All New Letters from a Nut Ted L. Nancy,2010 The best-selling author of Letters from a Nut presents a latest collection of whimsical correspondence between the author and the unwary establishments, organizations and government offices that attempted to respond to such requests as a hotel room for 300 hamsters and a 59-foot piece of bologna.

Pierre Bonnard Pierre Bonnard,Nicole R. Myers,Allison Stielau,Metropolitan Museum of Art (New York, N.Y.),2009 The vibrant late paintings of Pierre Bonnard (1867-1947) are considered by many to be among his finest achievements. Working in a small converted bedroom of his villa in the south of France, Bonnard suffused his late canvases with radiant Mediterranean light and dazzling color. Although his subjects were close at hand-usually everyday scenes taken from his immediate surroundings, such as the dining room table being set for breakfast, or a jug of flowers perched on the mantelpiece - Bonnard rarely painted from life. Instead, he preferred to make pencil sketches in small diaries and then rely on these, along with his memory, once in the studio. This volume, which accompanies the first exhibition to focus on the interior and related still-life imagery from the last decades of Bonnard's long career, presents more than seventy-five paintings, drawings, and works on paper, many of them rarely seen in public and in some cases, little known. Although Bonnard's legacy may be removed from the succession of trends that today we consider the foundation of modernism, his contribution to French art in the early decades of the twentieth century is far more profound than history has generally acknowledged. In their insightful essays and catalogue entries the authors bring fresh critical perspectives to the ongoing reappraisal of Bonnard's reputation and to his place within the narrative of twentieth-century art.--Jacket

Toward Sustainable Agricultural Systems in the 21st Century National Research Council,Division on Earth and Life Studies,Board on Agriculture and Natural Resources,Committee on Twenty-First Century Systems Agriculture,2010-07-25 In the last 20 years, there has been a remarkable emergence of innovations and technological advances that are generating promising changes and opportunities for sustainable agriculture, yet at the same time the agricultural sector worldwide faces numerous daunting challenges. Not only is the agricultural sector expected to produce adequate food, fiber, and feed, and contribute to biofuels to meet the needs of a rising global population, it is expected to do so under increasingly scarce natural resources and climate change. Growing awareness of the unintended impacts associated with some agricultural production practices has led to heightened societal expectations for improved environmental, community, labor, and animal welfare standards in agriculture. Toward Sustainable Agricultural Systems in the 21st Century assesses the scientific evidence for the strengths and weaknesses of different production, marketing, and policy approaches for improving and reducing the costs and unintended consequences of agricultural production. It discusses the principles underlying farming systems and practices that could improve the sustainability. It also explores how those lessons learned could be applied to agriculture in different regional and international settings, with an emphasis on sub-Saharan Africa. By focusing on a systems approach to improving the sustainability of U.S. agriculture, this book can have a profound impact on the development and implementation of sustainable farming systems. Toward Sustainable Agricultural Systems in the 21st Century serves as a valuable resource for policy makers, farmers, experts in food production and agribusiness, and federal regulatory agencies.

Alternative Investments: A Primer for Investment Professionals Donald R. Chambers,Keith H. Black,Nelson J. Lacey,2018 Alternative Investments: A Primer for Investment Professionals provides an overview of alternative investments for institutional asset allocators and other overseers of portfolios containing both traditional and alternative assets. It is designed for those with substantial experience regarding traditional investments in stocks and bonds but limited familiarity regarding alternative assets, alternative strategies, and alternative portfolio management. The primer categorizes alternative assets into four groups: hedge funds, real assets, private equity, and structured products/derivatives. Real assets include vacant land, farmland, timber, infrastructure, intellectual property, commodities, and private real estate. For each group, the primer provides essential information about the characteristics, challenges, and purposes of these institutional-quality alternative assets in the context of a well-diversified institutional portfolio. Other topics addressed by this primer include tail risk, due diligence of the investment process and operations, measurement and management of risks and returns, setting return expectations, and portfolio construction. The primer concludes with a chapter on the case for investing in alternatives.

Pierre Rosanvallon's Political Thought Oliver Flügel-Martinsen,Franziska Martinsen,Stephen W. Sawyer,Daniel Schulz,2019-01-29 The work of Pierre Rosanvallon has increasingly found itself at the center of debates in democratic and political theory - although only few of his numerous monographs have thus far been translated from French. This interdisciplinary volume, the first comprehensive collection on his political thought in English, seeks to lay the groundwork for the study of this eminent political thinker and historian. Following a hitherto untranslated opening essay by Rosanvallon, the chapters - written from a variety of disciplinary perspectives including political theory, political science, philosophy, and history - cover a wide range of topics from the history of democracy to sovereignty, populism, and the function of the press in liberal democratic regimes.

Hoosiers and the American Story Madison, James H.,Sandweiss, Lee Ann,2014-10-01 A supplemental textbook for middle and high school students, Hoosiers and the American Story provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

Behavioral Finance: The Second Generation Meir Statman,2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance’s notion of people’s wants as “rational” wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as “irrational”—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people’s normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People’s normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People’s normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

European Clocks in the J. Paul Getty Museum Gillian Wilson,David Harris Cohen,Jean Nérée Ronfort,Jean-Dominique Augarde,Peter Friess,2013-08-15 Among the finest examples of European craftsmanship are the clocks produced for the luxury trade in the eighteenth century. The J. Paul Getty Museum is fortunate to have in its decorative arts collection twenty clocks dating from around 1680 to 1798: eighteen produced in France and two in Germany. They demonstrate the extraordinary workmanship that went into both the design and execution of the cases and the intricate movements by which the clocks operated. In this handsome volume, each clock is pictured and discussed in detail, and each movement diagrammed and described. In addition, biographies of the clockmakers and enamelers are included, as are indexes of the names of the makers, previous owners, and locations.

Getting the message through: A Branch History of the U.S. Army Signal Corps Rebecca Robbins Raines,1996 Getting the Message Through, the companion volume to Rebecca Robbins Raines' Signal Corps, traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War, through its stages of growth and change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch.

Early Churches in South Dakota Robert W. Sebesta,2018-08 A testament to the people who built them, churches represent shared religious beliefs, local craftsmanship, and community. Members of the congregations often constructed these buildings from readily available materials to fulfill their visions of faith, education, and fellowship. Over time, congregations grew, and some hired architects to erect high style churches on the prairie. From simple wood structures to large stone edifices, each building embodies the identity of its worshippers. Over the course of several years and many summer-time trips across South Dakota, Robert W. Sebesta photographed more than six hundred religious buildings built from 1869 to 1930ff,ff,,,ff,,f,,ff,ff,,,ff,,f,,€ff,ff,,,ff,,f,,many still in use, others long neglected. In Early Churches in South Dakota, he details, decade-by-decade, the early efforts to create these places of worship and the modern-day struggles to preserve them.
