**The Orphans of Davenport: Eugenics, the Great Depression, and the War over Children's Intelligence** Marilyn Brookwood, 2021-07-27

The fascinating—and eerily timely—tale of the forgotten Depression-era psychologists who launched the modern science of childhood development. “Doomed from birth” was how psychologist Harold Skeels described two toddler girls at the Iowa Soldiers’ Orphans’ Home in Davenport, Iowa, in 1934. Their IQ scores, added together, totaled just 81. Following prevailing eugenic beliefs of the times, Skeels and his colleague Marie Skodak assumed that the girls had inherited their parents’ low intelligence and were therefore unfit for adoption. The girls were sent to an institution for the “feeble-minded” to be cared for by “moron” women. To Skeels and Skodak’s astonishment, under the women’s care, the children’s IQ scores became normal. Now considered one of the most important scientific findings of the twentieth century, the discovery that environment shapes children’s intelligence was also one of the most fiercely contested—and its origin story has never been told. In *The Orphans of Davenport*, psychologist and esteemed historian Marilyn Brookwood chronicles how a band of young psychologists in 1930s Iowa shattered the nature-versus-nurture debate and overthrew long-accepted racist and classist views of childhood development. Transporting readers to a rural Iowa devastated by dust storms and economic collapse, Brookwood reveals just how profoundly unlikely it was for this breakthrough to come from the Iowa Child Welfare Research Station. Funded by the University of Iowa and the Rockefeller Foundation, and modeled on America’s experimental agricultural stations, the Iowa Station was virtually unknown, a backwater compared to the renowned psychology faculties of Stanford, Harvard, and Princeton. Despite the

challenges they faced, the Iowa psychologists replicated increased intelligence in thirteen more “retarded” children. When Skeels published their incredible work, America’s leading psychologists—eugenicists all—attacked and condemned his conclusions. The loudest critic was Lewis M. Terman, who advocated for forced sterilization of low-intelligence women and whose own widely accepted IQ test was threatened by the Iowa research. Terman and his opponents insisted that intelligence was hereditary, and their prestige ensured that the research would be ignored for decades. Remarkably, it was not until the 1960s that a new generation of psychologists accepted environment’s role in intelligence and helped launch the modern field of developmental neuroscience.. Drawing on prodigious archival research, Brookwood reclaims the Iowa researchers as intrepid heroes and movingly recounts the stories of the orphans themselves, many of whom later credited the psychologists with giving them the opportunity to forge successful lives. A radiant story of the power and promise of science to better the lives of us all, *The Orphans of Davenport* unearths an essential history at a moment when race science is dangerously resurgent.

Behind the Scenes at the Library Edith Busby, 1960 Shows how a big American city public library functions: the various services provided, the staff, the machinery and the patrons. Provides summaries about municipal reference libraries, school libraries, the Library of Congress, hospital libraries, mobile libraries and other special libraries.

*Understanding Community Librarianship* Alistair Black, David Muddiman, 2017-09-29 In the information society, is the community focused library a real possibility? This book reappraises the relationship between the library and its communities through an examination of

the rise and decline of 'community' librarianship over the last three decades. The authors consider key models of community based library service and argue that bland assertions of community prevalence mask a complex and problematic relationship between a highly traditional public service bureaucracy and its users. The resulting uncertainty of purpose, they claim, explains much of the current 'crisis' of the public library movement. Drawing on recent social science theory and empirical work in the field, this book offers a new and critical perspective on the current public library debate. It is essential reading for librarians, students of information and library science and all who have a stake in the future of the public library. As a case study of community, public service and the local state it should also be of value to those with an interest in community development, cultural policy and local government.

*Enterprise Architecture for Integration* Clive

Finkelstein, 2006-01-01 The enterprise architecture methods of enterprise engineering as described in this book enable business experts and IT experts together to identify reusable business activities, processes and integrated databases. Three main sections cover enterprise architecture for managers, methodology, and integration technologies.

