*The C-Word* Lisa Lynch, 2015-04-23 Updated with new material, The C Word is the incredibly moving, darkly humorous account of one woman's fight against breast cancer. Now a BBC Drama starring Sheridan Smith. The last thing Lisa Lynch had expected to put on her 'things to do before you're 30' list was beating breast cancer, but then's the breaks. So with her life on hold, and her mind stuffed with unspoken fears, questions and emotions, she turned to her computer and started blogging about the frustrating, life-altering, sheer pain-in-the-arse inconvenience of getting breast cancer at the age of 28. The C-Word is an unflinchingly honest and darkly humorous account of Lisa's battle with The Bullshit, as she came to call it. From the good days when she could almost pretend it wasn't happening, to the bad days, when she couldn't bear to wake up, Lisa's story is emotional, heartbreaking and often hilarious. The C-Word will make you laugh and cry, and ultimately reaffirm your faith in life.

**The Secret Power of Blogging** Bruce C. Brown, 2008 Blog is short for Weblog. A Weblog is a journal (or type of newsletter) that is updated often and intended for the general public. Blogs generally represent the personality of the author or the website owner. In a recent study by the Pew Internet; American Life Project estimated that the U.S. blog population has grown to about 12 million Americans, some 8% of U.S. Internet users. The number of U.S. blog readers was estimated at 57 million (39% of the U.S. online population). If you have a product, service, brand, or cause that you want to market inexpensively online to the world, you need to look into starting a blog. It is an ideal marketing vehicle. You can use it to share your expertise, grow market share, spread your message, and establish yourself as an expert in your field for virtually no cost. A blog helps your site to rank higher in the search engines because Google and other search engines provide references to blogs and their content. Tiny one-person part-time businesses and mega companies like Microsoft, Apple, Nike, General Motors, Amazon.com, and Yahoo! use blogs as well. Most Fortune 1000 firms are using responsible blog marketing as well as advertising on blogs for one simple reason: it works! It generates profits immediately and consistently! In addition, many blogs earn additional revenue by selling advertising space on their niche-targeted blog. Atlantic Publishing is a small, independent publishing company based in Ocala, Florida. It does so by assuming C++11 knowledge. Elements of the standards between C++11 and C++20 will be briefly introduced, if necessary. However, the focus is on teaching the features of C++20. You will start with learning about the so-called big four Concepts, Coroutines, `std::ranges`, and modules. The big four are followed by smaller yet not less important features. You will learn about `std::format`, the new way to format a string in C++. In chapter 6, you will learn about a new operator, the so-called spaceship operator, which makes you write less code. You then will look at various improvements of the language, ensuring more consistency and reducing surprises. You will learn how lambdas improved in C++20 and what new elements you can now pass as non-type template parameters. Your next stop is the improvements to the STL. Of course, you will not end this book without learning about what happened in the `constexpr`-world.

But when 2000 dawns, Els is mourning her fiancé and her father, and she's unemployed, broke, and sharing an antique plantation house on the Caribbean island of

Nevis with the ghost—or “jumbie”—of Jack Griggs, the former owner. Jack’s jumbie wangles Els’s help in making amends for wrongs committed during his Casanova life, and in exchange he appoints himself Cupid on behalf of a charter captain who’s as skittish about vulnerability as Els. Meanwhile, Els lures her mother to Nevis in hopes of unraveling the family secrets—but will the shocking truth set her free, or pull her fragile new happiness apart? A moving and lyrical novel that transports readers from lush tropics to rugged highlands and back again, *The Moon Always Rising* explores how the power of forgiveness can help even the most damaged person fix whatever is broken.

Advances in Social Computing Sun-Ki Chai, John Salerno, Patricia L. Mabry, 2010-04-08 Social computing is concerned with the study of social behavior and social context based on computational systems. Behavioral modeling provides a representation of the social behavior, and allows for experimenting, scenario planning, and deep understanding of behavior, patterns, and potential outcomes. The pervasive use of computer and Internet technologies by humans in everyday life provides an unprecedented environment of various social activities that, due to the platforms under which they take place, generate large amounts of stored data as a by-product, often in systematically organized form. Social computing facilitates behavioral modeling in model building, analysis, pattern mining, and prediction. Numerous interdisciplinary and interdependent systems are created and used to represent the various

social and physical systems for investigating the interactions between groups, communities, or nation-states. This requires joint efforts to take advantage of the state-of-the-art research from multiple disciplines improving social computing and behavioral modeling in order to document lessons learned and develop novel theories, experiments, and methodologies to better explain the interaction between social (both informal and institutionalized), psychological, and physical mechanisms. The goal is to enable us to experiment, create, and recreate an operational environment with a better understanding of the contributions from each individual discipline, forging joint interdisciplinary efforts. This volume comprises the proceedings of the third international workshop on Social Computing, Behavioral Modeling and Prediction, which has grown tremendously.

**Red Ice Run** Craig Saunders, Ryan C. Thomas, 2019-09-27 It's snowing like crazy in Chicago on a bad day for mob brothers Mallory and Kelly. They're the kind of guys people move aside for, if they know what's what. Makes no difference to the brothers what the weather does, though. It's just another day, just one more body on the floor. At least it was, 'til everyone started gunning for them. Who'd want to kill them? They're nice guys. That ain't the worst of it, either. It's not just the mob out for their blood. A giant Viking is trying to take their heads off, which is odd. Throw in a bag full of glowing wood, an Irish sword-wielding hitman, and a junkie femme fatale, and it's not just a bad day, it's the worst. When night falls, though, it's not only blood staining the snowy city streets. The ice itself is turning red and whatever comes after worst...? This is definitely that.
