The Easter Egg Jan Brett,2017-01-17 Add some kindness to your Easter baskets with Jan Brett's beloved Easter tale If Hoppi can make the best Easter egg, he will get to help the Easter Bunny with his deliveries on Easter morning. But it is not so easy. Discouraged, he goes into the woods to think when a blue robin's egg tumbles out of its nest. Hoppi keeps it safe and warm until the baby bird hatches. When the Easter Bunny arrives and Hoppi presents the empty blue eggshell, the Easter Bunny declares it the very best one to reward Hoppi for his kindness. Spring is everywhere in gorgeous illustrations framed with pussy willows, flowering vines and flowers. Side borders feature busy rabbits making their unusual eggs and, in a border above, the Robin's family drama unfolds. Jan Brett's lovable bunny hero and her remarkable Easter Bunny will enchant young readers.

Catch that Egg! Lucy Rowland (Children's author),2019 Floppit's farmyard friends have had enough of his enormous bunny feet. STOP THAT, FLOPPIT! they sigh, every time he comes bouncing by. But his big clumsy feet might just save the day when Chicken's egg runs away ... Help Floppit the big-footed bunny stop that egg in this fun farmyard egg chase.

Deep Learning Andrew Glassner,2021-06-22 A richly-illustrated, full-color introduction to deep learning that offers visual and conceptual explanations instead of equations. You'll learn how to use key deep learning algorithms without the need for complex math. Ever since computers began beating us at chess, they've been getting better at a wide range of human activities, from writing songs and generating news articles to helping doctors provide healthcare. Deep learning is the source of many of these breakthroughs, and its remarkable ability to find patterns hiding in data has made it the fastest growing field in artificial intelligence (AI). Digital assistants on our phones use deep

learning to understand and respond intelligently to voice commands; automotive systems use it to safely navigate road hazards; online platforms use it to deliver personalized suggestions for movies and books - the possibilities are endless. Deep Learning: A Visual Approach is for anyone who wants to understand this fascinating field in depth, but without any of the advanced math and programming usually required to grasp its internals. If you want to know how these tools work, and use them yourself, the answers are all within these pages. And, if you're ready to write your own programs, there are also plenty of supplemental Python notebooks in the accompanying Github repository to get you going. The book's conversational style, extensive color illustrations, illuminating analogies, and real-world examples expertly explain the key concepts in deep learning, including:

- How text generators create novel stories and articles
- How deep learning systems learn to play and win at human games
- How image classification systems identify objects or people in a photo
- How to think about probabilities in a way that's useful to everyday life
- How to use the machine learning techniques that form the core of modern AI

Intellectual adventurers of all kinds can use the powerful ideas covered in Deep Learning: A Visual Approach to build intelligent systems that help us better understand the world and everyone who lives in it. It's the future of AI, and this book allows you to fully envision it. Full Color Illustrations

Marine Fisheries Ecology Simon Jennings, Michel Kaiser, John D. Reynolds, 2013-04-16 This topical and exciting textbook describes fisheries exploitation, biology, conservation and management, and reflects many recent and important changes in fisheries science. These include growing concerns about the environmental impacts of fisheries, the role of ecological interactions in determining population dynamics, and the incorporation of uncertainty and precautionary principles into management advice. The book draws upon examples from tropical, temperate and polar environments, and provides readers with a broad understanding of the biological, economic and social aspects of fisheries ecology and the interplay between them. As well as covering 'classical' fisheries science, the book focuses on contemporary issues such as industrial fishing, poverty and conflict in fishing communities, marine reserves, the effects of fishing on coral reefs and by-catches of mammals, seabirds and reptiles. The book is primarily written for students of fisheries science and marine ecology, but should also appeal to practicing fisheries scientists and those interested in conservation and the impacts of humans on the marine environment. particularly useful are the modelling chapters which explain the difficult maths involved in a user-friendly manner describes fisheries exploitation, conservation and management in tropical, temperate and polar environments broad coverage of 'classical' fisheries science emphasis on new approaches to fisheries science and the ecosystem effects of fishing examples based on the latest research and drawn from authors' international experience comprehensively referenced throughout extensively illustrated with photographs and line drawings

Assisted Reproduction Across Borders Merete Lie, Nina Lykke, 2016-10-04 Today, it often seems as though Assisted Reproductive Technologies (ARTs) have reached a stage of normalization, at least in some countries and among certain social groups. Apparently some practices - for example in vitro fertilization (IVF) - have become standard worldwide. The contributors to Assisted Reproduction Across Borders argue against normalization as an uncontested overall trend. This volume reflects on the state of the art of ARTs. From feminist perspectives, the contributors focus on contemporary political debates triggered by ARTs. They examine the varying ways in which ARTs are interpreted and practised in different contexts, depending on religious, moral and political approaches. Assisted Reproduction Across Borders embeds feminist analysis of ARTs across a wide variety of countries and cultural contexts, discussing controversial practices such as surrogacy from the perspective of the global South as well as the global North as well as inequalities in terms of access to IVF. This volume will appeal to scholars and students of anthropology, ethnography, philosophy, political science, history, sociology, film studies, media studies, literature, art history, area studies, and interdisciplinary areas such as gender studies, cultural studies, and postcolonial studies.

