Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated) NaeYC,2021-08 The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.

Caribbean Children's Literature, Volume 2 Betsy Nies,Melissa García Vega,2023-05-18

Contributions by Jarrel De Matas, Summer Edward, Teófilo Espada-Brignoni, Pauline Franchini, Melissa García Vega, Dannabang Kuwabong, Amanda Eaton McMenamin, Betsy Nies, and Michael Reyes *Caribbean Children's Literature, Volume 2: Critical Approaches* offers analyses of the works of writers of the Anglophone Caribbean and its diaspora—or, except for one chapter on Francophone Caribbean children's literature, those who write in English. The volume addresses the four language regions, early children's literature of conquest—in particular, the US colonization of Puerto Rico—and the fine line between children's and adult literature. It explores multiple young adult genres, probing the nuances and difficulties of historical fiction and the anticolonial impulses of contemporary speculative fiction. Additionally, the volume offers an overview of the literature of disaster and recovery, significant for readers living in a region besieged by earthquakes, hurricanes, and flooding. In this anthology and its companion anthology, international and regional scholars provide coverage of both areas, offering in-depth explorations of picture books, middle-grade, and young adult stories. The volumes examine the literary histories of both children's and young adult literature according to language region, its use (or lack thereof) in schools, and its place in the field of publishing. Taken together, the essays expand our understanding of Caribbean literature for young people.

Childhood and the Classics Sheila Murnaghan, Deborah H. Roberts, 2018-03-09 The dissemination of classical material to children has long been a major form of popularization with far-reaching effects, although until very recently it has received almost no attention within the growing field of classical reception studies. This volume explores the ways in which children encountered the world of ancient Greece and Rome in Britain and the United States over a century-long period beginning in the 1850s, as well as adults' literary responses to their own childhood encounters with antiquity. Rather than discussing the role of classics in education, it focuses on books read for enjoyment, and on two genres of children's literature in particular: the myth collection and the historical novel. The tradition of myths retold as children's stories is traced in the work of writers and illustrators from Nathaniel Hawthorne and Charles Kingsley to Roger Lancelyn Green and Ingri and Edgar Parin D'Aulaire, while the discussion of historical fiction focuses particularly on the roles of nationality and gender in the construction of an ancient world for modern children. The book concludes with an investigation of the connections between childhood and antiquity made by writers for adults, including James Joyce, Virginia Woolf, and H.D. Recognition of the fundamental role in children's literature of adults' ideas about what children want or need is balanced throughout by attention to the ways in which child readers have made such works their own. The formative experiences of antiquity discussed throughout help to explain why despite growing uncertainty about the appeal of antiquity to modern children, the classical past remains perennially interesting and inspiring.

Lotty was Avith her, looking guilty and rather frightened. I didn't ask her, Melenda, she explained. 'She wants a rest, ' said Valentine; 'I mean to do it. Mastering the Art of French Cooking, Volume 1 Julia Child, Louisette Bertholle, Simone Beck, 2011-10-05 NEW YORK TIMES BESTSELLER • The definitive cookbook on French cuisine for American readers: What a cookbook should be: packed with sumptuous recipes, detailed instructions, and precise line drawings. Some of the instructions look daunting, but as Child herself says in the introduction, 'If you can read, you can cook.' —Entertainment Weekly "I only wish that I had written it

myself.” —James Beard Featuring 524 delicious recipes and over 100 instructive illustrations to guide readers every step of the way, *Mastering the Art of French Cooking* offers something for everyone, from seasoned experts to beginners who love good food and long to reproduce the savory delights of French cuisine. Julia Child, Simone Beck, and Louisette Bertholle break down the classic foods of France into a logical sequence of themes and variations rather than presenting an endless and diffuse catalogue of dishes—from historic Gallic masterpieces to the seemingly artless perfection of a dish of spring-green peas. Throughout, the focus is on key recipes that form the backbone of French cookery and lend themselves to an infinite number of elaborations—bound to increase anyone’s culinary repertoire. “Julia has slowly but surely altered our way of thinking about food. She has taken the fear out of the term ‘haute cuisine.’ She has increased gastronomic awareness a thousandfold by stressing the importance of good foundation and technique, and she has elevated our consciousness to the refined pleasures of dining. —Thomas Keller, *The French Laundry*

Our Mythical Childhood... The Classics and Literature for Children and Young Adults, 2016-11-01 In *The Classics and Children's Literature between West and East* a team of contributors from different continents offers a survey of the reception of Classical Antiquity in children’s and young adults’ literature by applying regional perspectives.

Uncommon Understanding (Classic Edition) Dorothy V. M. Bishop, 2014-03-14 This is a Classic Edition of Dorothy Bishop’s award-winning textbook on the development of language comprehension, which has been in print since 1997, and now includes a new introduction from the author. The book won the British Psychological Society book award in 1999, and is now widely seen as a classic in the field of developmental language disorders. *Uncommon Understanding* provides a comprehensive account of the process of comprehension, from the reception of an acoustic signal, to the interpretation of communicative intentions, and integrates a vast field of research on language acquisition, psycholinguistics and neuropsychology. In the new introduction Dorothy Bishop reflects on the organization of the book, and developments in the field since the book was first published. A major theme in the book is that comprehension should not be viewed as a unitary skill – to understand spoken language one needs the ability to classify incoming speech sounds, to relate them to a mental lexicon, to interpret the propositions encoded by word order and grammatical inflections, and to use information from the environmental and social context to grasp an intended meaning. Another important theme is that although neuropsychological and experimental research on adult comprehension provides useful concepts and methods for assessing comprehension, it should be applied with caution, because a sequential, bottom-up information processing model of comprehension is ill-suited to the developmental context. Although the main focus of the book is on research and theory, rather than practical matters of assessment and intervention, the theoretical framework presented in the book will continue to help clinicians develop a clearer understanding of what comprehension involves, and how different types of difficulty may be pin-pointed.
