*Smaller, Quicker, Cheaper* Daniel A. Wagner,2011 The effective use of educational assessments is fundamental to improving learning. However, effective use does not refer only to the technical parameters or statistical methodologies. Learning assessments in use todaywhether large-scale or household surveys or hybrid (smaller, quicker, cheaper or SQC)have varied uses and purposes. The present volume provides a review of learning assessments, their status in terms of the empirical knowledge base, and some new ideas for improving their effectiveness, particularly for those children most in need. It is argued here that SQC learning assessments have the potential to enhance educational accountability, increase transparency, and support a greater engagement of stakeholders with an interest in improving learning. In addition, countries need a sustained policy to guide assessment choices, including a focus on poor and marginalized populations.

**The Road to Results** Linda G. Morra-Imas,Linda G. Morra,Ray C. Rist,2009 'The Road to Results: Designing and Conducting Effective Development Evaluations' presents concepts and procedures for evaluation in a development context. It provides

procedures and examples on how to set up a monitoring and evaluation system, how to conduct participatory evaluations and do social mapping, and how to construct a rigorous quasi-experimental design to answer an impact question. The text begins with the context of development evaluation and how it arrived where it is today. It then discusses current issues driving development evaluation, such as the Millennium Development Goals and the move from simple project evaluations to the broader understandings of complex evaluations. The topics of implementing 'Results-based Measurement and Evaluation' and constructing a 'Theory of Change' are emphasized throughout the text. Next, the authors take the reader down 'the road to results,' presenting procedures for evaluating projects, programs, and policies by using a 'Design Matrix' to help map the process. This road includes: determining the overall approach, formulating questions, selecting designs, developing data collection instruments, choosing a sampling strategy, and planning data analysis for qualitative, quantitative, and mixed method evaluations. The book also includes discussions on conducting complex evaluations, how to manage evaluations, how to present results, and ethical behavior--including principles, standards, and guidelines. The final chapter discusses the future of development evaluation. This comprehensive text is an essential tool for those involved in development evaluation.

**Due Diligence** David Roodman,2012 The idea that small loans can help poor families build businesses and exit poverty has blossomed into a global movement. The concept has captured the public imagination, drawn in billions of dollars, reached millions of customers, and garnered a Nobel Prize. Radical in its suggestion that the poor are creditworthy and conservative in its insistence on individual accountability, the idea has expanded beyond credit into savings, insurance, and money transfers, earning the name microfinance. But is it the boon so many think it is? Readers of David Roodman's openbook blog will immediately recognize his thorough, straightforward, and trenchant analysis. Due Diligence, written entirely in public with input from readers, probes the truth about microfinance to guide governments, foundations, investors, and private citizens who support financial services for poor people. In particular, it explains the need to deemphasize microcredit in favor of other financial services for the poor.
