What should they tell their children and when? What practical steps can they take to reduce the risks and keep their kids safe? Dr. Rebecca Bailey, with the assistance of her sister and registered nurse, Elizabeth, gives easily understood, easily followed answers. *Safe Kids, Smart Parents* builds on Dr. Bailey's years of experience as a family psychologist helping real families deal with real situations. From abduction to abuse, Bailey explains how parents can speak to their kids about troubling topics while building their self-esteem and teaching them how to protect themselves. A smart, comprehensive, and easy-to-read resource, *Safe Kids, Smart Parents* is the most important book a parent can own.

How to Keep Your Children Safe Yvonne Marie Vissing, 2006 Winner of the New England Sociological Association Sociologist of the Year (2008) Life in contemporary American society requires that children spend considerable time in the care of other people. These people include teachers, coaches, babysitters, camp counselors, ministers, neighbors, friends, and extended family. While most people who work with children do a good job, some caregivers fail to adequately care for kids, while others actually put them in harm's way. Parents may assume that caregivers of all kinds are uniformly evaluated and approved, but this is not always the case. American society, despite a superficial rhetoric of concern for children, has not instituted strong national, state, or local safety nets

to protect them. And because there is no comprehensive commitment to ensure child safety, there is no systematic, or even partial, oversight of adults charged with their care. As a result, parents are put in the difficult position of deciding whether caregivers of all kinds are sufficiently skilled and responsible to look after children. *How to Keep Your Children Safe* is essential reading for any parent concerned about child safety. It takes a hard look at the hidden side of children's lives--the times when they're in contact with caregivers who aren't doing their jobs properly. It provides detailed information on places where children are under the care of others, including day care, recreational settings, religious and civic organizations, schools, and summer camps. Vissing investigates the potential perils of each setting and enumerates ways in which parents can better monitor, or take control of, their child's safety. By writing a realistic assessment of commonplace settings that every parent and child can relate to, and offering a road map to child safety, Vissing empowers parents to make critical decisions about their children's lives.

Keeping Your Child Safe Compass Child Protection, 2021-05 Child abuse takes the lives of four to seven children every day¹ and profoundly impacts millions of families each year. As parents, we have a great responsibility to protect our children and rear them in positive, nurturing and safe environments. When our children are babies, we offer protection with crib walls and play pens. As they grow, we replace these with structure and boundaries that help our children stay secure, safe and out of danger. But protecting our children is more than just preventing them from meeting people who might harm or hurt them. It involves considering risks in the world today, understanding characteristics of people who abuse, and making changes in the way we do things, so that our families can stay safe. *Keeping Your Child Safe* outlines strategies parents can use to recognize and prevent child abuse. This guidebook explains what abuse is to increase your awareness and provides prevention strategies focusing on developing effective parenting skills, understanding the benefits of nonviolent discipline techniques, and offering practical ways to meet their children's emotional, physical, and developmental needs. Another goal is to empower parents to become not only practitioners of safe practices but also advocates for preventing child abuse by reaching out to other parents who may need help and support. The book is organized in four sections. The first explores types of abuse and ends with ideas to keep your child safe. The second section addresses technology safety to foster understanding about navigating potential dangers in the internet connected world in which our children are growing up, learn strategies to protect your children, and receive tips for talking with your kids about risks and precautions. The third section on bullying can help parents build a child's resiliency and teach them how to stay safe when responding to confrontations. The final section provides information to help you evaluate organizations with whom you might entrust your child's safety, be it schools, youth organizations, camps or faith-based organizations. This book is meant to open your eyes and inspire you to communicate with and educate your children so that they remain safe.

From Crib to Kindergarten Dorothy A. Drago, 2007-06-29 Named One of the Best Consumer Health Books of 2007 by Library Journal In childhood, the occasional bump or scrape comes with the territory. But serious injury is another matter, creating anxiety for even the most experienced parent. Fortunately, unintentional injury can be prevented. In this essential guide, an eminent child safety specialist explains how to reduce the risk of childhood injury at

home—and beyond. Her tips help protect children from birth to age five—those who are most vulnerable to serious injury. She describes how to provide a safe environment during the daily activities of sleeping, eating, bathing, dressing, playing, and traveling. The major hazards and potential injuries associated with each activity are identified along with the age when the child is at greatest risk. Illustrations, checklists, and summary charts complement the text and put valuable lessons and critical information at parents' fingertips. From Crib to Kindergarten is an indispensable "how to" for parents, grandparents, teachers, babysitters, and daycare providers.

