The Modern Chess Self-tutor David Bronstein,1995-01-01 This book by Grandmaster David Bronstein, one of the most original and influential players of the post-war period, is not a self-tutor in the conventional sense, where the basics of opening, middlegame and endgame are play are drily explained. Instead, the author engages in a frank conversation with the reader, discussing how strong players decide on their moves, and covering such topics as a shelter for the king, the deployment of the pieces and pawns, attack and defense, and the strengths and weaknesses of a position. A full list of David Bronstein's chess achievements would run to several pages. Suffice it to say that he once drew a match for the World Championship, was twice Soviet Champion, and has won numerous international tournaments around the world. He remains an active player and is a popular guest on the European circuit, where his uncompromising and creative approach still wins many friends. (This book is translated by Ken Neat, Cadogan's Russian Series Editor.)

In this guide, psychologist and chess teacher Karel van Delft provides access to the underlying scientific research and presents the best didactical methods. Van Delft has created a dependable toolkit for teachers and scholastic chess organizers. What can teachers do to improve their instruction? How (un)important is talent? How do 'chess in schools' programs fare in different countries? This is not a book on chess rules and moves, but it points the way to where good technical chess improvement content can be found. Chess Tactics Workbook for Kids John Nunn,2019-07-08 This is a book for those who know the rules of chess and are keen to start winning games. The quickest way to improve your chess is to learn tactics. But not just knowing the themes - you need to get used to using them in real positions. Master tactician John Nunn has thoughtfully crafted a course that gives you the basic nuggets of knowledge and immediately invites you to start finding tactical ideas for yourself. Chess Tactics Workbook for Kids is the first in a new series of books that help players gain chess skills by tackling hundreds of carefully chosen exercises. The themes are similar to those in Gambit's best-selling 'Chess for Kids' series, but the focus is on getting vital hands-on experience. Many positions build on ones given earlier, showing how advanced ideas are normally made up of simpler ones that we can all grasp. Each chapter introduces a basic theme and features dozens of exercises, with solutions that highlight the key points. In each chapter there are tips on what to look out for to help spot tactical ideas. As the chapters progress, we increasingly see how tactical ideas are combined together, with ideas from previous sections repeatedly appearing as part of a deadly one-two punch. The book ends with a series of six test papers where you are given no clues about the themes involved. Dr John Nunn is one of the best-respected figures in world chess. He was among the world's leading grandmasters for nearly twenty years and won four gold medals in chess Olympiads. In 2004, 2007 and 2010, Nunn was crowned World Chess Solving Champion, ahead of many former champions.
