Transition to Advanced Mathematics Danilo R. Diedrichs, Stephen Lovett, 2022-05-22 This unique and contemporary text not only offers an introduction to proofs with a view towards algebra and analysis, a standard fare for a transition course, but also presents practical skills for upper-level mathematics coursework and exposes undergraduate students to the context and culture of contemporary mathematics. The authors implement the practice recommended by the Committee on the Undergraduate Program in Mathematics (CUPM) curriculum guide, that a modern mathematics program should include cognitive goals and offer a broad perspective of the discipline. Part I offers: An introduction to logic and set theory. Proof methods as a vehicle leading to topics useful for analysis, topology, algebra, and probability. Many illustrated examples, often drawing on what students already know, that minimize conversation about doing proofs. An appendix that provides an annotated rubric with feedback codes for assessing proof writing. Part II presents the context and culture aspects of the transition experience, including: 21st century mathematics, including the current mathematical culture, vocations, and careers. History and philosophical issues in mathematics. Approaching, reading, and learning from journal articles and other primary sources. Mathematical writing and typesetting in LaTeX. Together, these Parts provide a complete introduction to modern mathematics, both in content and practice. A Badge of Injury Sébastien Tremblay, 2023-12-04 A Badge of Injury is a contribution to both the fields of queer and global history. It analyses gay and lesbian transregional cultural communication networks from the 1970s to the 2000s, focusing on the importance of National Socialism, visual culture, and memory in the queer Atlantic. Provincializing Euro-American queer history, it illustrates how a history of concepts which encompasses the visual offers a greater depth of analysis of the transfer of ideas across regions than texts alone would offer. It also underlines how gay and lesbian history needs to be reframed under a queer lens and understood in a global perspective. Following the journey of the Pink Triangle and its many iterations, A Badge of Injury pinpoints the roles of cultural memory and power in the creation of gay and lesbian transregional narratives of pride or the construction of the historical queer subject. Beyond a success story, the book dives into some of the shortcomings of Euro-American queer history and the power of the negative, writing an emancipatory yet critical story of the era.
