Hazardous Seas Louise K. Comfort,Harkunti P. Rahayu,2023-07-20 Tsunamis are infrequent but terrifying hazards for coastal communities. Difficult to predict, they materialize with little warning, claiming thousands of lives and causing billions of dollars in damage. Now a groundbreaking new approach to tsunami detection and warning developed by an international

team of researchers that relies on low-cost underwater sensors and networks of smartphone communication gives at-risk coastal communities an economically viable, scientifically sound means to protect themselves. Hazardous Seas, edited by disaster preparedness experts Louise K. Comfort and Harkunti P. Rahayu, is an invaluable guide for policy makers and international NGOs looking to save lives from tsunamis and mitigate crippling damage to communities. It also provides a comprehensive overview of tsunami detection and warning for students of engineering, computer science, planning, policy, and economic and environmental analysis.

Microsoft Windows Vista Unleashed Paul

McFedries,2004-04-03 Microsoft® Windows Vista™ Unleashed, Second Edition Paul McFedries Second Edition Includes coverage of Windows Vista Service Pack 1! Microsoft Windows Vista Unleashed, Second Edition, is a book for people, like you, who don't consider themselves to be "average users." It's a book for anyone who finds that doing things the official way is slower, less efficient, and less powerful because Windows Vista was designed from the ground up to avoid confusing novice users. The result is default settings that restrict flexibility, interminable wizards that turn 2-step tasks into 12-step sagas, and the hiding of powerful and useful programs behind layers of menus and dialog boxes. To unleash the potential of Windows Vista, you need a different approach that blows away Vista's novice features and scorns the standard way of doing things. This book goes beyond the standard-issue techniques sanctioned by Microsoft and parroted in other Windows Vista books. Instead, this book offers shortcuts for boosting your productivity, customizations for making Windows Vista work the way you do, workarounds for known Windows Vista problems, and warnings for avoiding Windows Vista pitfalls. Along the way, you'll learn about all kinds of insider details, undocumented features, powerful tools, and background facts that help put everything into

perspective. Paul McFedries is the president of Logophilia Limited, a technical writing company. He has been working with computers for more than 30 years and has been using Microsoft Windows since version 1. Paul has written more than 50 books that have sold more than 3 million copies worldwide. Learn what's new in Windows Vista Service Pack 1 Customize Windows Vista startup Troubleshoot software and hardware problems Tune Windows Vista's performance Automate Windows Vista with powerful and flexible scripts Implement Internet security and privacy features Configure and administer a small network Get the most out of Control Panel, group policies, the Registry, Device Manager, and other powerful tools Set up a complete maintenance program to keep Windows Vista running smoothly Discover a complete list of Windows Vista shortcut keys, a detailed look at the Command Prompt, and a batch file primer Master the new desktop search engine and learn how to group, stack, and filter files Understand and work with Windows Vista's User Account Control security feature Get the most out of your Tablet PC Take advantage of new Internet features such as RSS feeds, multiple home pages, and tabbed browsing Category: Microsoft Operating Systems Covers: Microsoft Windows Vista User Level: Intermediate—Advanced

Account Management Strategies in B2B Sales Hans-Peter Neeb, 2023-01-09 This book provides employees and managers in sales with a clearly defined process for building sustainable business relationships along the account journey. Using a structured method, you will learn how to set yourself up for success right from the start, increase your competitiveness, increase market share and generate more sales. In B2B sales today, it's no longer primarily about just solving the customer's problems and winning as much of the customer's budget as possible. The decisive factor for success is that you ask your customer the right questions, understand his strategy in all facets and help him to achieve his goals with your offer - this is the only way to create a fruitful and long-term partnership at eye level. If

you align your messages with these goals, you will generate tailored customer value, and the customer will have no choice but to accept your offer. This paradigm shift should make it easier for customers to buy, and it can be instrumental in helping account managers in B2B increase their sales over the long term. The book provides practical tools and a blueprint for salespeople to succeed and for managers to lead their teams with purpose.

Logic Programming Bart Demoen,Vladimir

Lifschitz,2004-11-18 This volume contains the papers presented at the 20th International Conference on Logic Programming, held in Saint-Malo, France, September 6-10, 2004. Since the first meeting in this series, held in Marseilles in 1982, ICLP has been the premier international conference for presenting research in logic programming. This year, we received 70 technical papers from countries all over the world, and the Program Committee accepted 28 of them for presentation; they are included in this volume. A stand-by-your-poster session took place during the conference. It served as a forum for presenting work in a more informal and interactive setting. Abstracts of the 16 posters selected by the Program Committee are included in this volume as well. The conference program also included invited talks and invited tutorials. We were privileged to have talks by three outstanding researchers and excellent speakers: Nachum Dershowitz (Tel Aviv University, Israel) talked on Termination by Abstraction, Michael Gelfond (Texas Tech University, USA) on Answer Set Programming and the Design of Deliberative Agents, and Gérard Huet (INRIA, France) on Non-determinism Lessons. Two of the invited talks appear in these proceedings. The tutorials covered topics of high interest to the logic programming community: Ilkka Niemelä gave a tutorial on The Implementation of Answer Set Solvers, Andreas Podelskion Tree Automata in Program Analysis and Verification, and Guillermo R. Simari on Defeasible Logic Programming and Belief Revision. Satellite workshops made the conference even more interesting. Six workshops collocated with ICLP 2004: - CICLOPS2004, Colloquium on Implementation of Constraint and Logic Programming Systems, organized by Manuel Carro. -

COLOPS2004, 2nd International Workshop on Constraint & Logic Programming in Security, organized by Frank Valencia. - MultiCPL2004, 3rd International Workshop on Multiparadigm Constraint, organized by Petra Hofstedt. - Teach LP2004, 1st International Workshop on Teaching Logic Programming, organized by Dietmar Seipel.