**Sea of Darkness** Brian Hicks, 2015-03-03 On a dark night in February of 1864, the H.L. Hunley, the first submarine to sink an enemy ship in combat, torpedoed the Union blockade ship USS Housatonic, a feat that would not be repeated for another 50 years. But fate was not kind to the Hunley that night as it sank with all of its crew on board before it could return to shore. Considered by many to be the Civil War's greatest mystery, the Hunley's demise and its

resting place have been a topic of discussion for historians and Civil War buffs alike for more than a hundred years. Adding still more to the intrigue, the vessel was discovered in 1995 by a dive team led by famed novelist and shipwreck hunter Clive Cussler, sparking an underwater investigation that resulted in the raising of the Hunley on August 8, 2000. Since that time, the extensive research and restorative efforts underway have unraveled the incredible secrets that were locked within the submarine at the bottom of the Atlantic Ocean. Join Civil War expert Brian Hicks as *Sea of Darkness* recounts the most historically accurate narrative of the sinking and eventual recovery ever written. Hicks has been given unprecedented access to all the main characters involved in the discovery, raising, and restoration of the Hunley. Complete with a foreword and additional commentary by Clive Cussler, *Sea of Darkness* offers new, never-before-published evidence on the cause of the Hunley's sinking, providing readers a tantalizing behind-the-scenes look inside the historic submarine.

### **Equity and Excellence in the Public Library** Bob

Usherwood, 2016-05-23 This important volume by one of the leading scholars in the field examines and discusses how library professionals can meet the demands of policy makers to open up the public library system without destroying its values. Based on a critical literature review, a survey of library professionals and consultations with other stakeholders, the book discusses the challenges involved in providing a service that prioritizes equity and social inclusion while at the same time attempting to promote and maintain quality, excellence and ethical standards. In assessing how those responsible for public libraries around the world go about this task the author advocates a service that is sensitive to difference and seeks to provide access to the best.

### **Wireless Networking** Louise E. Alcorn, Maryellen Mott

Allen,2006 Wireless networking is the wave of the future, and many of us--even if we are technologically inexperienced--now find ourselves having to implement or expand these networks. This manual is designed especially for librarians. Here you will find practical advice on why libraries should go wireless, as well as essential background information about what you need to know. The authors offer useful information on network topologies, protocols, and transfer rates, equipment options and costs, and the advantages/disadvantages of each, planning and implementation, and other technical concerns. Common library issues such as compatibility with campus-wide initiatives, tying in with Ethernets; interfacing with PDAs and other handheld devices, and printing are also addressed. Included with this manual are a wide variety of planning tools such as implementation worksheets, cost control charts, and timelines. This important guide is a vital tool for any 21st Century library.

**Library Service for the Disadvantaged** N. Guruswamy Naidu,1989

Healthy Living at the Library Noah Lenstra,2020-06-18 This broad-ranging resource is for librarians who want to begin a new program or incorporate healthy living into an existing one. From garden plots to cooking classes to StoryWalks to free yoga, more and more libraries are developing innovative programs and partnerships to encourage healthy living. Libraries increasingly provide health and wellness programs for all ages and abilities, and Healthy Living at the Library is intended for library staff of all types who want to offer programs and services that foster healthy living, particularly in the domains of food and physical activity. Author Noah Lenstra, who has extensive experience directing and advising on healthy living programs, first outlines steps librarians should take when starting

programs, highlighting the critical role of community partnerships. The second section of the book offers detailed instructions for running different types of programs for different ages and abilities. A third section includes advice on keeping the momentum of a program going and assessing program impacts. Lenstra offers tips on how to overcome challenges or roadblocks that may arise. An appendix contains resources you can adapt to get these programs off the ground, including waivers of liability, memoranda of understanding, and examples of strategic plans and assessment tools.

Makerspaces in Libraries Theresa Willingham, Jeroen de Boer, 2015-08-20 Makerspaces, sometimes also referred to as hackerspaces, hackspaces, and fablabs are creative, DIY spaces where people can gather to create, invent, and learn. In libraries they often have 3D printers, software, electronics, craft and hardware supplies and tools, and more. Makerspaces are becoming increasingly popular in both public and academic libraries as a new way to engage patrons and add value to traditional library services. Discover how you can create a makerspace within your own library through this step-by-step guidebook. From planning your innovation center to hosting hack-a-thons, guest lectures, and social events in your new lab, Makerspaces in Libraries provides detailed guidance and best practices for creating an enduring, community driven space for all to enjoy and from which both staff and patrons will benefit. This well researched, in-depth guide will serve libraries of all sizes seeking to implement the latest technologies and bring fresh life and engaging programming to their libraries. Highlights and best practices include: budgeting and business planning for a library makerspace, creating operational documents, tools and resources overviews, national and international case studies, becoming familiar with 3D printers through practical printing projects

(seed bombs), how to get started with Arduino (illuminate your library with a LED ambient mood light), how to host a FIRST Robotics Team at the library, how to develop hands-on engagement for senior makers (Squishy Circuits), and how to host a Hackathon and build a coding community.

