an overview of reference services and techniques for service provision, including the reference interview, ethics, instruction, reader's advisory, and services to diverse populations including children. This part of the book establishes a foundation of knowledge on reference service and frames each topic with ethical and social justice perspectives. The second part of the book offers an overview of the information life cycle and dissemination of information, followed by an in-depth examination of information sources by type—including dictionaries, encyclopedias, indexes, and abstracts—as well as by broad subject areas including government, statistics and data, health, and legal information. This second section introduces the tools and resources that reference professionals use to provide the services described in the first half of the text.

Guides to Library Collection Development John Thomas Gillespie, Ralph J. Folcarelli, 1994-08-15 Intended to enhance collection development in school, public, and college libraries, this volume lists and annotates approximately 1,500 significant bibliographies published from 1985 through 1993, with some earlier but still useful publications. Annotations indicate scope of the work, size (often the number of entries), kinds of material included, purpose, arrangement, nature of entries, indexes, special features, and a recommendation. Author, title, and subject indexes provide easy access to the entries. With its deep and comprehensive coverage, this work will help not only in the process of selecting and acquiring materials for the library but also in the process of identification of items for reference, readers' advisory, interlibrary loan, and collection evaluation.
