**Value and Reward Based Learning in Neurobots** Jeffrey L Krichmar, Florian

Röhrbein, 2015-03-05 Organisms are equipped with value systems that signal the salience of environmental cues to their nervous system, causing a change in the nervous system that results in modification of their behavior. These systems are necessary for an organism to adapt its behavior when an important environmental event occurs. A value system constitutes a basic assumption of what is good and bad for an agent. These value systems have been effectively used in robotic systems to shape behavior. For example, many robots have used models of the dopaminergic system to reinforce behavior that leads to rewards. Other modulatory systems that shape behavior are acetylcholine's effect on attention, norepinephrine's effect on vigilance, and serotonin's effect on impulsiveness, mood, and risk. Moreover, hormonal systems such as oxytocin and its effect on trust constitute as a value system. This book presents current research involving neurobiologically inspired robots whose behavior is: 1) Shaped by value and reward learning, 2) adapted through interaction with the environment, and 3) shaped by extracting value from the environment.

*Tutor in a Book* Alexandra Mayzler,Ana McGann,2010-06-18 Organization. Time management. Study skills. These are the three critical skills students need to perform well in school. Most students lack at least one of these skills; many lack all three. Yet without a sound understanding of this all-important learning trifecta, students are likely to fail--over and over again. In this practical hands-on guide, Thinking Caps founder Alexandra Mayzler outlines the unique approach that has made her one-of-a-kind tutoring program such a success with students, parents, and educators alike. This interactive program steps your child through these crucial three areas, providing the worksheets, exercises, and anecdotes she needs to master them in record time. The book also features stories throughout, based on case studies of real-life clients. Special emphasis is placed on helping students understand how their own personalities, behaviors, and habits affect their work. Your child will learn to identify short- and long-term goals, and come to see how good study habits can help him achieve those goals. With this book, your child can get through school with flying colors!

*American English Primary Colors 2 Teacher's Book* Diana Hicks,Andrew Littlejohn,2004-02-24  
This exciting four-level course is packed with fun activities. Right from the start, children are fully involved in thinking for themselves, doing things themselves, and making things themselves. The topics in the Pupil's Books encourage children to think about the world around them and, at the higher levels, are linked to other subject areas in the school curriculum. This approach makes language learning more meaningful and memorable. Regular revision pages, and 'I can' sections in the Activity Books allow children to evaluate their own progress, giving them a real sense of achievement. The Songs and Stories Audio Cassette/CD can be used in the classroom or at home and is a fun way of providing extra practice. Delightfully illustrated Vocabulary Cards are also available to practise the target language.

Theorizing Pedagogical Interaction Hansun Zhang Waring,2015-11-06 Pedagogical interaction can be observed through many different landscapes, such as the graduate seminar, the writing skills center, the after-school literacy program, adult ESL classrooms, and post-observation conferences. By viewing these settings through the lens of conversation analysis, this volume lays the groundwork for three principles of pedagogical interaction: competence, complexity, and contingency. The author explores these principles and how they inform what makes a good teacher, how people learn, and why certain pedagogical encounters are more enlightening than others. Drawn from the author's original research in various pedagogical settings, this volume collects empirical insights from conversation analysis and contributes to theory building. Theorizing Pedagogical Interaction will appeal to students and scholars in applied linguistics, educational linguistics, and communication studies who are interested in the discourse of teaching and learning.

Where Are All the Young Men and Women of Color? Melvin Delgado, 2001-09-26 When it comes to social work practice in community outreach programs, in juvenile detention centres, in prisons, in parole and probation programs, and in the inner cities, Melvin Delgado asks the question: Where are all the young men and women of color? Although many urban residents, especially persons of color, are or have been involved in the juvenile and/or criminal justice system, the topic of criminal offenders and ex-offenders has been much neglected by the human services literature. This book stands as the only work to discuss correctional supervision and the needs of individuals in a nonprescriptive manner, marking a shift toward a capacity enhancement, or strengths perspective, approach—specifically what are the strengths of individuals and how can they capitalize on them? Delgado includes a section of reflections from the field that applies capacity enhancement principles and methods to case studies.