*The Soundtrack of My Life* Clive Davis, Anthony

DeCurtis, 2013-02-19 The chief creative officer of Sony Music presents a candid assessment of his life and the past half-century of popular music from an insider's perspective, tracing his work with a wide array of stars and personalities.

**The Library Catalogue as Social Space** Laurel Tarulli, 2012-01-16 Emphasizing the advantages of working together and exploring the future of library services in an online, socially connected world, this exciting book shows how all public library professionals can take advantage of our strongest community and information tool—the library catalogue. This book is a guide to the library catalogue that all public library professionals will find enlightening and useful. Its technical services perspective provides a different point of view as compared to traditional public library literature, which is often written by frontline professionals. For example, it poses and examines this thought-provoking question: should library catalogues be considered the primary gateway to the library's information, rather than the library website? Author and collection access librarian Laurel Tarulli examines next-generation or social catalogues, discussing the theories and concepts behind them, their impact on core library services, and their potential in shaping future libraries and library services. Geared toward frontline and backroom staff, this book helps

readers understand next-generation catalogues and see the collaborative opportunities that are possible between the frontline and backroom. Written to be much more than a one-time read, this resource book provides practical ideas for beneficial collaboration and implementation of social features in library catalogues.

**Managing Health and Wellbeing in the Public Sector** Cary L. Cooper, Ian Hesketh, 2017-09-14 As governments throughout the world experience increasing fiscal challenges, the pressures on public sectors to streamline services and harness technological advances is unprecedented. Many have undergone huge budgetary cuts as a result, but what are the effects of this intense organisational change on such a large and varied workforce? And how can managers within the public sector meet the challenge of delivering services whilst maintaining the health and wellbeing of staff tasked with carrying out the work? *Managing Health and WellBeing in the Public Sector: A Guide to Best Practice* is the ideal companion to any manager in these challenging times. Exploring the realities of working in the public sector, and those factors which can add meaning and purpose to working life, the book provides managers with a practical toolkit for creating the best working environment, as well as nurturing resilience and motivation within their staff. Written by two authors with a lifetime of experience in the field, the book also examines why promoting occupational health and wellbeing is beneficial to organizations, drawing on a wealth of international research to support this argument. It concludes with a series of case studies in which an international range of public sector managers discuss initiatives they have implemented, and how successful they have been. This is the ideal companion for any manager working in the public sector. It will also be instructive reading for students or researchers of occupational

or organizational psychology, as well as HRM.

**Raising the Hunley** Brian Hicks,Schuyler Kropf,2007-12-18 The history of the Confederate submarine H. L. Hunley is as astonishing as its disappearance. On February 17, 1864, after a legendary encounter with a Union battleship, the iron “fish boat” vanished without a trace somewhere off the coast of South Carolina. For more than a century the fate of the Hunley remained one of the great unsolved mysteries of the Civil War. Then, on August 8, 2000, with thousands of spectators crowding Charleston Harbor, the Hunley was raised from the bottom of the sea and towed ashore. Now, award-winning journalists Brian Hicks and Schuyler Kropf offer new insights into the Hunley’s final hours and recount the amazing true story of its rescue. The brainchild of wealthy New Orleans planter and lawyer Horace Lawson Hunley, the Hunley inspired tremendous hopes of breaking the Union’s naval blockade of Charleston, only to drown two crews on disastrous test runs. But on the night of February 17, 1864, the Hunley finally made good on its promise. Under the command of the heroic Lieutenant George E. Dixon, the sub rammed a spar torpedo into the Union sloop Housatonic and sank the ship within minutes, accomplishing a feat of stealth technology that would not be repeated for half a century. And then, shortly after its stunning success, the Hunley vanished. This book is an extraordinary true story peopled with a fascinating cast of characters, including Horace Hunley himself,

the Union officers and crew who went down with the Housatonic, P. T. Barnum, who offered \$100,000 for its recovery, and novelist Clive Cussler, who spearheaded the mission that finally succeeded in finding the Hunley. The drama of salvaging the sub is only the prelude to a page-turning account of how scientists unsealed this archaeological treasure chest and discovered the inner-workings of a submarine more technologically advanced than anyone expected, as well as numerous, priceless artifacts. Hicks and Kropf have crafted a spellbinding adventure story that spans over a century of American history. Dramatically told, filled with historical details and contemporary color, illustrated with breathtaking original photographs, *Raising the Hunley* is one of the most fascinating Civil War books to appear in years.

**Hiroshima** Clive Lawton, 2004 Provides an historical account of the events surrounding the bombings of Hiroshima and Nagasaki in 1945 during World War II, discussing the long term repercussions and the overall results from a military standpoint.
