Eugenia Natoli

Wild Cats of the World Luke Hunter,2015-10-22 Ranging from the largest - the Tiger to the smallest species - the Rusty-spotted Cat and Black-footed Cat, the world's wild cats are some of the most beautiful, ferocious and feared carnivores in the world. Wild Cats of the World provides a detailed account of each species of wild cat, examining their importance throughout history and the future of some of the most endangered breeds. Using stunning photography and magnificent colour plates by top wildlife artist Priscilla Barrett to depict each cat in detail, Wild Cats of the World examines the characteristics of all 38 species, as well as their history, distribution and current IUCN status.

Wild Cats of the World Mel Sunquist,Fiona Sunquist,2017-05-15 Did you know that European royalty once used cheetahs to hunt deer, or that caracals can capture birds by leaping six and a half feet straight up into the air from a standing start? Have you ever wondered whether domestic cats really do land on their feet when they fall, or how Canada lynx can stalk their prey in the winter without falling through the deep snow? Wild Cats of the World is a treasure trove of answers to questions like these, and many others, for anyone who's interested in learning more about the world's felids, including the ones with whom we share our homes. Mel and Fiona Sunquist have spent more than a decade gathering information about cats from every available source, many of them quite difficult to find, including scientific papers, descriptions of hunts, archeological findings, observations by naturalists and travelers, reports from government agencies, and newsletters from a wide variety of organizations. Weaving information from these sources together with their own experiences observing wild cats around the world, the Sunquists have created the most comprehensive reference on felids available. Each of their accounts of the 36 species of cat contains a description of the cat, including human interactions with it, as well as detailed data on its distribution, ecology and behavior, status in the wild, and efforts to conserve it. Numerous photographs, including more than 40 in full color, illustrate these accounts. Ranging from the two-pound black-footed cat to the five-hundred-pound tiger, and from the African serval with its satellite-dish ears to the web-footed fishing cat of Asia, Wild Cats of the World will fascinate and educate felid fans of any stripe (or spot).

Nala's World Dean Nicholson,2020-09-29 Discover the nationally bestselling, true story of a life-changing friendship between a man and his rescue cat, Nala, as they adventure together on a bike journey around the world -- from the Instagram phenomenon @1bike1world. When 30-year-old Dean Nicholson set off from Scotland to cycle around the world, his aim was to learn as much as he could about our troubled planet. But he hadn't bargained on the lessons he'd learn from his unlikely companion. Three months after leaving home, on a remote road in the mountains between Montenegro and Bosnia, he came across an abandoned kitten. Something about the piercing eyes and plaintive meowing of the bedraggled little cat proved irresistible. He couldn't leave her to her fate, so he put her on his bike and then, with the help of local vets, nursed her back to health. Soon on his travels with the cat he named Nala, they forged an unbreakable bond -- both curious, independent, resilient and adventurous. The video of how they met has had 20 million views and their Instagram has grown to almost 750k followers -- and still counting! Experiencing the kindness of strangers, visiting refugee camps, rescuing animals through Europe and Asia, Dean and Nala have already learned that the unexpected can be pretty amazing. Together with Garry Jenkins, writer with James Bowen of the bestselling A Street Cat Named Bob, Dean shares the extraordinary tale of his and Nala's inspiring and heart-warming adventure together.

Big Cats Are Not Pets! Julie Marzolf,2013-08-01 All cats are incredibly cute when they're kittens and cubs. But when they grow up, wild cats are not so cuddly. Yet, some people keep big cats such as lions, tigers, and leopards as pets. They think they can tame them, but a wild animal is always wild, and many big cats owners are responsible for the deaths of people when their pets attack. This book describes the attributes of big cats that make them unsuitable pets. Readers discover the reasons why it's more humane to leave these exotic animals in their native habitats than to cage them.
