Betting on Famine Jean Ziegler,2010-04-20 "The seminal book on global poverty and hunger . . . How rapacious speculators and complicit bureaucrats are starving a billion people" (Wenonah Hauter, executive director of Food & Water Watch and author of Foodopoly). Few people know that world hunger was very nearly eradicated in our lifetimes. In the past five years, however, widespread starvation has suddenly reappeared, and chronic hunger is a major issue on every continent. In an extensive investigation of this disturbing shift, Jean Ziegler—one of the world's leading food experts—lays out in clear and accessible terms the complex global causes of the new hunger crisis. Ziegler's wide-ranging and fascinating examination focuses on how the new sustainable revolution in energy production has diverted millions of acres of corn, soy, wheat, and other grain crops from food to fuel. The results, he shows, have been sudden and startling, with declining food reserves sending prices to record highs and a new global commodities market in ethanol and other biofuels gobbling up arable lands in nearly every continent on earth. Like Raj Patel's pioneering *Stuffed and Starved*, *Betting on Famine* will enlighten the millions of Americans concerned about the politics of food at home—and about the forces that prevent us from feeding the world's children. "In this devastating book, [Ziegler] describes the horrors of food insecurity, the callousness of 'crusaders of neoliberalism' who control food and land access, and the individuals and grassroots organizations fighting for subsistence farmers and the right to food." —Publishers Weekly (starred review) "Passionate, well-researched, objective, and illuminating . . . When we close this book, indignant, we know that those who die of hunger are victims of money and power." —L'Express

Word Association Thematic Analysis Mike Thelwall,2021-02-02 This book explains the word association thematic analysis method, with examples, and gives practical advice for using it. It is primarily intended for social media researchers and students, although the method is applicable to any collection of short texts. Many research projects involve analyzing sets of texts from the social web or elsewhere to get insights into issues, opinions, interests, news discussions, or communication styles. For example, many studies have investigated reactions to Covid-19 social distancing restrictions, conspiracy theories, and anti-vaccine sentiment on social media. This book describes word association thematic analysis, a mixed methods strategy to identify themes within a collection of social web or other texts. It identifies these themes in the differences between subsets of the texts, including female vs. male vs. nonbinary, older vs. newer, country A vs. country B, positive vs. negative sentiment, high scoring vs. low scoring, or subtopic A vs. subtopic B. It can also be used to identify the differences between a topic-focused collection of texts and a reference collection. The method starts by automatically finding words that are statistically significantly more common in one subset than another, then identifies the context of these words and groups them into themes. It is supported by the free Windows-based software Mozdeh for data

collection or importing and for the quantitative analysis stages.
