A Field Guide to the Street Names of Central Cairo Humphrey Davies, 2018-07-14 The map of a city is a palimpsest of its history. In Cairo, people, places, events, and even dates have lent their names to streets, squares, and bridges, only for those names often to be replaced, and then replaced again, and even again, as the city and the country imagine and reimagine their past. The resident, wandering boulevards and cul-de-sacs, finds signs; the reader, perusing novels and histories, finds references. Who were 'Abd el-Khaleq Sarwat Basha or Yusef el-Gindi that they should have streets named after them? Who was Nubar Basha and why did his street move from the north of the city to its center in 1933? Why do older maps show two squares called Bab el-Luq, while modern maps show none? Focusing on the part of the city created in the wake of Khedive Ismail's command, given in 1867, to create a "Paris on the Nile" on the muddy lands between medieval Cairo and the river, *A Field Guide to the Street Names of Cairo* lists more than five hundred current and three hundred former appellations. Current street names are listed in alphabetical order, with an explanation of what each commemorates and when it was first recorded, followed by the same for its predecessors. An index allows the reader to trace streets whose names have disappeared or that have never achieved more than popular status. This is a book that will satisfy the curiosity of all, be they citizens, long-term residents, or visitors, who are fascinated by this most multi-layered of cities and wish to understand it better.

Islamic Cairo in Maps Yasser M. Ayad, 2021-11-16 A portable, easy-to-use map guide that locates over 700 hundred Islamic-era monuments in historic Cairo using the most sophisticated Geographic Information Systems (GIS) technology This portable, easy-to-use map guide helps you locate over seven hundred Islamic-era monuments in Cairo's historic core, stretching from the city's northern walls all the way southward to the Mosque of Ibn Tulun and the Citadel, and beyond to Coptic Cairo, which includes monuments that pre-date Islamic rule. Clearly divided into six digestible main sections, the first five contain clusters of monuments, while the sixth covers structures scattered all around the old Cairene urban fabric. The clear, uncluttered cartographic style makes finding where you want to go a pleasure, and the maps are accompanied by a comprehensive index of monuments that gives their dates where known, their location referenced to their corresponding map pages, and a timeline of key periods and dynasties. Attractively designed in full color and including over twenty photographs of key monuments, this guide is conveniently packed into a slim 104 pages--handy enough to take anywhere and great for planning and remembering excursions. It is not only an ideal companion for the city's visitors and residents but an invaluable resource for historians, writers, and students.

Cairo Nezar AlSayyad, 2011-05-02 From its earliest days as a royal settlement fronting the pyramids of Giza to its current manifestation as the largest metropolis in Africa, Cairo has forever captured the urban pulse of the Middle East. In *Cairo: Histories of a City*, Nezar AlSayyad narrates the many Caicos that have existed throughout time, offering a panoramic view of the city's history unmatched in temporal and geographic scope, through an in-depth examination of its architecture and urban form. In twelve vignettes, accompanied by

drawings, photographs, and maps, AlSayyad details the shifts in Cairo's built environment through stories of important figures who marked the cityscape with their personal ambitions and their political ideologies. The city is visually reconstructed and brought to life not only as a physical fabric but also as a social and political order—a city built within, upon, and over, resulting in a present-day richly layered urban environment. Each chapter attempts to capture a defining moment in the life trajectory of a city loved for all of its evocations and contradictions. Throughout, AlSayyad illuminates not only the spaces that make up Cairo but also the figures that shaped them, including its chroniclers, from Herodotus to Mahfouz, who recorded the deeds of great and ordinary Cairenes alike. He pays particular attention to how the imperatives of Egypt's various rulers and regimes—from the pharaohs to Sadat and beyond—have inscribed themselves in the city that residents navigate today.
