Chemistry: A Very Short Introduction Peter Atkins,2015-02-26 Most people remember chemistry from their schooldays as largely incomprehensible, a subject that was fact-rich but understanding-poor, smelly, and so far removed from the real world of events and pleasures that there seemed little point, except for the most introverted, in coming to terms with its grubby concepts, spells, recipes, and rules. Peter Atkins wants to change all that. In this Very Short Introduction to Chemistry, he encourages us to look at chemistry anew, through a chemist's eyes, in order to understand its central concepts and to see how it contributes not only towards our material comfort, but also to human culture. Atkins shows how chemistry provides the infrastructure of our world, through the chemical industry, the fuels of heating, power generation, and transport, as well as the fabrics of our clothing and furnishings. By considering the remarkable achievements that chemistry has made, and examining its place between both physics and biology, Atkins presents a fascinating, clear, and rigorous exploration of the world of chemistry - its structure, core concepts, and exciting contributions to new cutting-edge technologies. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

And he and Sylvie were arguing as he drove down the slick road. No one ever says what they were arguing about. Other people think it's not important. They do not know there is another story. The story that lurks between the facts. What they do not know—the cause of the argument—is crucial. So let me tell you...

Survey of Industrial Chemistry Philip J. Chenier,2012-12-06 Survey of Industrial Chemistry arose from a need for a basic text dealing with industrial chemistry for use in a one semester, three-credit senior level course taught at the University of Wisconsin-Eau Claire. This edition covers all important areas of the chemical industry, yet it is reasonable that it can be covered in 40 hours of lecture. Also an excellent resource and reference for persons working in the chemical and related industries, it has sections on all important technologies used by these industries: a one-step source to answer most questions on practical, applied chemistry. Young scientists and engineers just entering the workforce will find it especially useful as a readily available handbook to prepare them for a type of chemistry quite different than they have seen in their traditional coursework, whether graduate or undergraduate.

Chemistry and Numbers 2 Steve Monas,2007-01-17 Real Stories from Real Online Daters Chemistry and Numbers 2: Sexy, Funny, Horrifying and Yes, Successful Online Dating Stories from more than 50 Online Daters With an introduction and conclusion by internationally acclaimed online dating coach, relationship expert and advice columnist Keeley Smith. Accompanying website that helps you compare top online dating sites: ChemistryandNumbers.com EXCERPTS FROM CHEMISTRY & NUMBERS 2 FOUND: Love Online By Jamie Biegeleisen I gave him my number and we talked on the phone. Since things were still going well, we decided to meet that night. He drove to me and my first thought when I saw him was, He's so short! Not the greatest start to a date, huh? We went to a bar and ended up having a great time. We were joking and laughing and getting along really well. Unfortunately, I felt that we were in two different phases of our lives-he was still trying to find himself, and I thought that I had already done so. I don't know why, but I agreed to a second date. On my drive down to visit him I called my best friend and said, This is our second and last date. I'm only going because

he drove to Baltimore and I feel bad about that. We'll hang out on his turf and this will be it. Seven hours later I was on my way back home, calling my brother at 2 a.m., and telling him that while it could have been something I had eaten, I was pretty sure I had butterflies. Fast forward three years later and we are married. Getting Back on the Horse By Julia Light I walk down the stairs and just continue walking right out the door to the sidewalk up the block to my car jump in start her up and drive away. I have a pang of guilt. I dismiss it. How often have I been stood up, walked out on, or otherwise been dissed? The following day I receive an angry email. Where did you go? I thought you might've been hurt! I was worried!!! The guilt returns. I'm not that type of person! I decide to email him the truth using the safety of the computer. I tell him that you lied to me about your appearance. I was uncomfortable around you and I wasn't sure what else you could be lying about. I did not mean for you to worry, but frankly we barely knew each other. Get some perspective. Best wishes. Nice Girls Don't Internet Date By Desdemona Bandini He picked me up in his Cadillac Escalade SUV and dropped hints of his million-dollar ventures, but we had fun. The next date he wanted me to go to his palatial crib and watch a movie while he cooked for me. Translation: Sex. I was suppose to do the usual, Oh, your car is big, your house is so nice, do me. But I didn't. I said I would go on a date, but not to his house. He threw a tantrum and that was that. The next guy was James 007, who was from the South, and had an adorable photo of a blond yuppie that turned out to be very old. He had straggly black hair and looked like the devil. His music choice: Marilyn Manson. He requested I wear black. When he tried to spank me within 10 minutes of meeting me, I'd had enough. Cyber Love and the Swingers Club By Dana Verdino Ken whispered in my ear, They're swingers. Everyone here swings. For a moment

The Chemical Cosmos Steve Miller,2011-10-26 If you have ever wondered how we get from the awesome impersonality of the Big Bang universe to the point where living creatures can start to form, and evolve into beings like you, your friends and your family, wonder no more. Steve Miller provides us with a tour through the chemical evolution of the universe, from the formation of the first

molecules all the way to the chemicals required for life to evolve. Using a simple Hydrogen molecule – known as H-three-plus – as a guide, he takes us on a journey that starts with the birth of the first stars, and how, in dying, they pour their hearts out into enriching the universe in which we live. Our molecular guide makes its first appearance at the source of the Chemical Cosmos, at a time when only three elements and a total of 11 molecules existed. From those simple beginnings, H-three-plus guides us down river on the violent currents of exploding stars, through the streams of the Interstellar Medium, and into the delta where new stars and planets form. We are finally left on the shores of the sea of life. Along the way, we meet the key characters who have shaped our understanding of the chemistry of the universe, such as Cambridge physicist J.J. Thomson and the Chicago chemist Takeshi Oka. And we are given an insider's view of just how astronomers, making use of telescopes and Earth-orbiting satellites, have put together our modern view of the Chemical Cosmos.
