Murders Most Foul Alanna Knight,2013-01-28 1861. When the body of an unknown woman is found in an Edinburgh close, Detective Constable Faro assumes the killing is a random act of violence - until he finds a playing card, the nine of diamonds, underneath her corpse. His superiors scoff at his suspicions of a serial killer, but days later a man is attacked in the street, and left badly bruised and battered with the nine of diamonds in his pocket. Faro believes there's a connection. He must contend with other problems, though, if he is to solve the case. Detective Sergeant Gosse does his best to frame suspect after suspect, but remains constantly irritated by his detective constable. And although Faro's sweetheart Lizzie loves him deeply, he is not sure if he feels the same way. And what of Inga St Ola, Faro's first and only true love from his native Orkney? Amongst all this, a servant at Lizzie's place of work goes missing. Could her disappearance be linked to the playing-card killer? Beset by hostile superiors and a police-hating public, Faro feels he may never crack this confounding case.

Angels and Demons in Art Rosa Giorgi,2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

Learning with Information Systems Simon Bell,2013-02-01 In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Ethnicity and Kinship in North American and European Literatures Silvia Schultersandl,Klaus Rieser,2021-03-17 This edited collection applies kinship as an analytical concept to better understand the affective economies, discursive practices, and aesthetic dimensions through which cultural narratives of belonging establish a sense of intimacy and affiliation. In North American and European ethnic literatures, kinship has several social functions: negotiating diasporic belonging in and outside of the perimeters of bloodlines and genealogy; positioning queer-feminist interventions to counter ethno-nationalist narratives of belonging; challenging liberal sentimentalist narratives, such as those grafted onto the bodies of transnational adoptees; re-formulating cultural heterogeneity through interracial and interethnic kinship constellations outside either post-racial assumptions about colorblindness or celebrations of racial and ethnic pluralism. In all of these cases, kinship features as a common theme through which contemporary authors attend to challenges of conscribing individuals into inclusive, counter-hegemonic cultural narratives of belonging.
