Chris Carter

Charles Ives in the Mirror David C Paul, 2013-04-01 In this sweeping survey of intellectual and musical history, David C. Paul tells the new story of how the music of American composer Charles Ives (1874–1954) was shaped by shifting conceptions of American identity within and outside of musical culture. Paul focuses on the critics, composers, performers, and scholars whose contributions were most influential in shaping the critical discourse on Ives, many of them marquee names of American musical culture themselves, including Henry Cowell, Aaron Copland, Elliott Carter, and Leonard Bernstein. Paul explores both how Ives positioned his music amid changing philosophical and aesthetic currents and how others interpreted his contributions to American music. Although Ives's initial efforts to find a public in the early twenties attracted a few devotees, the resurgence of interest in the American literary past during the thirties made a concert staple of his Concord Sonata, a work dedicated to nineteenth-century transcendentalist writers. Paul shows how Ives was subsequently deployed as an icon of American freedom during the early Cold War period and how he came to be instigated at the head of a line of American maverick composers. Paul also examines why a recent cadre of scholars has beset the composer with Gilded Age social anxieties.

The Mirror: Broken Wish Julie C. Dao, 2020-10-06 Sixteen-year-old Elva has a secret. She has visions and strange powers that she will do anything to hide. She knows the warnings about what happens to witches in their small village of Hanau. She's heard the terrible things people say about the Witch of the North Woods, and the malicious hunts that follow. But when Elva accidentally witnesses a devastating vision of the future, she decides she has to do everything she can to prevent it. Tapping into her powers for the first time, Elva discovers a magical mirror and its owner-none other than the Witch of the North Woods herself. As Elva learns more about her burgeoning magic, and the lines between hero and villain start to blur, she must find a way to right past wrongs before it's too late. The Mirror: Broken Wish

marks the first book in an innovative four-book fairy-tale series written by Julie C. Dao, Dhonielle Clayton, Jennifer Cervantes, and L. L. McKinney, following one family over several generations, and the curse that plagues it.

Mirror Symmetry Kentaro Hori, Rahul Pandharipande, 2003 This thorough and detailed exposition is the result of an intensive month-long course on mirror symmetry sponsored by the Clay Mathematics Institute. It develops mirror symmetry from both mathematical and physical perspectives with the aim of furthering interaction between the two fields. The material will be particularly useful for mathematicians and physicists who wish to advance their understanding across both disciplines. Mirror symmetry is a phenomenon arising in string theory in which two very different manifolds give rise to equivalent physics. Such a correspondence has significant mathematical consequences, the most familiar of which involves the enumeration of holomorphic curves inside complex manifolds by solving differential equations obtained from a "mirror" geometry. The inclusion of D-brane states in the equivalence has led to further conjectures involving calibrated submanifolds of the mirror pairs and new (conjectural) invariants of complex manifolds: the Gopakumar-Vafa invariants. This book gives a single, cohesive treatment of mirror symmetry. Parts 1 and 2 develop the necessary mathematical and physical background from "scratch". The treatment is focused, developing only the material most necessary for the task. In Parts

3 and 4 the physical and mathematical proofs of mirror symmetry are given. From the physics side, this means demonstrating that two different physical theories give isomorphic physics. Each physical theory can be described geometrically, and thus mirror symmetry gives rise to a "pairing" of geometries. The proof involves applying $R \rightarrow 1/R$ circle duality to the phases of the fields in the gauged linear sigma model. The mathematics proof develops Gromov-Witten theory in the algebraic setting, beginning with the moduli spaces of curves and maps, and uses localization techniques to show that certain hypergeometric functions encode the Gromov-Witten invariants in genus zero, as is predicted by mirror symmetry. Part 5 is devoted to advanced topics. This one-of-a-kind book is suitable for graduate students and research mathematicians interested in mathematics and mathematical and theoretical physics.

Homological Mirror Symmetry and Tropical Geometry

Ricardo Castano-Bernard, Fabrizio Catanese, Maxim Kontsevich, Tony Pantev, Yan Soibelman, Ilia Zharkov, 2014-10-07
The relationship between Tropical Geometry and Mirror Symmetry goes back to the work of Kontsevich and Y. Soibelman (2000), who applied methods of non-archimedean geometry (in particular, tropical curves) to Homological Mirror Symmetry. In combination with the subsequent work of Mikhalkin on the "tropical" approach to Gromov-Witten theory and the work of Gross and Siebert, Tropical Geometry has now become a powerful tool. Homological Mirror Symmetry is the area of mathematics concentrated around several categorical equivalences connecting symplectic and holomorphic (or algebraic) geometry. The central ideas first appeared in the work of Maxim Kontsevich (1993).

Roughly speaking, the subject can be approached in two ways: either one uses Lagrangian torus fibrations of Calabi-Yau manifolds (the so-called Strominger-Yau-Zaslow picture, further developed by Kontsevich and Soibelman) or one uses Lefschetz fibrations of symplectic manifolds (suggested by Kontsevich and further developed by Seidel). Tropical Geometry studies piecewise-linear objects which appear as “degenerations” of the corresponding algebro-geometric objects.

Mirror Talk C. Boogie, 2020-12-31 The Second installment of the Dom Game Division Book Series: *Mirror Talk* is a deeper look within, pushing you to recognize who you are your purpose moving forward, leaving your past behind, and forgetting those fears that held you back. You are a reflection of what you bring into the world. Your body, mind and spirit follows you where you go. You are not only what you ATTRACT, you are what you EXTRACT, meaning, whatever is inside of YOU is what you are ultimately putting out to the world and people around you.

Eyes in the Mirror Albert C. Moore, 2018-01-20 Zach and

Samantha Morgan are young urban professionals expecting their second child. But when their amniocentesis test reveals devastating news, they are thrown into complete turmoil. Sams doctor gives them less than twenty-four hours to choose whether or not to terminate the pregnancy. Then an accident renders Zach unconscious on the bathroom floor. This sends a signal to his Soul, Domini, to take him to the Swing Between Worlds, the dimension where Souls design their human incarnations. He undergoes eleven initiations to review his life and gain a broader perspective about himself and humankind. In the twelfth initiation, he meets the Soul of their unborn child. Zach thus earns the right to tour the City of Union, on New Earth, where he learns how our social and physical systems can change to reflect the expansive self-awareness of the people, transforming Earth to paradise. When he is finally returned to his body, he revisits the dilemma of what to do about his and Sams unborn child but with a fresh perspective. In this novel, as a young couple faces a choice regarding their severely deformed fetus, one of them experiences a spiritual journey that changes his view of the world. The debut novel by architect-turned-author Moore is a mystic-inspirational piece laden with autobiographical detail in the same vein as works by Dan Millman and Richard Bach. a well-described memoir of pain and triumph in the Tobias Wolff mold even as it bounds ahead in the final chapters into a fantastically distant future utopian America on New Earth, where humans have finally embraced inner godliness (and really good architecture). Well-constructed entry in the New Age/inspirational genre. Kirkus Review