The Authority On? Child Safety Gary Martin Hays, Adam Weart, Mary Ellen Fulkus, 2012-11-30 What Would Your Child Do in these situations? * If your child was approached on the playground and asked if he could help find a lost puppy, what would he do? * If you and your daughter became separated in the mall, what would she do? * If your home catches on fire in the middle of the night, would your children know what to do? * If he is being bullied in the bathroom at school or on the bus, what should he do? Do you really know how your child would respond (or should respond), or are you just guessing? Have you ever asked him or her to find out? Would you know what to ask or how to ask it? Would you know what to discuss with your child in these situations? *The Authority On Child Safety: How To Talk To Your Kids About Their Personal Safety Without Scaring Them* is NOT just a book that tells parents how to keep their kids safe. We want to make that point perfectly clear. If you think that your kids will be safe because you bought and read a book about child safety, then you are sadly mistaken. What you learn and digest does not matter one bit unless your child also learns safety concepts and drills. Then why should you buy it? This is the first place to start with educating your child on how to be safe. This is an interactive guide for parents to use to BEGIN the dialogue with their kids on how to be safe. We can not be with our kids 24/7. We will not always be there to protect them. At some point, they need to be empowered to stand up for themselves and to be able to protect themselves. Honestly ask yourself - what are you doing for your child - for your children - right now that is helping them to be able to protect themselves when you are not around? We are giving you a blueprint for you to use to start that process - right here, right now! In this guide, you will learn: * Why sticking your head in the sand and pretending crime does not exist is NOT a great way to protect your child (or yourself); * Important crime statistics that cannot be ignored! * Why Stranger Danger should NEVER be taught to our kids! * Where the registered sex offenders live in your area (hint: The U.S. Dept. Of Justice tells us there is on average one sex offender per square mile in the US); * Why your child is NEVER too young to learn safety concepts; * Why you should not be comfortable in thinking your child is safe because you never leave your kid alone with someone you don't know; * Why the Once A Year Safety Day programs in our schools are not working; * Why education is the key to keeping our kids safe! * HOW TO start the all important dialogue with your child about safety issues they may face, including topics such as: -Abduction Prevention -Bullying Prevention -Good / Bad / Unwanted Touch -Sexual Assault Prevention -Home Safety -Water Safety -Fire Safety -Bicycle Safety -Car Safety -Dog Safety -Gun Safety -Out and About Safety -Internet Safety -Social Media Safety -Drug and Alcohol Awareness * How to EMPOWER you child! So how do you keep your

child from becoming a victim? Education is the key. And it starts with a simple conversation between you and your child. We need to make sure our kids are taught to: (1) Understand and be able to recognize dangerous situations and behaviors. (2) Trust their gut - to trust their instincts. If something does not feel right to them, it probably isn't. (3) Have the self-confidence to be able to say NO if they ever feel threatened. You can't rely on our schools or others to empower your child. The process must start with you and we show you how to begin. Also note: ALL proceeds from the sale of this book will benefit Let's Protect Our Kids, a program of Keep Georgia Safe.org, a 501(c)(3) charitable organization with the mission to provide safety education and crime prevention training.

The Child Safety Guide for New and Expecting Parents Christian J. Bezick, 2004 You may not be aware of it, but being a young child can be dangerous. Children under the age of five – babies, toddlers and preschoolers – are injured and treated in hospital emergency rooms almost twice as frequently as the U.S. population five and older (on a per capita basis). Each year, approximately 1 in 11 children under age five are treated in hospital emergency rooms for injuries. And for every 2 young children treated in the ER, 3 are treated in doctors' offices and clinics. Although there are many ways in which a young child can get injured, in the overwhelming majority of cases, there is one common and consistent element – a parent or caregiver did not recognize the danger involved. Child safety is different from many other aspects of parenting. The way a young child interacts with his environment – the home, furniture and fixtures, baby products – must be fully understood in order to make his environment safe. Fortunately, most injuries are easily preventable when parents learn the child safety basics and become aware of the many subtle and unforeseen dangers facing their children. *The Child Safety Guide for New and Expecting Parents* enables parents and caregivers to learn about these important and critical elements essential for providing a safe environment for their children. Topics covered include childproofing, car seat selection, use and installation, child products, product recalls and hazards – water, choking, window, poison – which face our children daily. The content was selected to provide the most important information available to keep young children safe and focuses on safety issues for children from 0 to 5 years of age. The book was designed and organized for the sleep deprived and over-worked parent. We have used a larger than normal type face to go easy on the eyes (sleep deprived eyes) and have included many illustrations to visually portray safety concepts. The use of this book can and will go a long way in helping to reduce the many avoidable child injuries that occur daily throughout the U.S.