A Source of Wilderness Novice Survival Skills Donald F. Grantham, 2001-03-02 Modern man, or woman for that matter, from city, town, or farm has little knowledge of the real wilderness. Many

hunters, fisherfolk, joggers, backpackers, hikes and adventures know how to handle a prepared path, planned campsite or landscaped trail but the real woods were every thing, and I mean every thing is 'natural' they are lost. They have never seen any food walking around or any plants out of a plastic package. Thus off the planned path they hit the panic button and may needlessly die. A considerable number of people lost in the wilds die every year just because they did not have the basic knowledge to survive. A recent example from the Western states was a group of people perished in the woods with a host of good food all around. They just didn't know what to eat as they had never seen it growing in the ground. Few of today's citizen realize they are never more than a few seconds from trouble as their car rolls to a stop many miles from civilization with a dead engine. Every year many people buy a gun and become hunters. They know they are hunters, they now have a hunting license. The license gives them no knowledge of the woods, but they don't realize this until they get lost on the first trip. Some die. Some get themselves out with just dumb luck and fear to ever return, to the woods again many hours of true fun have been lost forever. This book could have helped save a life or made their trip a fun adventure to be enjoyed again and again. This book is full of basic information and how to for the novice, but the experienced outdoors person will find a wealth of useful information here as well. There are details on many different ways to live in the outdoors with little professional 'equipment' some may be new or a little different to other books on the subject, to build a fire, break in boots, walk, approach game, travel, finding food, water, shelter, how to cook without pots or pans, tell coming weather, what works in many places and what doesn't. How to make the things you need with only what tools you can devise or may have with you at the time is stressed as is outdoor first aid and confidence. All subjects very different to what you will experience in town or in a formal camping, backpacking or hiking situation. This book is different in that everything here has been tested over and over all over the country to be sure everything will work for the novice as well as the experienced outdoors person. This is not a table top or book shelf book it is a book to put in your pocket and take with you. It may well save a life.

Assorted Prose John Updike, 2012-09-18 John Updike's first collection of nonfiction pieces, published in 1965 when the author was thirty-three, is a diverting and illuminating gambol through midcentury America and the writer's youth. It opens with a choice selection of parodies, casuals, and "Talk of the Town" reports, the fruits of Updike's boyish ambition to follow in the footsteps of Thurber and White. These jeux d'esprit are followed by "Hub Fans Bid Kid Adieu," an immortal account of Ted Williams's last at-bat in Fenway Park; "The Dogwood Tree," a Wordsworthian evocation of one Pennsylvania childhood; and five autobiographical essays and stories. Rounding out the volume are classic considerations of Nabokov, Salinger, Spaulding, Beckett, and others, the earliest efforts of the book reviewer who would go on to become, in The New York Times's estimation, "the pre-eminent critic of his generation." Updike called this collection "motley but not unshapely." Some would call it a classic of its kind.

Family Favorite Casserole Recipes Addie Gundry, 2017-07-03 From Cinnamon Roll Casserole to John Wayne Cowboy Casserole, the 103 casserole dishes in this cookbook are simple and stress-free, but each is packed with flavor, making them your go-to family favorites to whip up any day of the week. In 103 Family Favorite Casserole Recipes, Addie Gundry shows that a dish doesn't have to be complicated to be creative. You don't need multiple pots and pans to find flavor. And with the proper tools, tips and techniques, anyone can cook memorable meals. She teaches you how to whip up everything from Potato Chip and Chicken Casserole to Strawberry Icebox Casserole to Skinny Cheeseburger Casserole. A casserole is something to be shared—something warm, rich, and worthy of a gathering on its own. Every recipe is paired with a beautiful finished dish photograph that will make readers jump at the idea of casserole night.

Some True Facts on the Easter Bunny with Colored Eggs and Baskets Dana B. Albert,2022-05-04 This story is about a family sailing across the ocean to find a new country with dreams of living with freedom to worship God the same way that their ancestors had been raised. They came from a country that put daily demands to follow unjust laws and strict rules ordered by the kings, and no one could dispute the king in any matter without receiving a harsh punishment. Landing on the New America with its rich soil and plentiful game, the families knew the heartfelt trip was well worth the rough journey. Each family would stay a few miles away of each other so they could harvest crops and build a home and barn or any type of storage area if they wanted. The new adventure starts! Having to live through a new unexplored environment of Rocky Mountains and wilderness with new types of foliage and unfamiliar wild animals was not easy. Soon a hardship on this family developed when Father became very ill. Here is how a clever design that the children made to help remember where the rabbit's dens were located and to trick the rabbits in order to catch them. This all started with the need to find the dens so they could catch one and take one home for dinner. Food was very scarce during the winter months after all the fruit and vegetables crops that had been stored were eaten. Hunting was a necessity to live. This new way to hunt for small game became the talk of the settlement for miles around. Sister along with Little Brother helped to show and teach other children how fun and easy it was to trick and hunt for rabbits.
