**Thanks for Watching** Patricia G. Lange, 2019-11-15 YouTube hosts one billion visitors monthly and sees more than 400 hours of video uploaded every minute. In her award winning book, *Thanks for Watching*, Patricia G. Lange offers an anthropological perspective on this heavily mediated social environment by analyzing videos and the emotions that motivate sharing them. She demonstrates how core concepts from anthropology—participant-observation, reciprocity, and community—apply to sociality on YouTube. Lange's book reconceptualizes and updates these concepts for video-sharing cultures. Lange draws on 152 interviews with YouTube participants at gatherings throughout the United States, content analyses of more than 300 videos, observations of interactions on and off the site, and participant-observation. She documents how the introduction of monetization options impacted perceived opportunities for open sharing and creative exploration of personal and social messages. Lange's book provides new insight into patterns of digital migration, YouTube's influence on off-site interactions, and the emotional impact of losing control over images. The book also debunks traditional myths about online interaction, such as the supposed online/offline binary, the notion that anonymity always degrades public discourse, and the popular characterization of online participants as over-sharing narcissists. YouTubers' experiences illustrate fascinating hybrid forms of contemporary

sociality that are neither purely mediated nor sufficient when conducted only in person. Combining intensive ethnography, analysis of video artifacts, and Lange's personal vlogging experiences, the book explores how YouTubers are creating a posthuman collective characterized by interaction, support, and controversy. In analyzing the tensions between YouTubers' idealistic goals of sociality and the site's need for monetization, *Thanks for Watching* makes crucial contributions to cultural anthropology, digital ethnography, science and technology studies, new media studies, communication, interaction design, and posthumanism. For its perceptive analysis of video blogging for self-expression and sociality, *Thanks for Watching* received the Franklyn S. Haiman Award for Distinguished Scholarship in Freedom of Expression (2020), from the National Communication Association.

*Digital Music Distribution* Hendrik Storstein Spilker, 2017-08-16 The digital music revolution and the rise of piracy cultures has transformed the music world as we knew it. *Digital Music Distribution* aims to go beyond the

polarized and reductive perception of 'piracy wars' to offer a broader and richer understanding of the paradoxes inherent in new forms of distribution. Covering both production and consumption perspectives, Spilker analyses the changes and regulatory issues through original case studies, looking at how digital music distribution has both changed and been changed by the cultural practices and politicking of ordinary youth, their parents, music counter cultures, artists and bands, record companies, technology developers, mass media and regulatory authorities. Exploring the fundamental change in distribution, Spilker investigates paradoxes such as: The criminalization of file-sharing leading not to conflicts, but to increased collaboration between youths and their parents; Why the circulation of cultural content, extremely damaging for its producers, has instead been advantageous for the manufacturers of recording equipment; Why more artists are recording in professional sound studios, despite the proliferation of good quality equipment for home recording; Why mass media, hit by many of the same challenges as the music industry, has been so critical of the way it has tackled these challenges. A rare and timely volume looking at the changes induced by the digitalization of music distribution, *Digital Music Distribution* will appeal to undergraduate students and policy makers interested in fields such as Media Studies, Digital Media, Music Business, Sociology and Cultural Studies.

*Social TV* Cory Barker, 2022-07-15 On March 15, 2011, Donald Trump changed television forever. The Comedy Central Roast of Trump was the first major live broadcast to place a hashtag in the corner of the screen to encourage real-time reactions on Twitter, generating more than 25,000 tweets and making the broadcast the most-watched Roast in Comedy Central history. The #trumproast initiative personified the media and tech industries' utopian vision for a multi-screen and communal live TV experience. In *Social TV: Multi-Screen Content and Ephemeral Culture*, author Cory Barker reveals how the US television industry promised—but failed to deliver—a social media revolution in the 2010s to combat the imminent threat of on-demand streaming video. Barker examines the rise and fall of Social TV across press coverage, corporate documents, and an array of digital ephemera. He demonstrates that, despite the talk of disruption, the movement merely aimed to exploit social media to reinforce the value of live TV in the modern attention economy. Case studies from broadcast networks to tech start-ups uncover a persistent focus on community that aimed to monetize consumer behavior in a transitional

industry period. To trace these unfulfilled promises and flopped ideas, Barker draws upon a unique mix of personal Social TV experiences and curated archives of material that were intentionally marginalized amid pivots to the next big thing. Yet in placing this now-forgotten material in recent historical context, Social TV shows how the era altered how the industry pursues audiences. Multi-screen campaigns have shifted away from a focus on live TV and toward all-day “content” streams. The legacy of Social TV, then, is the further embedding of media and promotional material onto every screen and into every moment of life.

**Privacy in the Information Society** Philip Leith, 2016-12-05  
Information society projects promise wealth and better services to those countries which digitise and encourage the consumer and citizen to participate. As paper recedes into the background and digital data becomes the primary resource in the information society, what does this mean for privacy? Can there be

privacy when every communication made through ever-developing ubiquitous devices is recorded? Data protection legislation developed as a reply to large scale centralised databases which contained incorrect data and where data controllers denied access and refused to remedy information flaws. Some decades later the technical world is very different one, and whilst data protection remains important, the cries for more privacy-oriented regulation in commerce and eGov continue to rise. What factors should underpin the creation of new means of regulation? The papers in this collection have been drawn together to develop the positive and negative effects upon the information society which privacy regulation implies.
