**Calgary's Electric Transit** Colin K. Hatcher,2009 Calgary's Electric Transit is the story of electric street railway, trolleybus and light rail vehicle transit in Canada's western city of Calgary, Alberta.Calgary was founded in 1875, when the North West Mounted Police established a new fort Fort Calgary. A big boost for Calgary came eight years later, when the Canadian Pacific Railway building westward to the Pacific reached the Bow River in 1883. Calgary became an important centre for Canadian Pacific operations and has since become the railway's headquarters location. By 1909, Calgary boasted a population of 30, 000 people. In July of that year the Calgary Electric Railway began operations with two cars, sixteen employees and three miles of track. The system quickly grew and the following year became known as the Calgary Municipal Railway. Through its forty years of street railway service, Calgary acquired passenger cars from such well-known Canadian builders as Ottawa Car Manufacturing Company, Preston Car & Coach Company and the Canadian Car & Foundry. In addition, the system's roster included used cars from several sources in the United States. Totalling 113 cars in all plus a scenic car it has been a daunting task to secure photos for this book. Many superb images have been discovered, illustrating the operation of streetcars in different sections of the city. There are over 150 streetcar photos. Finding trolleybus photographs has been a challenge as well, but the authors have succeeded in gathering a fine selection representing all classes of 'trackless trolley' coaches purchased new and acquired used from other US systems. You'll see streetcars and trolleybuses operating in the city centre, in the rural suburbs, and in residential neighbourhoods. Coverage of today's modern rail transit cars is outstanding. Now called 'light rail vehicles', all classes of these LRVs are represented, operating in all seasons, and over most portions of the system, illustrating the many varied and unique Calgary urban environments. Rich, carefully composed black and white photos are rounded out with a fine showing of subjects in colour. There's a variety of photos to interest everyone with an interest in the development of Calgary as a city: the construction of 'The Bay', early scenes in Bowness Park, and some views of the streetcars serving seemingly unpopulated fields that today are thriving subdivisions. Whether you're a railway enthusiast or simply interested in Calgary's history, you'll find Colin Hatcher and Tom Schwarzkopf's 200-page account of Calgary's Electric Transit a fascinating, informative and enjoyable reading experience.

*Computer-Aided Transit Scheduling* Martin Desrochers, Jean-Marc Rousseau, 2012-12-06 This volume consists of papers presented at the Fifth International Workshop on Computer Aided Scheduling of Public Transport, which was held in Montreal from August 19th to the 23rd, 1990. Since the first Workshop in Chicago in 1975 the field had matured considerably. In 1975, there were no presentations that described systems which had been implemented and used on a regular basis. By 1980, in Leeds, and certainly by 1983, in Montreal, several systems were in regular use. They were based on both heuristics and mathematical programming techniques. In 1990, there were more than one hundred transit companies using computer-aided scheduling tools in their regular operations. The scope of the Workshop was broadened in 1987, in Hamburg, so that topics related to scheduling may be introduced. We find, for example, in this book several papers on the technology related to the collection of data and/or the data bases required for scheduling and planning activities.
